Exam4Docs AD0-E117 study material also has a timekeeping function that allows you to be cautious and keep your own speed while you are practicing, so as to avoid the situation that you can't finish all the questions during the exam. With Adobe Experience Manager Architect Master AD0-E117 Learning Materials, you only need to spend half your money to get several times better service than others.

Adobe Experience Manager (AEM) is a content management system that enables businesses to create and manage their digital content across multiple platforms. It is a powerful tool that helps companies to deliver personalized, engaging experiences to their customers. The Adobe AD0-E117 exam is designed for individuals who want to become certified AEM architects. AD0-E117 exam validates the candidate's knowledge and skills required to design, architect, and deploy AEM solutions.

Adobe AD0-E117 Certification Exam is an excellent way for professionals to showcase their expertise in AEM architecture. Adobe Experience Manager Architect Master certification is highly valued by employers and can open up new career opportunities for professionals. It is also a great way for professionals to stay up-to-date with the latest developments in AEM and enhance their skills.

It is offline software that enables users to go through the Selling Adobe Experience Manager Architect Master (AD0-E117) practice exam without having any internet connection. Windows computers support the desktop Adobe Experience Manager Architect Master (AD0-E117) practice exam software.

Adobe Experience Manager Architect Master Sample Questions (Q11-Q16):

NEW QUESTION # 11

A new AEM Sites implementation includes a component that lists the 10 most recently published PDF documents in AEM Assets. The component works as expected during development and passes QA testing. The business starts to use it while entering content and uploading assets in preparation for go-live. A few days later, the component's PDF list is empty. What is the most likely cause of the issue?

- A. A PDF with incorrect MIME type has been uploaded.
- B. A PDF with too large file size has been uploaded.
- C. The component is missing the HTL display context to escape the PDF title.
- **D. The component is missing a matching Oak index.**

Answer: D

Explanation:

"the component is missing a matching Oak index that can efficiently query the PDF documents by their last modified date".

NEW QUESTION # 12

A website built on AEM Sites displays the company's stock price in the footer of all pages. The stock data is retrieved from a third party REST service using two-way SSL and rendered in an AEM component using HTL. During performance testing in the last development sprint it becomes apparent that the third party service sometimes takes up to 30 seconds to respond, which degrades the overall site performance. How should an Architect address this issue?

- **A. Load the stock data component asynchronously**
- B. Add a 5 second timeout to the REST call
- C. Temporarily remove the component from all content
- D. Call the REST service directly from the browser

Answer: A

NEW QUESTION # 13

On the release day, an AEM code deployment is done on AEM 6.5 on-prem. After the deployment was completed, the users were able to get into the Author instance with no issues. However, users are unable to access any of the sites on public domains. The users are seeing a "502 Bad Gateway" error. What would be the potential cause of this issue?

- A. Because there was a deploy and cache was cleared, there is an increased load on the AEM Publish Instances.
- B. The replication agents are stuck which is causing load on the publish instances.
- **C. The new dispatcher configurations are not pointing at the correct publish instances.**
- D. Not all the OSGi bundles restarted after the code deploy causing the publishing instances not to be responsive.

Answer: C

NEW QUESTION # 14

Refer to the exhibit.

A customer with an existing AEM implementation wants to enrich product pages with technical data coming from their PIM system. The PIM system sits behind an API Management solution that publicly exposes the PIM API's as RESTful web services with basic authentication as the security mechanism. Data consistency with the PIM and secure access to the APIs are key elements of the integration. How should the Architect set up the integration between AEM and the PIM?

- **A. Integrate the AEM Publishers directly with the API Management solution**
- B. Use a client-side integration with AJAX from the browser to the API Management
- C. Import the technical data into the AEM Author and replicate to Publishers
- D. Convert the technical data to Content Fragments and expose using Content Services

Answer: A

Explanation:

Integrate the AEM Publishers directly with the API Management solution. According to Adobe Experience Manager documentation¹, a direct integration between AEM and PIM can enable marketers and creative professionals to manage eCommerce-related product data and photography within AEM. A direct integration can also ensure data consistency with the PIM and secure access to the APIs using basic authentication^{2,3}.

Option A is the only diagram that shows how AEM Publishers can directly communicate with the API Management solution.

NEW QUESTION # 15

A customer wants to implement an AEM solution to serve localized content to several regional websites.

Which AEM capability should the Architect recommend?

- A. Use translation connector and translation workflows
- B. Use i18N API and Multi Site Manager
- C. Use translation connector and Multi Site Manager
- D. Use translation connector and i18N API

Answer: C

Explanation:

According to Adobe Experience Manager documentation, translation connectors are used to integrate AEM with third-party translation services to orchestrate the translation of AEM content. Multi Site Manager (MSM) is used to create and manage multiple websites that share common content and structure.
