AAPC-CPC認證 - AAPC-CPC最新試題

當我們第一次開始提供Medical Tests的AAPC-CPC考試的問題及答案和考試模擬器，我們做夢也沒有想到，我們將做出的聲譽，我們現在要做的是我們難以置信的擔保形式，Fast2test的擔保，你會把你的Medical Tests的AAPC-CPC考試用來嘗試我們Medical Tests的AAPC-CPC培訓產品之一，這是正確的，合格率100%，我們能保證你的結果。

最新的 Medical Certification AAPC-CPC 免費考試真題 (Q143-Q148):

問題 #143

Consultation codes 99242-99245 have been deemed as not medically necessary and are no longer reimbursed by Medicare. This decision would fall under which term?

- A. Carrier Coding Determination
- B. Local Coding Determination
- **C. National Coding Determination**
- D. Governed Coding Determination

答案: C

解題說明:

Decisions regarding coverage are made through evidence-based processes and public opinion. National Coding Determination (NCD) is specific to Medicare coverage nationwide, whereas Local Coding Determination (LDC) is contractor and commercial specific. Carrier and Governed Coding Determinations do not exist.

問題 #144

Code the following note:

A male patient with a medical history of chronic obstructive pulmonary disease (COPD) presented to the emergency room 3 days ago with tachycardia and shortness of breath. He was intubated and admitted with acute respiratory failure (ARE) due to an acute exacerbation of COPD. Upon follow-up with the patient today, dark sputum was noted in the intubation tube, and testing confirmed aspiration pneumonia. I will start him on 875 mg of amoxicillin every 12 hours and follow up tomorrow.

- A. 99232, 144.1, 196.00, 169.0, ROO.O
- B. 99233, 169.0
- **C. 99232, 196.00, 144.1, 169.0**
- D. 99231, 169.0, 196.00, 144.1

答案: C

解題說明:

This documentation supports a decision-making of moderate complexity (number and complexity of problems addressed: high; amount and/or complexity of data to be reviewed and analyzed: minimal; diagnostic procedures and management examples: moderate), making CPT

99232 the most accurate description of services rendered. Regarding selection and sequencing of the diagnoses, always select the reason for the admission as the primary diagnosis code. In this case, the patient was admitted for ARF (096.00). The secondary code would be the underlying COPD

(044.1), and conditions arising after admission would be tertiary and so forth. Tachycardia would not be reported because it is a symptom of ARF and symptoms are not reportable when the underlying disease has been confirmed.

問題 #145

A 39-year-old female patient has developed a diaphragmatic hernia after an episode of domestic violence. The surgeon repairs the hernia through an incision into the abdomen. The patient is later discharged with no complications. How should this encounter be reported?

- A. 39540, K44.9, T 76.1 IXA
- **B. 39540, K44.9, T74.11XA Y07.9**
- C. 39541, K44.O, T74.11YA Y07.9
- D. 39541, K44.O, T76.1 IXA

答案: B

解題說明:

Acute trauma results from a single incident, whereas chronic trauma is repeated, usually over the course of months or years. In this scenario, the documentation does not specify, so the coder should assume acute trauma. There is no mention of obstruction, so ICD-IO-CM code selection is K44.9, followed by the cause of the hernia. When an exam shows evidence of abuse, the abuse is no longer considered suspected but confirmed.

問題 #146

A 79-year-old female patient is admitted to a skilled nursing facility for continued monitoring as she completes her course of antibiotics for bronchitis. Upon admission, a nurse practitioner spends 20 minutes with the patient, performing an evaluation of recovery and rebuilding of stamina. On day 3, the patient's physician completes an initial comprehensive assessment and determines the patient is recovering well on her current dosage of antibiotics. What CPT code should be reported on day 3?

- A. 0
- B. 1
- C. 2
- D. 3

答案： A

解題說明：

CPT defines an initial nursing facility service (NFS) as "the first encounter with the patient by the admitting physician to nursing facilities." Although the patient can be evaluated and treated by other medical staff in the meantime, only the physician responsible for the admission may report the initial comprehensive visit (99304-99306). If other medical personnel do provide treatment, those visits would be reported using the subsequent nursing facility care encounter codes (99307-99310). Nursing facility care services require a medically appropriate history and/or examination, and a review of medical decision making. In this scenario, the number and complexity of problems addressed at the encounter is low (one stable, acute illness), the amount and/or complexity of data reviewed or analyzed is straightforward (minimal or none), and the risk of complications and/or morbidity or mortality of patient management is moderate (prescription drug management). After considering that the patient is established, the level of complexity for the visit is considered low and the encounter should be reported with CPT code 99304.

問題 #147

Health behavior assessment and intervention codes capture services related to mental health.

- A. True
- B. False

答案： B

解題說明：

The statement is false. Health behavior assessment and intervention codes capture services related to a patient's physical health and can be used only when the patient has a physical health diagnosis as the primary reason for treatment-not a mental disorder. Although assessing factors related to the patient's mental state, it is done to promote functional improvement and lessen any obstacles to a patient's recovery.

問題 #148

.....

當前 Medical Tests 作為企業資訊解決方案的重要性及緊要性與日俱增，相關的工作機會將會越來越多，對技術能力的要求也越來越被企業作為面試的一個標準，所以不管在哪個行業，Medical Tests 工作者都必須不斷自我學習、接受訓練課程或是參加各式的專業認證來充實自己，使自己在工作上可以更加得心應手。而通過了 Medical Tests AAPC-CPC 認證考試，證明你的IT專業知識很強，有很強的能力，可以勝任一份很好的工作。
