Fortinet - FCP_FAZ_AD-7.4 - FCP - FortiAnalyzer 7.4 Administrator–High-quality Practice Questions
High salary is everyone's dream. You salary is always based on your career competitive. In IT filed qualification is important. Our FCP_FAZ_AD-7.4 questions and answers will help you hold opportunities and face difficulties bravely, then make a great achievement. Passing tests and get a certification is certainly a valid method that proves your competitions. FCP_FAZ_AD-7.4 Questions and answers is surely helpful study guide for candidates all over the world.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.
Topic 2	• Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.

Topic 3	• Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
Topic 4	• Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.

Free FCP_FAZ_AD-7.4 Learning Cram - Best FCP_FAZ_AD-7.4 Vce

As for the points you may elapse or being frequently tested in the real exam, we give referent information, then involved them into our FCP_FAZ_AD-7.4 actual exam. Our experts expertise about FCP_FAZ_AD-7.4 training materials is unquestionable considering their long-time research and compile. I believe that no one can know the FCP_FAZ_AD-7.4 Exam Questions better than them. And they always keep a close eye on the changes of the content and displays of the FCP_FAZ_AD-7.4 study guide.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q55-Q60):

NEW QUESTION # 55
What is the best approach to handle a hard disk failure on a FortiAnalyzer that supports hardware RAID?

- A. There is no need to do anything because the disk will self-recover.
- B. Perform a hot swap of the disk.
- C. Run execute format disk to format and restart the FortiAnalyzer device.
- D. Shul down FortiAnalyzer and replace the disk.

Answer: B

Explanation:
In systems that support hardware RAID, hot swapping allows for the replacement of a failed disk without shutting down the system. This capability is crucial for maintaining uptime and ensuring data redundancy and availability, especially in critical environments. The RAID controller rebuilds the data on the new disk using redundancy data from the other disks in the array, ensuring no data loss and minimal impact on system performance.
In the context of a FortiAnalyzer unit equipped with hardware RAID support, the optimal approach to addressing a hard disk failure is to perform a hot swap of the disk. Hardware RAID configurations are designed to provide redundancy and fault tolerance, allowing for the replacement of a failed disk without the need to shut down the system. Hot swapping enables the administrator to replace the faulty disk with a new one while the system is still running, and the RAID controller will rebuild the data on the new disk, restoring the RAID array to its fully operational state.

NEW QUESTION # 56
Which statement is true when you are upgrading the firmware on an HA cluster made up of two FortiAnalyzer devices?

- A. You can enable uninterruptible-upgrade so that the normal FortiAnalyzer operations are not interrupted while the cluster firmware upgrades.
- B. Both FortiAnalyzer devices will be upgraded at the same time.
- C. First, upgrade the secondary device, and then upgrade the primary device.
- D. You can perform the firmware upgrade using only a console connection.

Answer: C

Explanation:

FortiAnalyzer_7.0_Study_Guide-Online.pdf page 64: To upgrade FortiAnalyzer HA cluster firmware:
1. Log in to each secondary device.
2. Upgrade the firmware of all secondary devices.
3. Wait for the upgrades to complete and verify that all secondary devices joined the cluster.
4. Verify that logs on all secondary devices are synchronized with the primary device.
5. Upgrade the primary device.

NEW QUESTION # 57
Which two parameters impact the amount of reserved disk space required by FortiAnalyzer? (Choose two.)

- A. License type
- B. Disk size
- C. Total quota
- D. RAID level

Answer: D

Explanation:
RAID level affects how much disk space is reserved for redundancy and fault tolerance. For example, RAID 1 mirrors data, meaning you need more space for redundancy, while RAID 5 or RAID 6 reserves space for parity.
Disk size directly influences the total available and reserved space since the larger the disk, the more space may need to be reserved for system functions, logs, and other operations.
The total quota and license type do not directly impact the reserved disk space, though they do influence other aspects of capacity and functionality.

NEW QUESTION # 58
What are analytics logs on FortiAnalyzer?

- A. Log type Traffic logs.
- B. Logs that roll over when the log file reaches a specific size.
- C. Raw logs that are compressed and saved to a log file.
- D. Logs that are indexed and stored in the SQL.

Answer: D

NEW QUESTION # 59
You finished registering a FortiGate device. After traffic starts to flow through FortiGate. you notice that only some of the logs expected are being received on FortiAnalyzer.
What could be the reason for the logs not arriving on FortiAnalyzer?

- A. FortiGate does not have logging configured correctly.
- B. FortiGate was added to the wrong ADOM type.
- C. This FortiGate model is not fully supported.
- D. This FortiGate is part of an HA cluster but it is the secondary device.

Answer: A

Explanation:
This FortiGate is part of an HA (High Availability) cluster, but it is a secondary device. In an HA configuration, typically only the primary device is responsible for sending logs to FortiAnalyzer, while the secondary device may not send logs unless the primary device fails.

NEW QUESTION # 60
......

One of the advantages of the FCP_FAZ_AD-7.4 training test is that we are able to provide users with free pre-sale experience, the FCP_FAZ_AD-7.4 study materials pages provide sample questions module, is mainly to let customers know our part of the subject, before buying it, users further use our FCP_FAZ_AD-7.4 Exam Prep. At the same time, it is more convenient that the sample users we provide can be downloaded PDF demo for free, so the pre-sale experience is unique. So that you will know how efficiency our FCP_FAZ_AD-7.4 learning materials are and determine to choose without any doubt.
