If you can own the JN0-336 certification means that you can do the job well in the area so you can get easy and quick promotion. The latest JN0-336 quiz torrent can directly lead you to the success of your career. Our materials can simulate real operation exam atmosphere and simulate exams. The download and install set no limits for the amount of the computers and the persons who use JN0-336 Test Prep. So we provide the best service for you as you can choose the most suitable learning methods to master the JN0-336 exam torrent. Believe us and buy our JN0-336 exam questions.

God always helps those who help themselves. It is impossible to make great fortune overnight. Enough preparation and efforts are needed when you come across an opportunity. So we suggest that you learn our JN0-336 latest training material, which can help broaden your knowledge. Nowadays, lifelong learning has got wide attention. The much knowledge you learn, the better chance you will have. Our JN0-336 practice material suits you best. You can elevate your ability in a short time. Then you can apply what you have learned on our JN0-336 test engine into practice. We warmly welcome you to purchase our study guide.

JN0-336 Online Lab Simulation | Exam Dumps JN0-336 Zip

The passing rate of our JN0-336 study materials is 99% and the hit rate is also high. Our study materials are selected strictly based on the real JN0-336 exam. Our expert team guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more learning JN0-336 resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q87-Q92):

NEW QUESTION # 87

Your network uses a single JSA host and you want to implement a cluster.
In this scenario, which two statements are correct? (Choose two.)

- A. The secondary host can backup multiple JSA primary hosts.
- B. The cluster virtual IP will need an unused IP address assigned.
- C. The primary and secondary hosts must be configured with the same storage devices.
- D. The software versions on both primary and secondary hosts

Answer: B,D

Explanation:

According to the Juniper Networks JNCIP-SEC Study Guide, when setting up a cluster with a single JSA host, both the primary and secondary hosts must have the same software version installed. Additionally, an unused IP address must be assigned to the cluster virtual IP. The primary and secondary hosts do not need to be configured with the same storage devices, and the secondary host cannot be used to backup multiple JSA primary hosts.

NEW QUESTION # 88

You want to be alerted if the wrong password is used more than three times on a single device within five minutes. Which Juniper Networks solution will accomplish this task?

- A. Juniper Identity Management Service
- B. Adaptive Threat Profiling
- C. Juniper Secure Analytics
- D. Intrusion Prevention System

Answer: C

Explanation:

The Juniper Networks solution that will accomplish the task of alerting if the wrong password is used more than three times on a single device within five minutes is Juniper Secure Analytics (JSA). JSA is a security intelligence platform that collects, analyzes, and correlates network data from various sources, such as firewalls, routers, switches, servers, and applications. JSA can detect and respond to threats, anomalies, and vulnerabilities in real time using rules, offenses, reports, and dashboards. JSA can also integrate with JIMS (Juniper Identity Management Service) to obtain user identity information from Active Directory domains or syslog sources. JSA can use this information to create custom rules that trigger offenses or alerts based on user behavior or activity, such as failed login attempts or password changes.

NEW QUESTION # 89

You want to show tabular data for operational mode commands. In this scenario, which logging parameter will provide this function?

- A. session-init
- B. permit
- C. count
- D. session-close

Answer: C

Explanation:

The logging parameter that will provide the function of showing tabular data for operational mode commands is count. The count parameter displays the number of packets and bytes that match a security policy and the action taken by the policy. The count parameter can be used with the show security policies hit-count command to display the policy counters in a tabular format. The count parameter can also be used with the show security flow session command to display the session counters in a tabular format.

Reference: = show security policies hit-count, show security flow session

NEW QUESTION # 90

What information does encrypted traffic insights (ETI) use to notify SRX Series devices about known malware sites?

- A. MAC addresses
- B. certificates
- C. domain names
- D. dynamic address groups

Answer: C

Explanation:

Encrypted traffic insights (ETI) uses domain names to notify SRX Series devices about known malware sites. ETI is a feature of the SRX Series firewall that can detect and block malware that is hidden in encrypted traffic. It works by analyzing the domain names of the websites that the encrypted traffic is attempting to access. If the domain name matches a known malware site, ETI will send an alert to the SRX Series device, which can then take appropriate action to block the traffic. ETI is a useful tool for protecting against threats that attempt to evade detection by hiding in encrypted traffic.

NEW QUESTION # 91

Click the Exhibit button.

```
APPTRACK_SESSION_CLOSE [{"junos@2636.10.10.10.2.129 reason="TCP-CLIENT_RST"
source-address="192.168.1.254" source-port="48873" destination-
address="172.25.11.254" destination-port="80" service-name="N/A"
application="HTTP" nested-application="UNKNOWN" nat-source-
address="192.168.1.254" nat-source-port="48873" nat-destination-
address="172.25.11.254" nat-destination-port="80" src-nat-rule-name="N/A" dest-
nat-rule-name="N/A" protocol-id="6" policy-name="permit-all" source-zone-
name="trust" destination-zone-name="untrust" session-id-32="32" packet-afcom-
client="5" bytes-from-client="14" packet-from-server="3" bytes-from-
server="646" elapsed-time="0" username="user1" roles="DEPT1" encrypted="No"
routing-instance="default" destination-interface-name="st0.0" category="Web"
sub-category="N/A"}]
```

Which two statements about the log output shown in the exhibit are correct? (Choose two?)

- A. AppTrack is enabled on the untrust zone
- **B. Source NAT is performed**
- C. Traffic destined to the HTTP server is placed in an IPsec tunnel
- **D. AppTrack is enabled on the trust zone:**

Answer: B,D

NEW QUESTION # 92

.....

Generally speaking, preparing for the JN0-336 exam is a very hard and even some suffering process. Because time is limited, sometimes we have to spare time to do other things to review the exam content, which makes the preparation process full of pressure and anxiety. But from the point of view of customers, our JN0-336 Study Materials will not let you suffer from this. As mentioned above, our JN0-336 study materials have been carefully written, each topic is the essence of the content. Only should you spend about 20 - 30 hours to study JN0-336 study materials carefully can you take the exam.
