NEW QUESTION # 189
When loading data into Oracle Profitability and Cost Management Cloud Service, which option allows the user to define the order in which data is loaded?

- A. Use the Data Integration feature to load data from external sources
- B. Use the Data Management interface to load data from flat files
- C. Use a mapping file to load data from staging tables
- D. Use the Load Data Wizard to load data from an Excel file

Answer: C

Explanation:
Option 1: Correct: Using a mapping file to load data from staging tables allows the user to define the order in which data is loaded. This method provides more flexibility and control over the data loading process. Option 2: Incorrect: The Load Data Wizard allows the user to load data from an Excel file, but it does not provide the option to define the order in which data is loaded. The wizard automatically determines the order based on the spreadsheet structure. Option 3: Incorrect: The Data Management interface allows the user to load data from flat files, but it does not provide the option to define the order in which data is loaded. The interface automatically determines the order based on the file structure. Option 4: Incorrect: The Data Integration feature allows the user to load data from external sources, but it does not provide the option to define the order in

NEW QUESTION # 190
What is the primary function of the Data Management API in Oracle Profitability and Cost Management (PCM) Cloud Service?

- A. To perform calculations and allocations on data within PCM
- B. To extract data from PCM for analysis and reporting in external systems
- C. To import metadata and dimension mappings into PCM
- D. To create and manage data loads from source systems into PCM

Answer: D

Explanation:
Option 1: Incorrect. The data management API is primarily used for data loading and management, not extraction for analysis and reporting in external systems. Option 2: Correct. The Data Management API is used to create and manage data loads from source systems into Oracle PCM. Option 3: Incorrect. Calculations and allocations are not the primary function of the Data Management API. The API is primarily used for data loading and management. Option 4: Incorrect. The Data Management API is not used to import metadata and dimension mappings into PCM. It is primarily used for data loading and management.

NEW QUESTION # 191
When loading data into Oracle Profitability and Cost Management Cloud Service, which option would ensure the fastest possible data load time?

- A. Uploading small data files in batches throughout the day
- B. Using a manual load process instead of an automated process
- C. Uploading a large data file as a single transaction
- D. Creating duplicate records to ensure data consistency

Answer: C

Explanation:
Option 1: This option is incorrect because uploading small data files in batches throughout the day would create unnecessary overhead and potentially slow down the data load process. Option 2: This option is correct because uploading a large data file as a single transaction would ensure the fastest possible data load time. This is because it minimizes overhead and reduces the amount of time the system spends processing each record. Option 3: This option is incorrect because using a manual load process instead of an

automated process would likely introduce errors and potentially slow down the data load process. Option 4: This option is incorrect because creating duplicate records to ensure data consistency is not necessary and would take additional time that could be better spent on the data load process itself.

NEW QUESTION # 192

Which feature in Oracle Profitability and Cost Management Cloud Service allows users to define the allocation of indirect costs or revenue across dimensions?

- A. Profitability Models
- B. Cost Drivers
- C. Activity Cost Rates
- D. Allocation Rules

Answer: D

Explanation:
Option 1: Correct: Allocation Rules in Oracle Profitability and Cost Management Cloud Service allows users to define the allocation of indirect costs or revenue across dimensions. This feature helps organizations accurately allocate costs and revenues to improve decision-making processes. Option 2: Incorrect: Profitability Models in Oracle Profitability and Cost Management Cloud Service are used to define the structure and relationships between various dimensions, such as products, customers, and regions. They are not specifically designed to allocate indirect costs or revenue across dimensions. Option 3: Incorrect: Cost Drivers in Oracle Profitability and Cost Management Cloud Service represent the factors that drive costs in an organization. They are used in conjunction with cost rates to calculate the allocation of costs. However, they are not specifically used to allocate indirect costs or revenue across dimensions. Option 4: Incorrect: Activity Cost Rates in Oracle Profitability and Cost Management Cloud Service define the cost per unit for various activities or cost drivers. They are used in conjunction with cost drivers to calculate the allocation of costs. However, they are not specifically used to allocate indirect costs or revenue across dimensions.

NEW QUESTION # 193

Which method should you use to load data into Oracle Profitability and Cost Management Cloud Service?

- A. Data Visualization Cloud
- B. Data Integration Platform and Cloud
- C. Data Management Cloud
- D. Data Integration Platform

Answer: C

Explanation:
Option 1: Correct: The Data Integration Platform provides tools for loading data into Oracle Profitability and Cost Management Cloud Service from various sources. Option 2: Incorrect: Data Management Cloud is not the recommended method for loading data into Oracle Profitability and Cost Management Cloud Service. Option 3: Incorrect: Data Visualization Cloud is not the recommended method for loading data into Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect: Data Integration Platform and Cloud is not a valid option for loading data into Oracle Profitability and Cost Management Cloud Service.
