## Salesforce Certified Administrator Sample Questions (Q212-Q217):

### NEW QUESTION # 212

The Client services and customer support teams share the same profile but have different permission sets. The Custom Object Retention related list needs to be restricted to the client services team on the Lightning record page layout.

What should the administrator use to fulfil this request?

- A. Sharing settings
- **B. Component Visibility**
- C. Page Layout Assignment
- D. Record Type Assignment

**Answer: B**

#### NEW QUESTION # 213

Universal Containers requires a different Lightning page to be displayed when Accounts are viewed in the Sales Console and in the Service Console.

How should an administrator meet this requirement?

- A. Create different user profiles.
- B. Define multiple record types.
- **C. Assign Lightning pages as app default.**
- D. Update page layout assignments.

**Answer: C**

Explanation:

Explanation

Lightning pages are custom layouts that let you design pages for your Salesforce org using Lightning App Builder. You can assign different Lightning pages for different apps, record types, and profiles using Lightning page assignments. To meet the requirement of displaying different Lightning pages for Accounts in Sales Console and Service Console, you need to assign Lightning pages as app default for each app.

#### NEW QUESTION # 214

Cloud Kicks intends to protect with backups by using the data by using the data export Service.

Which two considerations should the administrator remember when scheduling the export?

Choose 2 Answers.

- A. Data export service should be run from a sandbox.
- B. Metadata backups must be run via a separate process.
- **C. Data Backups are limited to weekly or monthly intervals.**
- **D. Metadata Backups are limited a sandbox refresh intervals.**

**Answer: C,D**

#### NEW QUESTION # 215

An administrator is planning to use Data Loader to mass import new records to a custom object from a new API.

What will the administrator need to do to use the Data Loader?

- **A. Append their security token at the end of their password to login.**
- B. Use the Data Import Tool to mass import custom object records.
- C. Reset their password and their security token.
- D. Add a permission set that allows them to import data.

**Answer: A**

Explanation:

Explanation

To use Data Loader to mass import new records to a custom object from a new API, the administrator will need to append their security token at the end of their password to login. The security token is an alphanumeric code that is required for API access when logging in from an IP address that is not trusted by Salesforce. The security token can be obtained from the user's personal settings

or by resetting it via email. Adding a permission set, resetting the password and the security token, or using the Data Import Tool are not necessary for using Data Loader. ### NEW QUESTION # 216

Which three aspects of standard fields should an administrator customize?

Choose 3 answers

- A. Field name
- B. Decimal Places
- C. Field history tracking
- D. Help Text
- E. Picklist Values

**Answer: B,D,E**

Explanation:

Explanation

Picklist values, help text, and decimal places are three aspects of standard fields that an administrator can customize to suit their business needs. Picklist values are the options that users can choose from a picklist field; they can be added, edited, or deleted by administrators. Help text is the text that appears when users hover over a field; it can be customized by administrators to provide additional information or guidance for users. Decimal places are the number of digits that appear after the decimal point in a number or currency field; they can be changed by administrators to adjust the precision of the field values. Field history tracking and field name are not aspects of standard fields that can be customized; they are only available for custom fields. References:
