UiPath Automation Business Analyst Associate Exam (2023.10) Sample Questions (Q11-Q16):

NEW QUESTION # 11
Which document helps validate if an automation idea is suitable for automation?

- A. Process Assessment Tool
- B. Application Tracker
- C. Solution Design Document
- D. Project Plan

Answer: A

Explanation:

TheProcess Assessment Toolis used tovalidate whether an automation idea is suitablefor automation. It helps determine both thebusiness valueand thetechnical feasibilityof a given process by evaluating parameters such as complexity, frequency, volume, standardization, and exception rate.

This tool is particularly useful during theDiscovery phaseorBusiness Case and Technical Validationstage.

It enables theAutomation Business Analystand stakeholders to prioritize the right automation candidates and avoid wasting resources on processes that offer little value or are difficult to automate.

The result is adata-drivendecision-making process that ensures only high-impact, feasible processes move forward into implementation.

NEW QUESTION # 12

What is the purpose of the Kickoff stage in the UiPath Automation Implementation Methodology?

- A. To validate the success of the completed automation
- B. To start development activities and build automation workflows
- C. To align with the Client Team on project expectations and prepare for implementation
- D. To perform user testing and gather feedback

Answer: C

Explanation:

TheKickoff stagein the UiPath Automation Implementation Methodology serves tolay out and align expectationsbetween theClient Teamand theImplementation Teambefore any development begins. It is the first formal step in the automation lifecycle and sets the foundation for successful project execution.

During this stage, stakeholders review theStatement of Work (SOW), clarify roles and responsibilities, definehigh-level project scope, discusstimeline and milestones, and identifyaccess and infrastructure requirements. Key participants in this stage include theProject Manager,Solution Architect, and Infrastructure Engineer.

This stage is crucial to ensure all teams are on the same page regarding deliverables, communication plans, risk management, and collaboration protocols. A well-conducted Kickoff stage helps mitigate misunderstandings later in the project and ensures that the implementation starts on solid ground.

NEW QUESTION # 13

What is the responsibility of the Project Manager in the UiPath Automation Implementation Methodology?

- A. Providing infrastructure-related configurations
- B. Writing and approving code modules
- C. Coordinating implementation activities and managing risks
- D. Managing solution design and deployment

Answer: C

Explanation:

TheProject Manageris responsible forcoordinating all implementation activitiesandmanaging project risks, timelines, and resources throughout the automation lifecycle. They serve as the primary point of contact between theClient Teamand theImplementation Team.

Their key responsibilities include:
* Defining and tracking project schedules
* Managing communication among stakeholders
* Facilitating meetings and escalations
* Handling changes in scope, resources, or timelines
* Monitoring deliverables and ensuring quality
The Project Manager ensures that the team adheres to UiPath's methodology and that all phases - from Kickoff to Project Closure -

are completed effectively. Their oversight ensures alignment, accountability, and timely delivery of the automation solution.

NEW QUESTION # 14

What is the primary purpose of the Process Assessment Tool in UiPath?

- A. Designing automated workflows
- B. Managing robot workloads
- C. Determining process fit and feasibility for automation
- D. Tracking project defects

Answer: C

Explanation:

TheProcess Assessment Toolin UiPath is designed toevaluate whether a business process is a good fit for automation. It assists business analysts and other stakeholders in determining both thefeasibilityand thevalue of automating a specific process.

The tool assesses various dimensions such as process complexity, frequency, standardization, exception handling, and potential business impact. Based on this evaluation, the tool generates a score or categorization that helps prioritize processes for automation. This helps organizations invest their automation efforts in the right areas - those that offer high ROI and are technically viable. It also enablesstrategic decision-makingin the Discover phase, where automation candidates are initially shortlisted and analyzed.

NEW QUESTION # 15

What are the two teams associated with the Automation Implementation Methodology?

- A. Implementation Team and Client Team
- B. Business Team and Delivery Team
- C. Developer Team and Infrastructure Team
- D. Support Team and IT Team

Answer: A

Explanation:

The two primary teams involved in the UiPath Automation Implementation Methodology are the Implementation Teamand theClient Team. Each team plays a crucial and distinct role throughout the automation lifecycle.

TheImplementation Teamis typically composed of UiPath experts such as solution architects, automation developers, business analysts, project managers, and infrastructure engineers. This team is responsible for the end-to-end execution of the automation project - from analyzing business processes and designing solutions to developing, testing, and deploying automation.

On the other hand, theClient Teamrepresents the business unit that owns the process to be automated. This team provides insights into the existing processes, participates in requirement gathering, validates the business value of automation, and performs UAT (User Acceptance Testing). They are the key beneficiaries of the automation solution and play a critical role in ensuring the final output meets their needs.

Together, these two teams ensure collaboration between technical and business stakeholders, aligning the automation project with strategic business goals and achieving successfulimplementation outcomes.

NEW QUESTION # 16
