With our customer-oriented EUNA_2024 actual question, you can be one of the former exam candidates with passing rate up to 98 to 100 percent.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q40-Q45):

NEW QUESTION # 40
When configuring valves or switches in ArcGIS Utility Network, are terminals necessary if both sides of the device are equal?

- A. Yes, all devices must have terminals
- B. No, terminals are only required if the device is a subnetwork controller
- C. No, terminals are only required when sides differ, multiple ports exist, or flow is directional

Answer: C

Explanation:
If both sides of a device are identical, terminals are unnecessary. Terminals are used when sides differ or multiple ports exist.

NEW QUESTION # 41
A database utility network owner is configuring a system tier in a water utility network that can supply water to customers through

multiple possible flow paths. Which topology type should be used to model this tier?

- A. Mesh topology
- B. Radial topology
- C. Partitioned topology

Answer: A

Explanation:
Mesh topology allows multiple flow paths and loops, common in water systems.

NEW QUESTION # 42
Which are the two prerequisites for creating and running validation attribute rules on a utility network dataset?

- A. File geodatabase and topology enabled
- B. Enterprise geodatabase and branch versioning
- C. Subnetwork diagram and tier definition

Answer: B

Explanation:
Validation rules require an enterprise geodatabase with branch versioning enabled.

NEW QUESTION # 43
When configuring a partitioned tier definition in ArcGIS Utility Network, what type of terminal configuration must be used to properly define flow direction?

- A. Single Terminal
- B. Directional
- C. Bidirectional

Answer: B

Explanation:
Partitioned tiers require directional terminals, since they model sequential flow from higher to lower tiers.

NEW QUESTION # 44
In ArcGIS Utility Network, which association type should be used to represent electrical devices (such as fuses or switches) inside a junction box within a substation?

- A. Structural attachment association
- B. Containment association
- C. Connectivity association

Answer: B

Explanation:
Containment associations represent devices housed within a container feature, such as a junction box.

NEW QUESTION # 45
