## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q20-Q25):

### NEW QUESTION # 20

What is the primary function of SAP Business Data Cloud?

- A. To unify data from various sources
- B. To automate payroll processing
- C. To optimize supply chain operations
- D. To manage employee benefits

**Answer: A**

#### NEW QUESTION # 21

Which of the following are core solution areas in SAP Finance and Risk?

Note: There are 2 correct answers to this question.

- A. Governance, Risk, and Compliance
- B. Treasury Management
- C. Sales Order Processing
- D. Asset Management Platform

**Answer: A,B**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The SAP Finance and Risk portfolio is designed to provide a comprehensive framework for managing an organization's financial integrity and regulatory exposure. Within this framework, Treasury Management and Governance, Risk, and Compliance (GRC) are two of the most critical core solution areas. Treasury Management focuses on the lifecycle of cash and financial risk, providing tools for liquidity management, debt and investment handling, and secure bank connectivity. It ensures that the finance department can protect the company's assets while optimizing its financial performance.

Complementing this, Governance, Risk, and Compliance (GRC) provides the "defensive" layer of the finance function. It includes solutions for managing internal controls, identity access governance, and international trade compliance. By automating these processes, SAP helps organizations move away from siloed, manual risk management to an integrated approach where risks are identified and mitigated in real-time. Together, these two areas provide the CFO with both the "offensive" capability to manage capital (Treasury) and the "defensive" capability to protect the enterprise (GRC). While Sales Order Processing (A) and Asset Management (B) are essential parts of the broader SAP S/4HANA ERP, they are considered operational supply chain or maintenance functions rather than the core "Finance and Risk" solution areas used to position SAP's financial leadership.

#### NEW QUESTION # 22

How does the SAP Business Suite's financial management capabilities help Finance leaders?

Note: There are 3 correct answers to this question.

- A. By streamlining workforce planning, enhancing employee interactions, and optimizing HR processes using AI agents.
- B. By optimizing cash flow and managing risks effectively.
- C. By streamlining accounting processes with automation.
- D. By streamlining the processing of payroll data through third-party banking interfaces.
- E. By allowing businesses to grow profitable revenues and monetize diversified offerings using quote-to-cash capabilities.

**Answer: B,C,E**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Financial Management capabilities are designed to empower finance leaders to transition from transactional managers to strategic advisors. This is achieved through three primary avenues. First, the suite helps optimize cash flow and manage risks effectively by providing real-time visibility into liquidity and automating the identification of financial threats. This allows leaders to make informed decisions about investments and debt.

Second, SAP focuses on streamlining accounting processes with automation. By utilizing technologies like the Universal Journal and AI-driven matching, the "Record-to-Report" cycle is significantly shortened. This reduces the administrative burden on the finance team and eliminates manual errors, leading to a "continuous accounting" environment. Third, SAP supports modern business models by allowing businesses to grow profitable revenues and monetize diversified offerings. Through advanced "Quote-to-Cash" capabilities, companies can easily manage subscriptions, usage-based billing, and complex service bundles. This flexibility is crucial in today's digital economy where traditional product sales are being replaced by recurring revenue models. While HR processes (D)

and payroll processing (E) are vital for an enterprise, they fall under the Human Capital Management (HCM) domain and are not the primary value drivers emphasized for the SAP Financial Management solution set.

#### NEW QUESTION # 23

Which feature of SAP Business Suite brings transparency to financial issues and unifies data from various sources?

- A. SAP Business Data Cloud
- B. SAP Analytics Cloud Compass
- C. Joule
- D. SAP Datasphere

**Answer: D**

#### NEW QUESTION # 24

Which solution helps multi-ERP system clients centralize their accounting and reporting system?

- A. SAP S/4HANA Cloud for central finance
- B. SAP Analytics Cloud
- C. SAP Integration Suite
- D. SAP Advanced Financial Closing

**Answer: A**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Many large enterprises operate in a fragmented IT landscape where multiple ERP systems (both SAP and non-SAP) are used across different subsidiaries or regions. SAP S/4HANA Cloud for central finance is the specific deployment option designed to bridge these gaps without requiring a full-scale migration of all local systems at once. It allows organizations to replicate financial transactions from various source systems into a single, centralized SAP S/4HANA instance in real-time.

By using Central Finance, a company can create a centralized accounting and reporting system that serves as a "Single Source of Truth" for the entire group. This enables centralized processes such as "Central Payments," "Central Credit Management," and "Centralized Reporting." Instead of waiting for period-end extracts from dozens of different systems, the group finance team can see the total financial position of the company at any moment. This significantly simplifies the consolidation process and provides a clear path for digital transformation. It allows the CFO to harmonize data and processes at the corporate level while local entities continue to operate on their existing legacy systems, providing a low-risk, high-value approach to modernizing the finance function.
