## **Easily Accessible Microsoft GH-900 PDF**

You must have felt the changes in the labor market. Today's businesses require us to have more skills and require us to do more in the shortest possible time. We are really burdened with too much pressure. GH-900 simulating exam may give us some help. With our GH-900 Study Materials, we can get the GH-900 certificate in the shortest possible time. And our pass rate is high as 98% to 100% which is unbeatable in the market.

## **Microsoft GH-900 Exam Syllabus Topics:**

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Benefits of the GitHub Community:</b> This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Introduction to Git and GitHub:</b> This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Privacy, Security, and Administration:</b> This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Project Management:</b> This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.</li> </ul>

## Microsoft GitHub Foundations Sample Questions (Q24-Q29):

### NEW QUESTION # 24

Which of the following are included as pre-defined repository roles? (Choose three.)

- A. Delete
- **B. Maintain**
- **C. Write**
- **D. Triage**
- E. Security
- F. View

**Answer: B,C,D**

Explanation:

GitHub provides several pre-defined repository roles that determine the level of access and permissions a user has within a repository. The roles that are included by default are:

Triage: Allows users to manage issues and pull requests without write access to the code.

Maintain: Provides more extensive access, including managing settings, but without full administrative control.

Write: Grants permission to push changes and manage issues and pull requests.

Roles like "Security" and "Delete" are not standard pre-defined roles, and "View" is generally referred to as "Read" in GitHub's permission structure.

### NEW QUESTION # 25

What is GitHub?

- A. A platform that focuses on facilitating the growth and sharing of code, specifically designed for new developers to hone their skills
- B. A centralized version control system designed for nurturing a community of developers and providing access to open source projects
- C. A proprietary software platform for nurturing creativity in developers and building a technology community
- **D. A cloud-based hosting service for version control and collaboration, focused on creating a safe and collaborative**

environment for developers

**Answer: D**

Explanation:

GitHub is a cloud-based platform that provides hosting for software development and version control using Git. It offers tools for collaboration, project management, and security to create a safe and productive environment for developers.

GitHub Overview:

Option B is correct because GitHub is primarily known as a cloud-based hosting service for Git repositories, offering a collaborative environment where developers can work together on projects, manage version control, and implement security practices.

### NEW QUESTION # 26

From the Organization settings, which restrictions can organization owners place on GitHub Actions usage? (Each answer presents a complete solution. Choose three.)

- A. Allow actions that use self-hosted runners.
- B. Allow an action to be run from a Codespace.
- C. Allow actions created by GitHub.
- D. Allow actions by Marketplace verified creators.
- E. Allow specified actions.

**Answer: A,D,E**

Explanation:

Organization owners on GitHub have control over how GitHub Actions can be used within their organization. They can enforce restrictions to ensure security and compliance with organizational policies.

Allow Actions That Use Self-Hosted Runners:

Option A is correct because organization owners can configure the usage of self-hosted runners, allowing greater control over the environment where actions are run.

Allow Specified Actions:

Option C is correct because organization owners can allow only specific actions to run, adding a layer of security by limiting actions to those that have been vetted.

Allow Actions by Marketplace Verified Creators:

Option D is correct because organization owners can choose to allow actions created by GitHub Marketplace verified creators, ensuring that only trusted actions are used.

Incorrect Options:

Option B is incorrect because GitHub Actions are not designed to be run directly from a Codespace; Codespaces are for development environments.

Option E is a valid choice, but since the prompt asks for only three answers, it is not included in this response.

### NEW QUESTION # 27

What should a user follow to see public activity on their personal dashboard? (Each answer presents a complete solution. Choose two.)

- A. stars
- B. teams
- C. enterprises
- D. people
- E. organizations

**Answer: D,E**

### NEW QUESTION # 28

What are the key areas of focus for GitHub?

(Each answer presents a complete solution. Choose three.)

- A. Nurturing a community that supports open source principles
- B. Hosting video calls with other developers
- C. Building a technology platform for secure code sharing and collaboration
- D. Providing access and opportunities for developers
- E. Providing a social media platform for project managers

**Answer: A,C,D**

Explanation:

GitHub focuses on several key areas that align with its mission to support developers and foster collaboration:

\* Nurturing a Community That Supports Open Source Principles:

\* Option A is correct. GitHub is a major advocate for open-source software development, providing tools and platforms that enable open collaboration. GitHub hosts millions of open-source projects and supports a community-driven approach to software development.

\* Providing Access and Opportunities for Developers:

\* Option B is correct. GitHub provides a wide range of resources, such as GitHub Education, GitHub Actions, and GitHub Marketplace, to empower developers. These tools and opportunities help developers of all levels to learn, contribute, and improve their skills.

\* Building a Technology Platform for Secure Code Sharing and Collaboration:

\* Option D is correct. GitHub's core function is to provide a platform where developers can securely share code and collaborate. Features like private repositories, branch protections, and GitHub Actions for CI/CD (Continuous Integration/Continuous Deployment) workflows highlight this focus.

\* Incorrect Options:

\* Option C is incorrect because GitHub is not a social media platform for project managers; it is a code hosting platform with social features primarily aimed at developers.

\* Option E is incorrect because GitHub does not focus on hosting video calls. While some integrations might allow for video conferencing, it is not a core focus of GitHub.
