

# Exam NSE6\_EDR\_AD-7.0 Fee - Latest NSE6\_EDR\_AD-7.0 Test Blueprint

P.S. Free 2026 Fortinet NSE6\_EDR\_AD-7.0 dumps are available on Google Drive shared by Actual4Exams:  
[https://drive.google.com/open?id=13ybW0Vo4bLM5V\\_9lg7wGldieVSiPCFm3](https://drive.google.com/open?id=13ybW0Vo4bLM5V_9lg7wGldieVSiPCFm3)

Our Actual4Exams's NSE6\_EDR\_AD-7.0 test training materials can test your knowledge, when you prepare for NSE6\_EDR\_AD-7.0 test; and can also evaluate your performance at the appointed time. Our NSE6\_EDR\_AD-7.0 exam training materials is the result of Actual4Exams's experienced IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you have any concerns, you can first try NSE6\_EDR\_AD-7.0 PDF VCE free demo and answers, and then make a decision whether to choose our NSE6\_EDR\_AD-7.0 dumps or not.

With the help of our NSE6\_EDR\_AD-7.0 test material, users will learn the knowledge necessary to obtain the Fortinet certificate and be competitive in the job market and gain a firm foothold in the workplace. Our NSE6\_EDR\_AD-7.0 quiz guide' reputation for compiling has created a sound base for our beautiful future business. We are clearly concentrated on the international high-end market, thereby committing our resources to the specific product requirements of this key market sector, as long as cater to all the users who wants to get the test Fortinet certification.

## Latest NSE6\_EDR\_AD-7.0 Test Blueprint, NSE6\_EDR\_AD-7.0 Reliable Exam Testking

Our NSE6\_EDR\_AD-7.0 study guide boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our NSE6\_EDR\_AD-7.0 exam simulation is compiled based on the resources from the authorized experts' diligent working and the Real NSE6\_EDR\_AD-7.0 Exam and confer to the past years' exam papers thus they are very practical. The content of the questions and answers of NSE6\_EDR\_AD-7.0 exam quiz is refined and focuses on the most important information.

## Fortinet NSE 6 - FortiEDR 7.0 Administrator Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which two criteria are required for integrating FortiEDR with the Fortinet Security Fabric? (Choose two answers)

- A. A valid API user with access to connectors
- B. Central manager connected to FCS
- C. Core with core-only functionality
- D. A Forensics add-on license

**Answer: A,B**

Explanation:

The correct answers are A and C .

For Fortinet Security Fabric correlation through FortiAnalyzer or FortiAnalyzer Cloud, the FortiEDR guide states that FortiEDR can integrate with FortiAnalyzer/FortiAnalyzer Cloud "to correlate data between FortiEDR and the Fortinet Security Fabric and issue eXtended detection alerts." To complete this, you must configure an eXtended Detection Source connector and enable eXtended Detection rules and FortiEDR Threat Hunting event collection.

The prerequisites include connectivity from the FortiEDR Central Manager to Fortinet Cloud Services (FCS) . The same prerequisite list also requires either a FortiAnalyzer administrator account with JSON API access enabled or, for FortiAnalyzer Cloud, a valid FortiCloud API user with read/write access to the FortiAnalyzer Cloud portal.

Option B is wrong because a Forensics add-on license is not listed as a requirement for this integration.

Option D is badly worded and not correct. A Jumpbox with connectivity to FortiAnalyzer is required, and the guide points to FortiEDR Core setup for Jumpbox configuration, but the answer option says Core with core- only functionality , which is not the stated requirement.

### NEW QUESTION # 15

You added three new applications to FortiEDR using only the Path attribute. What are two expected outcomes of this configuration? (Choose two answers)

- A. All instances of these applications will be blocked, regardless of location.
- B. These applications will be blocked only if the file name also matches.
- C. Only applications in the specified directory paths will be blocked.
- D. These applications will be disabled until explicitly enabled.

**Answer: C,D**

Explanation:

The correct answers are A and B .

The FortiEDR 7.0.0 Administration Guide states that newly added applications are disabled by default , which means they are not blocked unless enabled. The guide further explains that the default state can be changed by enabling the Enable Default application state option in the Application Control Manager settings. Therefore, option A is correct.

Option B is also correct because Application Control allows an application to be defined by Hash or by any combination of File Name / Path / Signer . The guide says that the Path field specifies the path to the executable file of the application to be blocked.

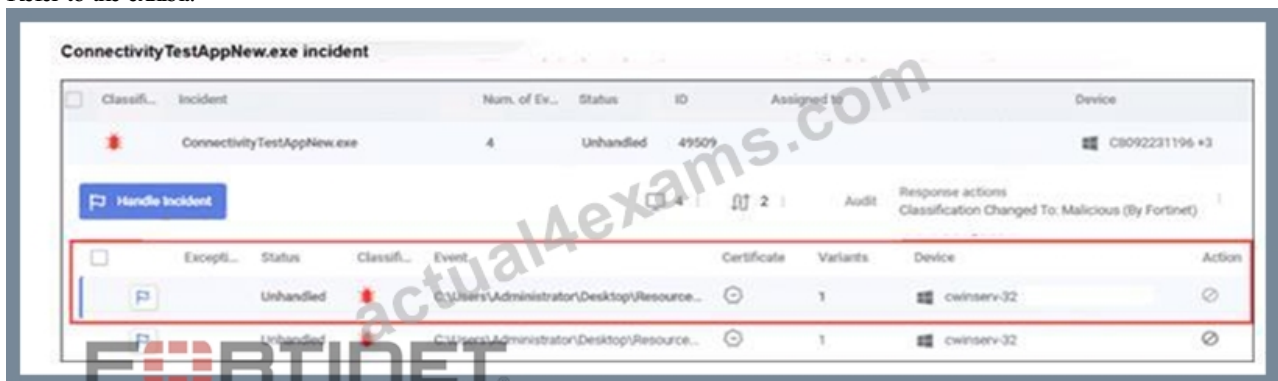

When using path-based matching, the enforcement is tied to the specified path criteria, not to every possible location of the same file.

Option C is wrong because the file name does not also need to match when only the Path attribute is used.

Option D is wrong because blocking all instances regardless of location applies when only the File Name field is used, not when the match is path-specific. The guide explicitly states that if only the File Name field is filled, the application is blocked no matter where the executable appears.

### NEW QUESTION # 16

Refer to the exhibit.

What observation can you make about the ConnectivityTestAppNew.exe incident? (Choose one answer)

- A. A rule assigned action is set to block but the policy is in simulation mode.
- B. The incident was handled automatically by the communication control policy.

- C. The incident has not been handled by a console administrator.
- D. The incident was archived from the console unhandled.

**Answer: C**

Explanation:

The correct answer is B .

In the exhibit, the incident status clearly shows Unhandled at the incident level and also on the event rows.

The FortiEDR guide explains that every detected security event is initially marked as unread and unhandled

, and these statuses help multiple FortiEDR Central Manager users track whether anyone has read and handled the message.

The guide also states that when a FortiEDR Central Manager user marks a security event as Handled , all users see it as handled.

The process is performed by selecting the event and clicking Handle Incident or the flag icon, then saving the incident handling details.

So the valid observation from the exhibit is that the incident has not been handled by a console administrator .

Option A is not supported by the exhibit. There is no visible evidence that the policy is in Simulation mode.

Option C is wrong because the incident is still visible, not archived or deleted. Option D is wrong because the status is explicitly

Unhandled ; it was not handled automatically by a Communication Control policy.

### NEW QUESTION # 17

What action does an on-premises reputation server take when it receives a hash request that is not found in its local database?

(Choose one answer)

- A. Stores them locally and waits for endpoint input
- B. Requests the missing hashes from the cloud reputation service
- C. Automatically blocks applications with unknown hashes
- D. Ignores them until manually updated

**Answer: B**

Explanation:

The correct answer is C .

The FortiEDR 7.0.0 Administration Guide states that for on-premises deployments, the on-premise reputation service requests missing hashes from the cloud reputation service . If a proxy is not enabled, it requests the missing hashes from the cloud reputation service through the manager nginx . If a proxy is enabled, the on-premises reputation service requests the missing hashes through the proxy.

So, when the local reputation database does not contain the requested hash, the on-premises reputation server does not ignore the request, wait for endpoint input, or automatically block the application. It queries the cloud reputation service for the missing hash reputation data.

### NEW QUESTION # 18

A playbook is configured with two actions: terminate process and isolate device. The terminate process action fails because the process is protected by Windows. What is the expected behavior for the second action, isolate device? (Choose one answer)

- A. The playbook execution pauses and requires administrator intervention.
- B. The playbook continues and executes the second action.
- C. The playbook generates a notification email and execution stops.
- D. The playbook execution stops because the action fails.

**Answer: B**

Explanation:

The correct answer is D .

The FortiEDR guide confirms that Playbook actions are automatic incident response actions configured under Security Settings > Playbooks and applied based on security event classification. It also confirms that actions such as Terminate Process and device isolation actions can be configured as playbook responses. For scheduled-query-triggered events, the guide states that FortiEDR can automatically apply the Playbook action assigned to the Collector Group that the triggering device belongs to.

For isolation, the guide shows that isolation actions such as Isolate device with NAC are configured under the Investigation section

of Playbooks, and similar isolation actions are triggered automatically when selected for the relevant classification. The uploaded guide does not provide a specific line saying "if terminate process fails, continue to the next action." Based on FortiEDR playbook behavior, configured actions are executed independently. A failure to terminate a protected Windows process does not automatically cancel the remaining playbook actions. Therefore, the next configured action, isolate device, is still executed. Options A, B, and C are wrong because the playbook does not pause for administrator intervention, does not stop merely because an email is generated, and does not cancel all remaining configured actions because one action failed.

## NEW QUESTION # 19

.....

As far as the price of Fortinet NSE6\_EDR\_AD-7.0 exam practice test questions is concerned, these exam practice test questions are being offered at a discounted price. Get benefits from Fortinet NSE6\_EDR\_AD-7.0 exam questions at discounted prices and download them quickly. Best of luck in NSE6\_EDR\_AD-7.0 Exam and career!!! Just choose the best NSE6\_EDR\_AD-7.0 exam questions format and start Fortinet NSE6\_EDR\_AD-7.0 exam preparation without wasting further time.
