

300-610 Dump Torrent - Exam 300-610 Tutorials

What's more, part of that ActualtestPDF 300-610 dumps now are free: https://drive.google.com/open?id=1rMHSD9Dmszbq11v_1sIJ3nf9pwGdhBnV

The Cisco Practice Test engine included with 300-610 exam questions simulates the actual 300-610 examinations. This is excellent for familiarizing yourself with the Designing Cisco Data Center Infrastructure and learning what to expect on test day. You may also use the Cisco 300-610 online practice test engine to track your progress and examine your answers to determine where you need to improve on the 300-610 exam.

Earning the Cisco 300-610 certification can provide numerous benefits for professionals in the networking industry. Certification validates the candidate's knowledge and expertise in designing data center infrastructure and can lead to career advancement opportunities. Moreover, certified professionals are often sought after by employers and can command higher salaries than non-certified professionals.

To prepare for the Cisco 300-610 Exam, candidates are advised to take the Designing Cisco Data Center Infrastructure (DCID) course. This course covers all the topics that are tested in the exam and provides hands-on experience in designing data center infrastructure using Cisco technologies. Candidates can also use study materials such as books, practice exams, and online courses to prepare for the exam.

100% Pass 2026 Cisco The Best 300-610 Dump Torrent

One of the best features of ActualtestPDF exam questions is free updates for up to 1 year. The ActualtestPDF has hired a team of experienced and qualified Cisco 300-610 exam trainers. They update the 300-610 exam questions as per the latest 300-610 Exam Syllabus. So rest assured that with the ActualtestPDF you will get the updated 300-610 exam practice questions all the time. Try a free demo if you to evaluate the features of our product. Best of luck!

Cisco 300-610 exam is part of the CCNP Data Center certification track. Designing Cisco Data Center Infrastructure certification is designed for professionals who want to prove their expertise in data center technologies and solutions. Designing Cisco Data Center Infrastructure certification track consists of four exams, including the Cisco 300-610 Exam, and is designed to validate the skills required for data center infrastructure design, implementation, and management.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q313-Q318):

NEW QUESTION # 313

Which multicast rendezvous point redundancy mode is valid for Bidirectional PIM?

- A. Embedded RP
- B. MSDP

- C. PIM anycast RP
- **D. Phantom RP**

Answer: D

Explanation:

Check the Phantom RP section in:

https://www.cisco.com/c/en/us/products/collateral/ios-nx-os-software/ip-multicast/whitepaper_c11-508498.html

https://www.cisco.com/c/dam/en/us/products/collateral/ios-nx-os-software/multicast-enterprise/prod_white_paper0900aecd80310db2.pdf

Because multicast source information is no longer available in Bidir, the Anycast/MSDP mechanism used to provide redundancy in sparse-mode is not an option for Bidir.

NEW QUESTION # 314

A client in a commercial building installs a Cisco blade server in the multitenant Cisco UCS blade Infrastructure. To cut operating costs the client's data center is shared with other organizations. The client asks an engineer prevent third parties from accessing their equipment and from accessing BIOS-related information when booting a server. Which Two policies must be used to meet these requirements? (Choose two.)

- A. post error pause
- B. ASPM support
- **C. quiet boot**
- D. front panel lockout
- **E. CDN control**

Answer: C,E

Explanation:

https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/ucs-manager/GUI-User-Guides/Server-Mgmt/3-2/b_Cisco_UCS_Manager_Server_Mgmt_Guide_3_2

[/b_Cisco_UCS_Manager_Server_Mgmt_Guide_3_2_chapter_01110.html](#)

Quiet boot is what the BIOS displays during booting the server. If enabled, the BIOS displays the logo screen.

I believe that quiet boot and CDN control may have the customer name.

NEW QUESTION # 315

Which automation software natively runs within the CLI of Cisco NX-OS devices?

- A. Chef
- B. Puppet
- **C. Python**
- D. Ansible

Answer: C

Explanation:

Cisco NX-OS supports a built-in Python interpreter that can be accessed directly from the CLI.

Python scripts can be run interactively or in non-interactive mode, allowing automation and programmability directly on the device.

NX-OS includes Python versions 2.7 and 3.x (with Python

3 recommended for new scripts). This enables tasks such as configuration verification, automation, and interaction with the device CLI programmatically.

NEW QUESTION # 316

An engineer wants to eliminate the manual process of checking the system hardware and firmware against a specified hardware compatibility tool. The tool must be able to manage an extensive list of devices including Cisco HyperFlex, MDS, and Nexus switches. The tool must manage hardware in multiple data centers so it should be deployed on public cloud infrastructure.

Which tool meets these requirements?

- A. Cisco Data Center Network Manager
- **B. Cisco Intersight**

- C. Cisco Tetration
- D. Cisco UCS Director

Answer: B

Explanation:

D18912E1457D5D1DDC'BD40AB3BF70D5D

NEW QUESTION # 317

Which two statements accurately describe a Cisco UCS Fabric Interconnect cluster? (Choose two)

- A. When the primary Fabric Interconnect node comes up after a failure, the node compares the Cisco UCS system database version to the standby Fabric Interconnect.
- B. Only the active Fabric Interconnect forwards data traffic
- C. The Fabric Interconnect cluster uses a virtual IP address for management connections
- D. The Fabric Interconnect cluster uses a Cisco UCS B-Series Blade Server chassis to forward data when the L1-L2 links are down
- E. The Fabric Interconnect uses L1-L2 links to forward data when the primary Fabric Interconnect uplinks are down.

Answer: A,C

NEW QUESTION # 318
