

Minimum JN0-253 Pass Score, JN0-253 Free Exam Questions

BONUS!!! Download part of PDFDumps JN0-253 dumps for free: https://drive.google.com/open?id=192mfV_fMkvK8WNDM-UmoEcO3YelknWs

PDFDumps has one of the most comprehensive and top-notch Juniper JN0-253 Exam Questions. We eliminated the filler and simplified the Mist AI, Associate (JNCIA-MistAI) exam preparation process so you can ace the Juniper certification exam on your first try. Our Juniper JN0-253 Questions include real-world examples to help you learn the fundamentals of the subject not only for the Juniper exam but also for your future job.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
Topic 2	Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
Topic 3	Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.
Topic 4	Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 5	Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.

JN0-253 Free Exam Questions & Valid JN0-253 Test Dumps

You may have been learning and trying to get the JN0-253 certification hard, and good result is naturally become our evaluation to one of the important indices for one level. When looking for a job, of course, a lot of companies what the personnel managers will ask applicants that have you get the JN0-253 certification to prove their abilities, therefore, we need to use other ways to testify our knowledge we get when we study at college , such as get the JN0-253 Test Prep to obtained the qualification certificate to show their own all aspects of the comprehensive abilities, and the JN0-253 exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q83-Q88):

NEW QUESTION # 83

Which two statements are correct about Juniper Mist Wired Assurance ZTP? (Choose two.)

- A. All legacy Juniper switch models are supported.
- B. The switch must be running a supported Junos version for Juniper Mist Wired Assurance.
- C. The cloud-ready Juniper switch must either boot from the factory-default state or you can issue the request system zeroize Junos command to reset the configuration.
- D. The technician must have console access to the switch during the initial setup.

Answer: B,C

Explanation:

Supported Junos Version: For Juniper Mist Wired Assurance to function correctly, the switch must be running a supported Junos version. This ensures compatibility with Mist's cloud management and AI capabilities.

Factory-Default State or Zeroize Command: The switch must boot from a factory-default state, or you can use the request system zeroize command to reset its configuration. This is essential for seamless onboarding and auto-provisioning.

NEW QUESTION # 84

When browsing the Marvis Actions page, you notice that something has triggered the "AP Offline" Marvis Action. You click on that action.

What information will you see displayed? (Choose two.)

- A. Marvis Action status
- B. recommended action
- C. Mist support ticket status
- D. resolved action

Answer: A,B

Explanation:

When browsing the Marvis Actions page and you click on the "AP Online" Marvis Action, you will see:

Marvis Action Status: This indicates the current state of the action, whether it is in progress, resolved, or another status.

Recommended Action: Marvis will provide a suggested course of action to resolve the issue. This could include steps like configuration changes or other remedial actions.

NEW QUESTION # 85

By default, how long does an Installer role have access to a site for initial configuration before expiration?

- A. unlimited
- B. 48 hours
- C. 7 days
- D. 24 hours

Answer: C

NEW QUESTION # 86

Which two statements describe port profiles? (Choose two.)

- A. They must be assigned to only one port.
- B. They include a set of routing configurations.
- C. They include a set of interface configurations.
- D. They can be assigned to multiple ports.

Answer: C,D

Explanation:

Port profiles in Juniper Mist Wired Assurance are reusable configuration templates that define how switch ports behave. They streamline switch provisioning and ensure consistent configurations across multiple ports and devices within a site or organization. According to the Juniper Mist Wired Assurance Configuration Guide, port profiles are defined as:

"A collection of interface-level settings that can be applied to one or more switch ports to simplify configuration and ensure uniform policy enforcement." Key characteristics include:

- * Reusable templates: Port profiles can be assigned to multiple ports on one or more switches, allowing rapid deployment and consistent port behavior (e.g., access, trunk, voice VLAN).

- * Interface-level parameters: They include settings such as VLAN assignments, PoE configuration, speed, duplex, and LLDP options.

Port profiles do not include routing configurations (those are defined at the Layer 3 interface or VLAN interface level) and are not limited to a single port.

Therefore, the correct answers are:

- * A. They can be assigned to multiple ports.

- * B. They include a set of interface configurations.

NEW QUESTION # 87

Which two statements about webhooks and APIs are correct? (Choose two.)

- A. 100% of all Juniper Mist objects are configurable using webhooks.
- **B. Webhooks are a push from Juniper Mist, and APIs are a pull by the client.**
- C. There is an hourly limit to the number of webhooks that an organization can have.
- **D. There is an hourly limit to the number of API calls that an organization can have.**

Answer: B,D

Explanation:

In the Juniper Mist Cloud architecture, both webhooks and APIs are key interfaces for automation, integration, and data exchange with third-party systems. While they both facilitate communication between Mist and external applications, they operate in opposite directions and serve distinct purposes.

According to the Juniper Mist API and Webhook Developer Guide:

- * Webhooks are push-based notifications initiated by the Juniper Mist Cloud. When specific events occur (such as device disconnection, client onboarding, or alert generation), Mist sends structured JSON payloads to a preconfigured external URL endpoint.

- * APIs (Application Programming Interfaces) are pull-based queries where an external client polls the Mist Cloud to retrieve or update data (e.g., inventory, configuration, or metrics).

Additionally, the Mist Cloud enforces rate limits on API calls to ensure platform stability and fair usage:

"API rate limits are applied on a per-organization basis to prevent excessive polling and to maintain consistent performance." In contrast, webhooks do not have a strict hourly quota because they are event-triggered rather than continuous requests.

Therefore:

- * A is correct - Webhooks push, APIs pull.

- * B is correct - There is an hourly API rate limit per organization.

Options C and D are incorrect because webhooks are event-based (not rate-limited hourly) and do not configure Mist objects directly—they only send notifications.
