今日の社会では、能力を高めるために証明書を取得することを優先する人がますます増えています。まったく新しい観点から、C_SEC_2405学習資料は、C_SEC_2405認定の取得を目指すほとんどのオフィスワーカーに役立つように設計されています。当社のC_SEC_2405テストガイドは、現代の人材開発に歩調を合わせ、すべての学習者を社会のニーズに適合させます。C_SEC_2405の最新の質問が、関連する知識の蓄積と能力強化のための最初の選択肢になることは間違いありません。

SAP C_SEC_2405 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
トピック 2	Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
トピック 3	User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.

トピック 4	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
トピック 5	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

SAP C_SEC_2405試験を難しく感じる人に「やってもいないのに、できないと言わないこと」を言いたいです。我々CertJukenへのSAP C_SEC_2405試験問題集は専門化のチームが長時間で過去のデータから分析研究された成果で、あなたを試験に迅速的に合格できるのを助けます。依然躊躇うなら、弊社の無料のSAP

C_SEC_2405デモを参考しましょう。そうしたら、SAP C_SEC_2405試験はそんなに簡単なことだと知られます。

SAP Certified Associate - Security Administrator 認定 C_SEC_2405 試験問題 (Q30-Q35):

質問 # 30

Which user type in SAP S/4HANA Cloud Public Edition is used for API access, system integration, and scenarios where automated data exchange is required?

- A. SAP Technical User
- B. SAP Support User
- **C. SAP Communication User**
- D. SAP Administrative User

正解: C

解説:

In SAP S/4HANA Cloud Public Edition, the SAP Communication User type is used for:

- * API Access:
- * Facilitates secure communication between SAP systems and external applications.
- * System Integration:
- * Used in scenarios requiring automated data exchange, such as integrations with middleware or third-party systems.

SAP Security References:

- * SAP Help Portal: Communication User Setup and Use Cases
- * SAP API Management Documentation

質問 # 31

Your developer has created a new custom transaction for your SAP S/4HANA on-premise system and has provided you a list of the authorizations needed to execute the new ABAP program. What must you do to ensure that each required authorization is automatically created every time this new custom transaction is added to a PFCG role?

- **A. Maintain each authorization object in transaction SU24 and set the Default Status to "Yes".**
- B. Maintain each authorization object in transaction SU22 and set the Default Status to "Yes".
- C. Maintain each authorization in transaction SU22 and set the Check Indicator value to "Check".
- D. Maintain each authorization in transaction SU24 and set the Default Status to "Yes".

正解: A

質問 # 32

After you maintained authorization object S_TABU_DIS and ACTVT field value 02 as authorization defaults for transaction SM30 in your development system, what would be the correct option for transporting only these changes to your quality assurance system?

- A. Save tables USOBT_C and USOBX_C to a transport request and transport using the Transport Management System
- B. Save your changes to a Customizing transport request and transport using the Transport Management System
- C. Save your changes and use the transport interface in SU25 to transport the changes using the Transport Management System
- D. Save your changes to a Workbench transport request and transport using the Transport Management System

正解: D

解説:

When you maintain authorization defaults (e.g., adding authorization object S_TABU_DIS with ACTVT value 02 for transaction SM30) and need to transport these changes:

- * Changes are Cross-Client and Repository-Based:
- * Authorization default changes in SU24 are considered cross-client because they affect all clients in the system
- * These changes are part of the SAP repository and are treated as Workbench requests.
- * Save Changes to a Workbench Transport Request:
- * Upon saving changes in SU24, the system prompts you to assign them to a transport request.
- * Select or create a Workbench transport request to capture the changes.
- * Use the Transport Management System (TMS):
- * Use TMS to transport the Workbench request from the development system to the quality assurance system.
- * This ensures that the authorization defaults are consistently applied across systems.

Why Other Options Are Incorrect:

- * Option B: Customizing transport requests are client-specific and not suitable for cross-client repository changes.
- * Option C: Manually transporting tables USOBT_C and USOBX_C is not recommended and can lead to inconsistencies.
- * Option D: SU25 is used for post-upgrade authorization adjustments, not for transporting SU24 changes.

SAP Security References:

- * SAP Help Portal: Transporting Authorization Data Changes
- * SAP Documentation: Using Workbench Requests for Cross-Client Objects
- * SAP Note: Best Practices for Transporting SU24 Authorization Defaults

質問 # 33

What do you configure the Social Media deny providers?

- A. In the administration console for SAP Cloud identity Services
- B. In the SAP BTP Cockpit Account Explorer
- C. In the code editor of the SAP Business Application Studio

正解: A

解説:

The administration console for SAP Cloud Identity Services is where configurations related to social media providers can be managed. This includes setting up deny lists to restrict access or usage by specific social media platforms.

SAP Security References:

- * SAP Help Portal: Social Media Integration Guide
- * SAP Cloud Identity Services Administration Documentation

質問 # 34

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to this question.

- A. User
- B. Employee
- C. Administrator
- D. Employer

正解： A、 B

解説:

In the S/4HANA Business User Concept, Business Partners share data with the following entities:

* User (C):

* Business users in S/4HANA are often linked to Business Partners to ensure seamless integration of data across HR and transactional modules.

* Employee (D):

* Employees are managed as Business Partners in S/4HANA, enabling integration with HR, organizational structures, and other master data.

Why Others Are Incorrect:

* Employer (A):Represents an organizational entity, not directly linked to Business Partners.

* Administrator (B):Refers to system roles, not master data entities like Business Partners.

SAP Security References:

* SAP Help Portal: Business Partner Integration in S/4HANA

* SAP Note: Business Partner Concept and User Synchronization
