Since to choose to participate in the APMG-International ISO-IEC-27001-Foundation certification exam, of course, it is necessary to have to go through. This is also the performance that you are strong-willed. Lead2Passed APMG-International ISO-IEC-27001-Foundation Exam Training materials is the best choice to help you pass the exam. The training materials of Lead2Passed website have a unique good quality on the internet. If you want to pass the APMG-International ISO-IEC-27001-Foundation exam, you'd better to buy Lead2Passed's exam training materials quickly.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which is a control title within Annex A of ISO/IEC 27001?

- A. Responsibilities and procedures
- **B. Information security in supplier relationships**
- C. Protection of documents
- D. Change control

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

* "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.

* "Protection of documents" (C) relates to document control but is not a specific Annex A control.

* "Change control" (D) is relevant to ITIL/ITSM but not listed as a control title in Annex A.

Therefore, the correct Annex A control title is: Information security in supplier relationships.

NEW QUESTION # 37

Which item is required to be included in an information security policy?

- A. A plan for the continual improvement of the information security management system
- **B. A commitment to satisfy applicable requirements related to information security**
- C. A Statement of Applicability which defines the necessary controls to be implemented
- D. A framework enabling concerns with the information security policy to be addressed

Answer: B

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- * "includes information security objectives (or provides a framework for setting them)"
- * "includes a commitment to satisfy applicable requirements related to information security"
- * "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer is A.

NEW QUESTION # 38

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

- * ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process
- * ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Neither 1 or 2 is true
- B. Only 2 is true
- C. Only 1 is true
- D. Both 1 and 2 are true

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:
ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC 27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them. However, ISO/IEC 27002 does not provide a process for risk management that is covered by ISO/IEC 27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3). Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

NEW QUESTION # 39

Which trend in information security performance is required to be considered during a management review of the ISMS?

- A. Decisions related to continual improvement opportunities
- B. Relevant external and internal requirements changes
- C. Validity of information continuity controls
- D. Achievement of information security objectives

Answer: D

Explanation:

Clause 9.3.2 (Management Review Inputs) states that management reviews shall include:
"c) information on the information security performance, including trends in: (1) nonconformities and corrective actions; (2) monitoring and measurement results; (3) audit results; and (4) fulfilment of information security objectives." This makes achievement of information security objectives (option A) a required trend to be considered. While external/internal requirements (C) and continual improvement opportunities (D) are also part of management review inputs, they are not specifically listed under "trends in performance." Option B is outside the direct requirement. Thus, the verified answer is A.

NEW QUESTION # 40

Which statement describes a requirement for information security objectives?

- A. They shall all be measurable
- B. They shall be consistent with the information security policy

- C. They shall be contractually transferred to third parties
- D. They shall be reviewed at least annually

Answer: B

Explanation:

Clause 6.2 (Information security objectives) requires that objectives:

- * "be consistent with the information security policy"
- * "be measurable (if practicable)"
- * "take into account applicable information security requirements"
- * "be monitored, communicated, and updated as appropriate."

From this, option A is correct since consistency with policy is an explicit requirement. Option B is incorrect because the standard allows objectives to be measurable "if practicable" (not mandatory for all). Option C is incorrect-objectives are not transferred contractually to third parties, though third-party agreements may include security requirements. Option D is incorrect because the standard requires regular review "as appropriate," not a fixed annual cycle.

Thus, the verified requirement is A: They shall be consistent with the information security policy.

NEW QUESTION # 41

.....

Our ISO-IEC-27001-Foundation exam question is widely known throughout the education market. Almost all the candidates who are ready for the qualifying examination know our ISO-IEC-27001-Foundation exam questions. Even when they find that their classmates or colleagues are preparing a ISO-IEC-27001-Foundation exam, they will introduce our study materials to you. So, our learning materials help users to be assured of the ISO-IEC-27001-Foundation Exam. Currently, my company has introduced three versions of ISO-IEC-27001-Foundation learning materials, covering almost all the needs of the different customers.
