## Accurate Media-Cloud-Consultant Prep Material | Latest Media-Cloud-Consultant Exam Registration

Our website experts simplify complex concepts of the Media-Cloud-Consultant exam questions and add examples, simulations, and diagrams to explain anything that might be difficult to understand. Therefore, even ordinary examiners can master all the Media-Cloud-Consultant learning materials without difficulty. And the price of our Media-Cloud-Consultant Study Guide is reasonable for even the students can afford it. At the same time, we give some discounts from time to time, you can buy our Media-Cloud-Consultant practice engine at a favorable price.

### Salesforce Media Cloud Consultant Exam Sample Questions (Q40-Q45):

#### NEW QUESTION # 40

A home store wants to advertise their products on a particular tv channel owned by a publishing company. Which channel should this media plan include?

- A. Linear
- B. Digital
- C. OutofHome (OOH)
- D. Print

**Answer: A**

Explanation:

For a home store wanting to advertise their products on a TV channel owned by a publishing company, the media plan should include the "Linear" channel (B). Linear advertising refers to traditional TV commercials broadcasted across scheduled programming. This is the most appropriate channel for TV-based advertising, as opposed to Out of Home (OOH), which relates to billboards and public displays, Print, which involves newspapers and magazines, and Digital, which encompasses online and social media platforms. #### NEW QUESTION # 41

A home store wants to advertise their products on a video streaming service hosted by a publishing company. How can a consultant ensure that this advertisement is visible to subscribers residing in the united states only?

- A. create the media plan under the account with shipping address as united states
- B. select united states in the media campaign country
- C. select united states in geo targeting within configure placements
- D. select the operating system targeting as united states

**Answer: C**

Explanation:

To ensure that advertisements are visible only to subscribers residing in the United States on a video streaming service, a consultant should use geo-targeting options within the advertisement configurations. By selecting the United States in geo-targeting within the configure placements setting (D), the consultant can specify that the ad should only be shown to users whose IP addresses indicate they are in the United States. This approach effectively filters the audience based on geographic location, ensuring that the ad reaches the intended demographic. References:

#### NEW QUESTION # 42

A media firm would like to update campaign level details to compare schedule versus actual delivery on a daily basis. Which approach should a consultant take in this scenario?

- A. get the schedule versus actuals using a revenue schedule tool or downstream batch integration
- B. Use an offline, static report to get the schedule versus actual details
- C. get the schedule versus actuals using downstream real-time integration

- D. implement a listener integration to the downstream billing system for real-time schedule versus actual details

**Answer: A**

Explanation:

For a media firm looking to update campaign-level details to compare scheduled versus actual delivery on a daily basis, utilizing a revenue schedule tool or implementing a downstream batch integration would be the most efficient approach. This method allows for the aggregation of data at specified intervals, ensuring that the comparison reflects the most accurate and up-to-date information. Batch integration processes can be scheduled to run daily, providing the firm with a consistent and reliable method of tracking performance against expectations. #### NEW QUESTION # 43

A b2b advertising publishing company is exploring salesforce to manage its advertising sales business. They require an ad ops persona to be created. Which two managed permission sets should a consultant add to the ad ops persona?

- A. MediaCloudRuntime
- B. OmniStudioAdmin
- C. Media Cloud Base User
- D. OmniStudioUser

**Answer: A,C**

Explanation:

For creating an Ad Ops persona in a B2B advertising publishing company exploring Salesforce to manage its advertising sales business, the two managed permission sets to add are:

MediaCloudRuntime: This permission set provides the necessary runtime access within Media Cloud, enabling Ad Ops personnel to execute and manage operational tasks related to advertising sales.

Media Cloud Base User: This foundational permission set grants access to basic Media Cloud functionalities, allowing Ad Ops personnel to access and interact with the core features of the Advertising Sales Management application.

These permission sets equip the Ad Ops persona with the appropriate level of access and functionality required to perform their role effectively within the Salesforce Media Cloud environment.

#### NEW QUESTION # 44

What happens when a required placement is unavailable in the ad server during the check availability process with google Ad manager?]

- A. a yellow check mark appears if partial quantity is available and red if none is available
- B. a red check mark appears in the availability column
- C. the check availability action updates the quantity to the available quantity
- D. the check availability action returns the available quantity for manual adjustment

**Answer: A**

Explanation:

During the check availability process with Google Ad Manager, if a required placement is unavailable, a yellow check mark appears if partial quantity is available, and a red check mark if none is available (C). This visual indicator helps users quickly understand the availability status of placements and make informed decisions about adjusting campaign plans or exploring alternative options. References:
