Free NCP-MCA valid vce, Latest NCP-MCA exam pdf, NCP-MCA valid test

TestPDF is a reliable study center providing you the valid and correct NCP-MCA questions & answers for boosting up your success in the actual test. NCP-MCA PDF file is the common version which many candidates often choose. If you are tired with the screen for study, you can print the NCP-MCA PdfDumps into papers. With the pdf papers, you can write and make notes as you like, which is very convenient for memory. We can ensure you pass with NCP-MCA study torrent at first time.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q97-Q102):

NEW QUESTION # 97

Which is the correct Macro syntax?

- A. @@[and]@@
- B. @@(and)@@
- C. @@{and}@@
- D. @@{and}@@

Answer: D

Explanation:

The correct macro syntax in Nutanix Calm is @@{and}@@. This syntax is used to reference variables and parameters within

blueprints and tasks, allowing for dynamic substitution of values during execution.

Reference:

Nutanix Calm documentation on Macro Syntax.

Nutanix Best Practices for Using Macros.

NEW QUESTION # 98

How should an administrator enable Calm?

- A. Prism Central -> Settings -> Upgrade Prism Central -> Calm -> Enable
- B. Prism Central -> Settings -> Calm -> Enable
- C. Prism Element -> LCM -> Calm -> Enable
- **D. Prism Central -> Services -> Calm -> Enable**

Answer: D

Explanation:

To enable Calm, the administrator needs to log on to Prism Central with a local ADMIN account and click Services -> Calm -> Enable. This will install the Calm service on Prism Central and allow the administrator to access the Calm UI and features. The other options are incorrect because they either refer to Prism Element, which is not the correct platform for Calm, or they involve unnecessary or incorrect steps. Reference: [Enabling and Accessing Calm | Nutanix Community] (<https://next.nutanix.com/installation-configuration-23/enabling-and-accessing-calm-40191>); [Nutanix Certified Professional - Multicloud Automation (NCP-MCA) Exam Blueprint Guide] (<https://www.nutanix.com/content/dam/nutanix/resources/support/ds-ncp-mca.pdf>), section 2.1.

NEW QUESTION # 99

A developer updated a blueprint to ensure that the IP address of the VM is reserved in IPAM as part of the deployment process. The developer noticed that when new VMs are created, they still get a DHCP IP address and not a reserved IP address.

What is the most likely reason for this behavior?

- A. Developer forgot to save the updated blueprint
- **B. Developer created a post-create task for reserving the IP address**
- C. Developer forgot to publish the updated blueprint
- D. Developer created a pre-create task for reserving the IP address

Answer: B

NEW QUESTION # 100

A developer has a Development Blueprint that performs the following high level items:

Creates a Windows and Ubuntu Server.

Installs IIS on Windows

Installs MySQL on Ubuntu

As part of Development, there is a need for an Operator to restart IIS Services for troubleshooting purposes.

How should the developer add this functionality to the Blueprint?

- **A. Add an Execute Task in the Restart Action of the Windows/IIS Service.**
- B. Create an Endpoint for the IIS server and a Runbook that restarts the service.
- C. Add a Delay Task in the Restart Action of the Windows/IIS Service.
- D. Add an Execute Task in the Restart Action of the Application Profile.

Answer: A

Explanation:

The Restart Action of a Service allows the developer to define custom tasks that will be executed when the service is restarted. An Execute Task can run any script or command on the target VM, such as restarting the IIS service. This way, the Operator can use the Self-Service Portal to restart the service without logging into the VM or using another tool.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA) v6.5, Section 2, Objective 2.1: Given a scenario, create a blueprint to deploy infrastructure and applications using Self-Service.

Nutanix Certified Professional Multicloud Automation (NCP-MCA) 6 Exam, Page 11, Section 2, Objective 2.1: Given a scenario, create a blueprint to deploy infrastructure and applications using Self-Service.

NEW QUESTION # 101

A developer has a Development Blueprint that performs the following high level items:

Creates a Windows and Ubuntu Server.

Installs IIS on Windows

Installs MySQL on Ubuntu

As part of Development, there is a need for an Operator to restart IIS Services for troubleshooting purposes.

How should the developer add this functionality to the Blueprint?

- A. Add an Execute Task in the Restart Action of the Windows/IIS Service.
- **B. Add an Execute Task in the Restart Action of the Application Profile.**
- C. Create an Endpoint for the IIS server and a Runbook that restarts the service.
- D. Add a Delay Task in the Restart Action of the Windows/IIS Service.

Answer: B

NEW QUESTION # 102

.....

Our NCP-MCA study braindumps are so popular in the market and among the candidates that is because that not only our NCP-MCA learning guide has high quality, but also our NCP-MCA practice quiz is priced reasonably, so we do not overcharge you at all.
