Dynatrace-Associate Latest Exam Preparation | Dynatrace-Associate Test Questions Pdf

No study materials can boost so high efficiency and passing rate like our Dynatrace-Associate exam reference when preparing the test Dynatrace-Associate certification. Our Dynatrace-Associate exam practice questions provide the most reliable exam information resources and the most authorized expert verification. Our test bank includes all the possible questions and answers which may appear in the Real Dynatrace-Associate Exam and the quintessence and summary of the exam papers in the past. You can pass the Dynatrace-Associate exam with our Dynatrace-Associate exam questions.

Dynatrace Associate Certification Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

What is the default retention period for Logs?

- A. 35 days
- B. 10 days
- C. 5 years
- D. 10 years

Answer: A

Explanation:

Dynatrace stores logs with a default retention period of 35 days .

This provides:

- * Sufficient time for analysis
- * Balance between storage and cost

Reference: Based on official Dynatrace University training materials on log management.

NEW QUESTION # 72

A developer wants to know how long it took for their application to load a specific resource request as a part of a button being clicked. What tool would be appropriate to find this information?

- A. User Session Query Language
- B. User action analysis
- C. Waterfall analysis
- D. The "Web" application

Answer: C

Explanation:

Waterfall analysis provides a detailed breakdown of all resource requests triggered by a user action, including timing for each request.

It allows developers to:

- * See exactly how long each resource takes to load
- * Analyze dependencies between requests
- * Identify bottlenecks in frontend performance

This is especially useful for analyzing resource loading triggered by actions such as button clicks.

Other options:

- * Web application view provides overview data
- * User Session Query Language is for querying session data
- * User action analysis provides aggregated insights, not detailed request timing Reference: Based on official Dynatrace University training materials covering Real User Monitoring and waterfall analysis.

NEW QUESTION # 73

What types of notifications can you set up for Security Problems? (Select all that apply)

- A. PagerDuty
- B. Custom Integrations
- C. Jira
- D. ServiceNow
- E. Emails

Answer: A,B,C,D,E

Explanation:

Dynatrace allows configuring problem notifications , including security problems, through multiple integration channels:

- * Email notifications for direct alerts
- * Jira integration for creating and tracking issues
- * ServiceNow integration for IT service management workflows
- * PagerDuty integration for incident response and alerting

* Custom integrations using webhooks or APIs for flexible notification handling These integrations ensure that security problems are communicated effectively across teams and tools, enabling rapid response and resolution.

Reference: Based on official Dynatrace University training materials covering alerting, problem notifications, and integrations.

NEW QUESTION # 74

Which steps outline the Business Event Dataflow? (Select all that apply)

- A. Capture
- B. Process
- C. Analyze
- D. Export

Answer: A,B,C

Explanation:

The Business Event Dataflow in Dynatrace follows a structured pipeline that focuses on collecting, handling, and analyzing business events:

* Capture - Business events are ingested into Dynatrace from various sources such as applications, APIs, or external systems

* Process - The captured data is processed, enriched, and stored within the Dynatrace platform (Grail)

* Analyze - Users query and analyze the processed data using tools like dashboards and DQL Export is not considered a core step in the business event dataflow. While exporting data is possible, it is not part of the primary ingestion-to-analysis pipeline defined in Dynatrace.

Reference: Based on official Dynatrace University training materials covering Business Analytics and Grail data flow.

NEW QUESTION # 75

Which view provides detailed W3C timings of pages and resources?

- A. Waterfall analysis
- B. Dynatrace Extensions v2
- C. Distributed Traces
- D. Session Replay

Answer: A

Explanation:

The Waterfall analysis view provides detailed W3C timing breakdowns for web pages and resources. It visualizes how each resource loads, including DNS lookup, connection time, SSL negotiation, request /response time, and rendering.

This allows users to:

* Identify slow-loading resources

* Analyze frontend performance issues

* Understand page load behavior in detail

Session Replay focuses on visual playback of user sessions.

Distributed Traces focus on backend request flows.

Extensions v2 are unrelated to frontend timing analysis.

Reference: Based on official Dynatrace University training materials covering Real User Monitoring and waterfall analysis.

NEW QUESTION # 76

.....

Up to now, there are three versions of Dynatrace-Associate exam materials for your choice.
