What's more, part of that PracticeMaterial HPE7-A06 dumps now are free: <https://drive.google.com/open?id=1KC2yVD-1CBW1F4RAmmY4keXp3KdTgY3f>

As is known to all, practice makes perfect. This proverb also can be replied into the exam. We have the HPE7-A06 Study Materials with good reputation in the market. The HPE7-A06 exam dumps not only contains the quality, but also have the quantity, therefore it will meet your needs. Just think that you just need to practice it for some time, a certificate will be obtained by your own efforts, it will be a quite delightful thing. So act now, you will be very happy to see it come true.

Users are buying something online (such as HPE7-A06 prepare questions), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our HPE7-A06 quiz guide will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our HPE7-A06 Exam Prep. All users can implement fast purchase and use our learning materials. We have specialized software to optimize the user's purchase channels, if you decide to purchase our HPE7-A06 prepare questions, you can achieve the product content even if the update service and efficient and convenient user experience.

## HPE7-A06 Real Testing Environment & Training HPE7-A06 Online

Whatever may be the reason to leave your job, if you have made up your mind, there is no going back. By getting the HP HPE7-A06 Certification, you can avoid thinking about negative things, instead, you can focus on the positive and bright side of taking this step and find a new skill set to improve your chances of getting your dream job.

## HPE Campus Access Switching Expert Written Exam Sample Questions

## (Q49-Q54):

### NEW QUESTION # 49

A pair of CX 8325 series switches is configured in a VSX cluster. Which function is executed on both VSX members during normal operation?

- A. periodically sends gratuitous ARP and broadcast hello packets
- B. relays DHCP requests or servers DHCP offer
- C. routes PIM and PIM-DR
- D. replies to ARP requests with the cluster vMAC

**Answer: C**

Explanation:

In an AOS-CX VSX cluster, both members act as independent routing and multicast-capable devices. Each VSX node maintains its own control plane, so both members can independently perform functions like routing, running PIM, and acting as PIM Designated Router (PIM-DR).

Other functions, such as ARP replies with the cluster vMAC or gratuitous ARPs, are handled by the active gateway only, not both switches.

### NEW QUESTION # 50

A network administrator wants to collect dumps for traffic sources or destined to a specific IP address. What is the simplest diagnostic command or commands on AOS-CX switches to accomplish this?

- A. diag utilities tcpdump source-ip  
diag utilities tcpdump destination-ip
- B. diag utilities tcpdump destination-ip  
diag utilities tcpdump source-ip
- C. diag utilities tcpdump source-destination-ip
- D. **diag utilities tcpdump host-ip**

**Answer: D**

Explanation:

On AOS-CX switches, the simplest way to capture traffic to or from a specific IP is with diag utilities tcpdump host <ip>. The host keyword matches both source and destination for the given IP address, eliminating the need to run separate source and destination filters.

### NEW QUESTION # 51

Drag and Drop Question

Match the BGP connection states to the conditions that could have caused that state.

Answer Area	
active	 The last keepalive is less than 3 times the negotiated holddown timer.
connect	  The router has not received a response. The neighbor might be unreachable.
established	  The router is waiting for an initial response from the neighbor.
idle	  The router starts listening for a connection.

**Answer:**

Explanation:

**Answer Area**

The last keepalive is less than 3 times the negotiated holdown timer.

The router has not received a response. The neighbor might be unreachable.

The router is waiting for an initial response from the neighbor.

The router starts listening for a connection.

established
active
connect
idle

### NEW QUESTION # 52

A client installed 655 APs in a project to upgrade the network in a large public venue. The customer states that they are having issues with the integration with the new sensor system (Bluetooth) that will help the facilities team monitor when the venue is in use.

What could be the issue?

- A. Bluetooth needs an advanced AP license.
- **B. AP-655 does not have Bluetooth radio**
- C. PoE
- D. throughput

#### Answer: B

Explanation:

The issue is that the AP-655 model does not include a built-in Bluetooth radio. Since the customer's integration relies on Bluetooth for the sensor system, the absence of this hardware capability prevents the solution from functioning as intended.

### NEW QUESTION # 53

Ever since a recent firewall change at your WAN/Internet edge, the 8GP state in your VSX pair has not returned to Established. What should you check to restore BGP functionality at the site?

- A. Restart NAT service for the BGP interface.
- B. Restart the routing service so that BGP auto-discovers its neighbors.
- C. Confirm that BGP Peer AS has not changed.
- **D. Confirm that appropriate TCP ports are still allowed.**

#### Answer: D

Explanation:

The BGP state on a VSX pair is stuck (not 'Established') after a recent firewall change at the WAN/Internet edge, where the BGP peering likely occurs.

\* **BGP and Firewalls:** BGP establishes sessions using TCP port 179. Firewalls located between BGP peers must explicitly permit TCP port 179 traffic bidirectionally for the peering to establish and maintain. Firewall changes are a frequent cause of broken BGP sessions.

\* **Troubleshooting Steps After Firewall Change:** The most logical first step is to verify that the firewall change did not inadvertently block TCP port 179 between the configured BGP neighbor IP addresses.

\* **Analysis of Options:**

- \* A: Restarting routing service is disruptive and not the first step.
- \* B: Confirming that appropriate TCP ports (specifically 179) are still allowed through the firewall directly addresses the most probable cause related to the firewall change event.
- \* C: Restarting NAT service is likely irrelevant unless NAT is incorrectly configured for BGP peers.
- \* D: Confirming the peer AS is a basic configuration check but less likely related to the firewall change event than port blocking.

\* **Conclusion:** Given the problem occurred immediately following a firewall change, verifying that the firewall still permits TCP port 179 between the BGP peers is the most direct and likely troubleshooting step.

References:BGP protocol specifications (RFC 4271), Firewall management principles, Network troubleshooting methodology. This relates to "Routing" (16%), "Security" (10%), and "Troubleshooting" (10%) objectives.

## NEW QUESTION # 54

.....

If you buy our HPE7-A06 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version of our HPE7-A06 exam questions for you. The three different versions of our HPE7-A06 Study Materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipment with the high quality for you to pass the exam.
