최신 SAP Certified Associate C-WME-2506 무료샘플문제 (Q39-Q44):

질문 #39

You are building a WalkMe solution to help your users self-serve and prevent common support tickets from being opened repeatedly. You want to add guidance for the top three support tickets to a page on your website and make it stand out for the end user.

What is the best solution to allow for quick and easy access?

- A. Add it to your list of WalkMe content in the Menu.
- B. Create a Survey to ask end users about their feedback.
- C. Create a Mini Menu of content from the top three support tickets and place it next to the support ticket form.**
- D. Create a large ShoutOut to appear in the middle of the page each time the user visits the page.

정답: C

질문 #40

What is the purpose of using the small ghost icon in the WalkMe Editor when customizing an invisible Launcher?

- A. To automatically make all colors of the Launcher transparent.**
- B. To adjust the size of the Launcher.
- C. To add animations to the Launcher.
- D. To change the Launcher's shape.

정답: A

설명:

In the WalkMe Editor, the small ghost icon is a tool used when customizing Launchers to make them invisible by setting their colors to fully transparent. This feature is particularly useful for creating invisible Launchers that overlay and block interaction with specific UI elements without being visible to users. By clicking the ghost icon, the Launcher's colors (background, border, etc.) are automatically set to transparent, ensuring it blends seamlessly into the webpage while still functioning as an interactive element.

The other options are incorrect:

- * Adding animations(A) is handled through other customization settings, not the ghost icon.
- * Adjusting the size(B) is done via resizing controls, not the ghost icon.
- * Changing the shape(C) is managed through shape settings, not transparency.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers): "The ghost icon in the WalkMe Editor's Launcher customization panel sets all colors of the Launcher to fully transparent, creating an invisible Launcher. This is ideal for scenarios where the Launcher needs to block interaction with an underlying element without being visible." The course *Advancing Your Skills in Building WalkMe Solutions* notes:

"To create an invisible Launcher, use the ghost icon to automatically apply transparency to all color settings, ensuring the Launcher is

undetectable to users while maintaining its functionality." Option D correctly describes the purpose of the ghost icon.

질문 # 41

You have received some feedback that your end users are having issues completing a Smart Walk- Thru that you built.

Where are the best places to analyze where users are having issues?

Note: There are 2 correct answers to this question.

- A. Look at the Smart Walk- Thru steps in the Editor.
- B. Look at the Smart Walk- Thru step analysis in Insights.
- C. Look in the WalkMe Player Menu.
- D. Look at the percent of users that played Smart Walk- Thrus.

정답: A,B

질문 # 42

Your product team has informed you that there is a UI element on the website that has no purpose, is causing user confusion, and they need it removed. They also mentioned that they don't have enough development resources to remove it for at least a few weeks.

What WalkMe solution can you build to help resolve this issue?

- A. Build a Launcher that will cover up the UI element and make it invisible.
- B. Build a Resource to a support article on the UI element.
- C. Build a Mini Menu and place it next to the button.
- D. Build a mandatory field Launcher and place it on top of the UI element.

정답: A

질문 # 43

What is the function of WalkMe Discovery's License Optimization feature?

- A. To disable unused applications permanently
- B. To identify potential wasted spend on app licenses
- C. To increase the number of applications used in an organization
- D. To automatically renew software licenses without user intervention

정답: B

설명:

WalkMe Discovery's License Optimization feature analyzes application usage data to identify potential wasted spend on app licenses. By tracking which licenses are underutilized or unused, it helps organizations optimize software investments, reducing costs without disrupting operations.

The other options are incorrect:

* Automatically renewing licenses(A) is not a WalkMe function.

* Disabling unused applications permanently(C) is too extreme; Discovery provides insights, not actions.

* Increasing applications(D) contradicts the goal of optimization.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.6: WalkMe Discovery):

"The License Optimization feature in WalkMe Discovery identifies underused or unused software licenses, highlighting opportunities to reduce wasted spend." The course WalkMe Fundamentals explains:

"WalkMe Discovery's License Optimization helps organizations save costs by pinpointing licenses that are not fully utilized, enabling informed decisions." Option B correctly describes the function of License Optimization.
