

Pass Guaranteed Quiz Palo Alto Networks - NetSec-Pro - Palo Alto Networks Network Security Professional Newest Latest Study Questions

BTW, DOWNLOAD part of Prep4sureExam NetSec-Pro dumps from Cloud Storage: <https://drive.google.com/open?id=16JvS6bzOCORCIIIXn21r21MA-nMp8Yre>

The Palo Alto Networks NetSec-Pro dumps pdf formats are specially created for candidates having less time and a vast syllabus to cover. It has various crucial features that you will find necessary for your Palo Alto Networks Network Security Professional (NetSec-Pro) exam preparation. Each NetSec-Pro practice test questions format supports a different kind of study tempo and you will find each NetSec-Pro exam dumps format useful in various ways.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 2	<ul style="list-style-type: none"> Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 3	<ul style="list-style-type: none"> NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.

Topic 4	<ul style="list-style-type: none"> • Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

NetSec-Pro practice tests

For your benefit, Prep4sureExam is putting forth you to attempt the free demo and Palo Alto Networks NetSec-Pro Exam Dumps the best quality highlights of the item, Because nobody gives this facility only the Prep4sureExam provide this facility. There is no reason to waste your time on a test, Please hurry up and get our NetSec-Pro exam dumps which are high-quality and accurate, The advent of our NetSec-Pro Exam Questions with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Prep4sureExam release the best exam preparation materials to help you exam at the first attempt, Our training materials include NetSec-Pro PDF with practice modules, including Palo Alto Networks Azure as well.

Palo Alto Networks Network Security Professional Sample Questions (Q54-Q59):

NEW QUESTION # 54

In a distributed enterprise implementing Prisma SD-WAN, which configuration element should be implemented first to ensure optimal traffic flow between remote sites and headquarters?

- A. Enable split tunneling for all branch locations.
- B. Configure static routes between all the branch offices.
- C. Implement dynamic path selection using real-time performance metrics.
- D. Deploy redundant ION devices at each location.

Answer: C

Explanation:

Dynamic path selection is the foundation of SD-WAN, leveraging real-time performance data to dynamically route traffic over the best available path.

"Dynamic path selection continuously monitors performance metrics (loss, latency, jitter) and makes real-time routing decisions to ensure application SLAs are met across the WAN." (Source: Prisma SD-WAN Dynamic Path Selection) Establishing dynamic path selection first ensures the rest of the SD-WAN optimizations (e.g., failover, QoS) work effectively.

NEW QUESTION # 55

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. SNMP
- B. CSV export
- C. Custom
- D. PDF summary

Answer: C,D

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs.

Custom Reports

"Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility.

They are generated within Panorama and can include data on newly categorized AI URL types." (Source: Panorama Reports) PDF

Summaries

"You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review." (Source: Export Reports as PDF) Together, these options provide a consistent, standardized method to push insights about AI-based URL categories to branch devices.

NEW QUESTION # 56

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- **A. Strata Cloud Manager (SCM)**
- B. Service connection firewall
- **C. Strata Logging Service**
- D. Prisma Cloud dashboard

Answer: A,C

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 57

Which functionality does an NGFW use to determine whether new session setups are legitimate or illegitimate?

- **A. SYN cookies**
- B. SYN flood protection
- C. SYN bit
- D. Random Early Detection (RED)

Answer: A

Explanation:

To prevent SYN flood attacks, the NGFW uses SYN cookies to validate legitimate session establishment.

SYN cookies allow the firewall to verify the legitimacy of new session requests without allocating resources until the handshake is completed. This prevents SYN flood attacks from exhausting system resources.

SYN cookies mitigate resource exhaustion by ensuring only legitimate connections are established.

NEW QUESTION # 58

During a security incident investigation, which Security profile will have logs of attempted confidential data exfiltration?

- A. Vulnerability Protection Profile
- B. WildFire Analysis Profile
- **C. Enterprise DLP Profile**
- D. File Blocking Profile

Answer: C

Explanation:

Enterprise DLP Profile is specifically designed to detect and log data exfiltration attempts, including those involving confidential or sensitive data.

Enterprise DLP logs capture incidents involving potential data exfiltration. They help identify sensitive data transfers, even in seemingly legitimate traffic.

File Blocking and Vulnerability Protection handle files or exploit detection, while WildFire focuses on malware analysis--not direct data exfiltration.

NEW QUESTION # 59

.....

These practice tools are developed by professionals who work in fields impacting Palo Alto Networks certification, giving them a foundation of knowledge and actual competence. Our Palo Alto Networks NetSec-Pro Exam Questions are created and curated by industry specialists. Prep4sureExam Is Here To Provide Top-Notch Palo Alto Networks NetSec-Pro Exam Questions
