

높은 통과율 JN0-253 퍼펙트 인증 공부자료 시험패스의 강력한 무기

EMC DEP-3CR1 PowerProtect Cyber Recovery Exam 3

질문 # 26
An enterprise customer needs a Cyber Recovery solution to be implemented. As an outcome from a previous workshop, the following backup environment needs to be protected to the CR Vault.
Location 1: 4 PowerProtect DDs
Location 2: 4 PowerProtect DDs
Location 3: 2 PowerProtect DDs
Location 4: 2 PowerProtect DDs
The customer wants to implement a CR Vault in a 5th location.
How many Cyber Recovery systems must be installed at a minimum level?

- A. 0
- B. 1
- C. 2
- D. 3

정답 B

질문 # 27
What vault status is displayed if none of the PowerProtect DD systems in the CR Vault are able to communicate with the Cyber Recovery software?

- A. Unknown
- B. Unlocked
- C. Locked
- D. Degraded

정답 B

질문 # 28

DEP-3CR1 시험대비덤프최신자료 & DEP-3CR1 높은 통과율 시험대비덤프공부

BONUS!!! Itcertkr JN0-253 시험 문제집 전체 버전을 무료로 다운로드하세요: <https://drive.google.com/open?id=12rU8-T4xNqWvHBCZg6JlrcKouQicSYp0>

현재 경쟁율이 심한 IT시대에, Juniper JN0-253 자격증 취득만으로 이 경쟁이 심한 사회에서 자신만의 위치를 보장할 수 있고 더욱이는 한층업된 삶을 누릴 수 있을 수도 있습니다. 우리 Itcertkr 에서 여러분은 Juniper JN0-253 관련 학습지 도서를 얻을 수 있습니다. 우리 Itcertkr 는 IT업계엘리트 한 강사들이 퍼펙트한 Juniper JN0-253 문제집을 만들어서 제공 합니다. 우리가 제공하는 Juniper JN0-253 문제와 답으로 여러분은 한번에 성공적으로 시험을 패스 하실 수 있습니다. 중요한것 저희 문제집을 선택함으로 여러분의 시간도 절약해드리고 무엇보다도 많은 근심없이 심플하게 시험을 패스하여 좋다는 점입니다.

Juniper JN0-253 시험요강:

주제	소개
주제 1	Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.

주제 2	Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
주제 3	Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
주제 4	Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

적중율 높은 JN0-253퍼펙트 인증공부자료 인증시험덤프

다른 사이트에서도 Juniper JN0-253인증시험관련 자료를 보셨다고 믿습니다. 하지만 우리 Itcertkr의 자료는 차원이 다른 완벽한 자료입니다. 100%통과 율은 물론 Itcertkr을 선택으로 여러분의 직장생활에 더 나은 개편을 가져다 드리며, 또한 Itcertkr을 선택으로 여러분은 이미 충분한 시험준비를 하였습니다. 우리는 여러분이 한번에 통과하게 도와 주고 또 일년무료 업데이트서비스도 드립니다.

최신 JNCIA-MistAI JN0-253 무료샘플문제 (Q87-Q92):

질문 # 87

Which two statements are true about Juniper Mist Wireless Assurance Radio Resource Management (RRM)? (Choose two.)

- A. RRM builds the channel plan based on the physical distance between the APs.
- B. RRM builds the channel plan based on a real-time assessment of the network.
- C. RRM tuning happens automatically.
- D. RRM tuning is a manual process that you must initiate every day.

정답: B,C

설명:

Real-time Assessment: Juniper Mist's Radio Resource Management (RRM) builds the channel plan based on real-time network assessments. It dynamically adjusts to changing conditions in the RF environment, ensuring optimal performance by continuously monitoring factors such as interference, client distribution, and usage patterns. Automatic Tuning: RRM tuning happens automatically. Mist AI leverages reinforcement learning to continually optimize RF settings without manual intervention, adjusting channels, power levels, and other parameters in real-time to maintain optimal network performance.

질문 # 88

Using the Mist UI, where do you look for high priority end-user issues on the network?

- A. Marvis Actions
- B. Premium Analytics
- C. Occupancy Analytics
- D. Network Analytics

정답: A

질문 # 89

Exhibit:

Referring to the exhibit, which two statements are correct about this client event? (Choose two.)

- A. A traceroute file is included.
- B. A dynamic packet capture file is included.

- C. It is a wireless client.
- D. It is a wired client.

정답: B,C

설명:

In the Juniper Mist Cloud, the Client Events section within the Monitoring interface displays detailed event logs for both wired and wireless clients, providing insights into connectivity, authentication, and performance-related activities. Each event entry may include associated diagnostic files such as dynamic packet captures (DPCs), traceroute data, and syslogs depending on the event type and device context.

According to the Juniper Mist AI Operations and Client Event Diagnostics Guide, the platform states:

"Wireless client events provide correlation between client connection attempts and associated diagnostic artifacts such as dynamic packet captures. These files are generated automatically during troubleshooting events and are attached to the event log for administrator review." From the exhibit, the client is shown as a wireless device, indicated by the Wi-Fi icon and the SSID association information visible in the event details. Additionally, the entry confirms that a dynamic packet capture (DPC) file was automatically generated for the event, allowing engineers to download and inspect packet-level activity for root-cause analysis.

Therefore:

* B (It is a wireless client) is correct - the event pertains to a Wi-Fi-connected device.

* C (A dynamic packet capture file is included) is correct - the log includes a downloadable DPC file.

질문 # 90

Which two Juniper devices are used in Juniper Mist WAN Assurance? (Choose two.)

- A. Session Smart Routers
- B. SRX Series Firewalls
- C. EX Series Switches
- D. QFX Series Switches

정답: A,B

설명:

Juniper Mist WAN Assurance is a cloud-based service that extends Mist AI capabilities to the WAN edge, providing visibility, automation, and AI-driven analytics for WAN devices. It focuses on ensuring end-to-end service assurance for users and applications across distributed networks.

According to the Juniper Mist WAN Assurance and SD-WAN Deployment Guide, the supported devices include:

"Juniper SRX Series Firewalls and Session Smart Routers (SSR) are integrated with Mist WAN Assurance for telemetry collection, service-level monitoring, and AI-driven troubleshooting."

* SRX Series Firewalls (A): Provide secure WAN connectivity and send real-time telemetry (including throughput, latency, and packet loss metrics) to Mist Cloud.

* Session Smart Routers (C): Power the AI-driven SD-WAN solution with application-aware routing and session intelligence, fully integrated into Mist Cloud for advanced visibility and analytics.

EX and QFX switches are used with Wired Assurance, not WAN Assurance.

Therefore, the correct answers are A. SRX Series Firewalls and C. Session Smart Routers.

질문 # 91

Which parameter is beyond the scope of the Connectivity category when troubleshooting with Marvis Actions?

- A. DNS failure
- B. authentication failure
- C. DHCP failure
- D. duplex mismatch

정답: D

설명:
