questions that perfectly and quickly prepare the Analytics-DA-201 exam candidates. You can easily pass the challenging Salesforce Certified Tableau Data Analyst Analytics-DA-201 Certification Exam. Analytics-DA-201 exam practice test questions you will get everything that you need to learn, prepare and pass the valuable Analytics-DA-201 certification with good scores.

## Salesforce Certified Tableau Data Analyst Sample Questions (Q144-Q149):

### NEW QUESTION # 144

You have the following dataset that contain null values in the Profits field.

You want the data to appear as shown in the following table.

Which two formulas achieve the goal? Choose two.

- A. IF [Profits] != null then [Profits] END
- B. ISNULL ([Profits])
- C. IFNULL ([profits] ,0)
- D. ZN ([Profits])

**Answer: C,D**

Explanation:

Both the ZN and IFNULL functions in Tableau can be used to replace NULL values with zeros. The ZN function converts NULL to zero directly, while the IFNULL function allows you to specify that NULL should be replaced with zero. Both will result in showing zero for any NULL values in the Profits field.

### NEW QUESTION # 145

You have the following dashboard.

From the context menu of Sales over time, select Ignore Actions.

Several Lays later, you decide that you want to filter both Sales over time and Detail table by selecting a data point on the map. What should you do?

- A. From the context menu of Sales over time, select Use as Filter and then deselect Use as Filter
- B. From the context menu of Profits by state, deselect Use as Filter and then select Use as Filter.
- C. From the context menu of Sales over lime, select Filters and then select Enable Auto Update.
- D. From the context menu of Detail table, select Ignore Actions.

**Answer: B**

### NEW QUESTION # 146

You have a dashboard that contains a parameter named Start Date.

You need to create an extract from a Microsoft Excel file. The extract must be filtered based on Start Date.

What should you do?

- A. Create a custom SQL query to define the data source and create a calculated field based on Start Date. Add the calculated field to the extract filter.
- B. Create a data source based on the Excel worksheet and create a calculated field based on Start Date. From the Data pane, add the calculated field to the data source filter
- C. Create a custom SQL query that references Stan Date in the WHERE clause.
- D. Create a data source based on the Excel worksheet and create a calculated field based on Start Date. Add the calculated field to the extract filter.

**Answer: D**

### NEW QUESTION # 147

□

How are the colors configured for the map?

- A. A diverging color palette that has six stepped colors
- B. A single color gradient
- C. A sequential color gradient
- **D. A diverging color palette that has five stepped colors**

**Answer: D**

#### NEW QUESTION # 148

A Data Analyst is given the following table and asked to create a flow that adds a date field to the data. This field should automatically update as new dates (months) are added to the original table.

Which technique should the analyst use as the first step to achieve this in Tableau Prep?

- A. A Rows to Columns Pivot step
- B. A wildcard search for multiple tables in the Input step
- **C. A wildcard search to pivot in the Pivot step**
- D. An Aggregate step to reshape the data

**Answer: C**

#### NEW QUESTION # 149

.....
