Additionally, we offer up to three months of free Palo Alto Networks Network Security Professional NetSec-Pro exam questions updates. If the actual examination's topics or content changes within three months of your buying, we will immediately provide you with free Palo Alto Networks Network Security Professional NetSec-Pro exam questions updates. It is the best time to buy actual Palo Alto Networks Network Security Professional NetSec-Pro Exam Questions at an affordable price with these amazing offers. Don't miss this golden opportunity. Purchase Palo Alto Networks NetSec-Pro real exam questions and start preparing for the Palo Alto Networks Network Security Professional NetSec-Pro certification test today. Good Luck!

Palo Alto Networks Network Security Professional Sample Questions (Q102-Q107):

NEW QUESTION # 102

Which two tools can be used to configure Cloud NGFWs for AWS? (Choose two.)

- A. Prisma Cloud management console
- **B. Cloud service provider's management console**
- **C. Panorama**
- D. Cortex XSIAM

Answer: B,C

Explanation:

Cloud NGFW for AWS can be configured using Panorama for centralized management, as well as the AWS management console for native integration and configuration.

You can configure Cloud NGFW for AWS using Panorama for centralized security management, or directly through the AWS management console to deploy and manage security services for your AWS resources.

NEW QUESTION # 103

What ensures that CDSS services have the latest threat intelligence?

- **A. Automatic dynamic updates from Palo Alto Networks**
- B. Local policy refresh
- C. Manual log parsing
- D. SD-WAN optimization

Answer: A

Explanation:

Palo Alto Networks' Content Delivery Security Services (CDSS) are kept up to date with the latest threat intelligence by automatically receiving dynamic updates from Palo Alto Networks' content delivery infrastructure. This automated update mechanism ensures that security features like application and threat signatures remain current without requiring manual intervention, thus maintaining effective threat prevention and detection.

NEW QUESTION # 104

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- A. Generate a PDF summary report.
- B. Set up Cloud Identity Engine.
- **C. Configure a dashboard.**
- D. Open a support ticket.

Answer: C

Explanation:

To create custom Prisma Access reports within SCM, you first configure a dashboard that aggregates the relevant logs and analytics. This allows you to define the data points you want to include.

"Dashboards in SCM can be customized to include Prisma Access data sources, enabling you to create and generate reports that meet specific business and security requirements." (Source: SCM Dashboards and Reporting) Once configured, you can export the dashboard as a custom report.

"Use the dashboard's data visualization to create custom reports for Prisma Access, which can be exported as PDFs for distribution." (Source: SCM Report Customization)

NEW QUESTION # 105

Which firewall attribute can an engineer use to simplify rule creation and automatically adapt to changes in server roles or security posture based on log events?

- A. Predefined IP addresses
- B. Dynamic User Groups
- C. Address objects
- D. Dynamic Address Groups

Answer: D

Explanation:

Dynamic Address Groups enable the firewall to automatically adjust security policies based on tags assigned dynamically (via log events, API, etc.). This eliminates the need for manual updates to policies when server roles or IPs change.

Dynamic Address Groups allow you to create policies that automatically adapt to changes in the environment. These groups are populated dynamically based on tags, enabling automated security policy updates without manual intervention.

NEW QUESTION # 106

An administrator is configuring an Advanced WildFire Analysis profile on a PAN-OS firewall. The objective is to use inline cloud analysis to prevent unknown malware targeting Windows endpoints from traversing the firewall.

Which file type is supported for this analysis?

- A. JAR
- B. APK
- C. DMG
- D. PE

Answer: D

Explanation:

PE files are supported for inline cloud analysis in Advanced WildFire when protecting Windows endpoints. Portable Executable (PE) is the standard executable format used by Windows applications, making it the appropriate file type for detecting and preventing unknown Windows-targeted malware.

NEW QUESTION # 107

.....

In order to remain competitive in the market, our company has been keeping researching and developing of the new NetSec-Pro exam questions. We are focused on offering the most comprehensive NetSec-Pro study materials which cover all official tests. Now, we have launched some popular NetSec-Pro training prep to meet your demands. And you will find the quality of the NetSec-Pro learning quiz is the first-class and it is very convenient to download it.
