## Adobe AD0-E725 Exam Test & AD0-E725 Interactive Testing Engine

Our company has employed a lot of leading experts in the field to compile the AD0-E725 exam torrents, so you can definitely feel rest assured about the high quality of our AD0-E725 question torrents. On the other thing, the pass rate among our customers who prepared the exam under the guidance of our AD0-E725 Study Materials has reached as high as 98% to 100%. What's more, you will have more opportunities to get promotion as well as a pay raise in the near future after using our AD0-E725 question torrents since you are sure to get the certification.

## Adobe Commerce Developer Expert Sample Questions (Q29-Q34):

### NEW QUESTION # 29

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size. How should this problem be solved?

- A. Extend their Adobe license.
- **B. Open a ticket with Adobe support.**
- C. Modify the magento.app.yaml file.

**Answer: B**

### NEW QUESTION # 30

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Apply a security patch using composer.json
- **B. Copy a security patch to m2-hotfixes directory**
- C. Upgrade Adobe Commerce to the latest security patch release

**Answer: B**

### NEW QUESTION # 31

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost. How should the Developer implement this task functionality?

- A. Register New Source Selection Algorithms via di.xml and implement SourceSelectionInterface.
- **B. Configure Distance Priority Algorithm and implement PlaceReservationsForSalesEventInterface.**
- C. Use Source Priority Algorithm and utilize GetSourceSelectionAlgorithmList.

**Answer: B**

### NEW QUESTION # 32

A Developer is working on a new controller in the admin panel. Per requirements, it must be accessible only for specific admin users. According to best practices, how should the Developer secure access to the new controller?

- A. Implement isAllowed method from AuthorizationInterface and check the result for a custom ACL resource.
- B. Override \_isAllowed method and check the authorization result for a custom ACL resource.
- **C. Override ADMIN\_RESOURCE constant with a value for a custom ACL (Access Control List) resource.**

**Answer: C**

Explanation:

The best practice is to use the ADMIN\_RESOURCE constant in the controller. This constant defines the ACL resource that controls access to the controller. Magento automatically checks the ACL resource against the current admin user's permissions. A is unnecessary because ACL checking is built-in and tied to ADMIN\_RESOURCE.

C is a legacy method (\_isAllowed) used in Magento 1; in Magento 2, the constant override is the proper way.

Reference:

Adobe Commerce DevDocs - Admin controllers and ACL

### NEW QUESTION # 33

A client reports an issue with indexers that are failing and remain stuck. The client asks a Developer to solve this issue.

What recommended solution should the Developer use?

- A. Create a cron job that runs `bin/magento indexer:reindex` periodically.
- **B. In `app/etc/env.php` set `indexer_sync_mode` -> `false` under the `indexer` node.**
- C. Run `bin/magento indexer:set-mode realtime <indexer_list>`.

**Answer: B**

Explanation:

Adobe Commerce recommends running indexers in asynchronous (scheduled) mode, not realtime mode.

This is because:

\* Realtime mode (Option C) updates indexers every time related data changes, which causes performance issues and potential indexer lockups under high load.

\* Manual cron job (Option A) is not recommended since Adobe Commerce already has a built-in cron system that manages indexers efficiently when properly configured.

\* Setting `indexer_sync_mode` -> `false` in `app/etc/env.php` (Option B) ensures that indexers run in "scheduled" mode, meaning they are updated via cron jobs in the background. This prevents them from becoming stuck in the "processing" state and aligns with Adobe's best practices for production environments.

This configuration change tells Magento to defer indexing operations to scheduled jobs, which helps avoid race conditions and long-running lock issues.

Official Documentation Extracts:

\* "Adobe recommends running indexers on schedule (asynchronous mode). This is controlled by the indexer configuration in the `app/etc/env.php` file."- Adobe Commerce DevDocs: Configure indexers

\* "To enable scheduled (asynchronous) indexing, set `indexer_sync_mode` to `false` in `app/etc/env.php`.

This is the recommended mode for production systems."- Adobe Commerce Configuration Reference

## NEW QUESTION # 34

.....

As a reliable company providing professional IT certificate exam materials, we not only provide quality guaranteed products for AD0-E725 exam software, but also offer high quality pre-sale and after-sale service. Our online service will give you 24/7 online support. If you have any question about AD0-E725 exam software or other exam materials, or any problem about how to purchase our products, you can contact our online customer service directly. Besides, during one year after you purchased our AD0-E725 Exam software, any update of AD0-E725 exam software will be sent to your mailbox the first time.
