HPE7-A02 Dump Check | New HPE7-A02 Test Tutorial

2025 Latest PrepAwayETE HPE7-A02 PDF Dumps and HPE7-A02 Exam Engine Free Share: https://drive.google.com/open?id=1_j1TlZCGhYOH1fLn0ofqShsfQnXE8npW

Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional HPE7-A02 questions torrent provider, we are worth trusting, because we make great efforts, we do better. Here are some reasons to choose us. The HPE7-A02 Exam Torrent can prove your ability to let more big company to attention you. Then you have more choice to get a better job and going to suitable workplace.

All of our HPE7-A02 exam questions have high pass rate as 99% to 100% and they are valid. We revise our HPE7-A02 study guide aperiodicity. You may rest assured that what you purchase are the latest and high-quality HPE7-A02 preparation materials. We guarantee our HPE7-A02 practice prep will be good value for money, every user will benefit from our HPE7-A02 Exam Guide. If you fail exams we will refund the full test dumps cost to you soon. Every extra penny deserves its value. Our HPE7-A02 test questions will be your best choice.

Easily Accessible HP HPE7-A02 PDF

No matter you are exam candidates of high caliber or newbies, our HPE7-A02 exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of HPE7-A02 real dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our HPE7-A02 Learning Materials quality. We would like to create a better future with you hand in hand, and heart with heart.

Passing the HPE7-A02 Exam is a key step towards earning the Aruba Certified Network Security Professional (ACNSP) certification, which is recognized as a symbol of expertise in network security. Aruba Certified Network Security Professional Exam certification is highly valued by employers and can help network professionals stand out in a competitive job market. With a strong understanding of network security concepts and the ability to design and implement secure network infrastructures, ACNSP-certified professionals are well-equipped to meet the challenges of today's rapidly-evolving security landscape.

HP Aruba Certified Network Security Professional Exam Sample Questions

(Q55-Q60):

NEW QUESTION #55

A company is implementing a client-to-site VPN based on tunnel-mode IPsec.

Which devices are responsible for the IPsec encapsulation?

- A. The remote clients and a gateway at the main site
- B. Gateways at the remote clients' locations and a gateway at the main site
- C. The remote clients and devices accessed by the clients at the main site
- D. Gateways at the remote clients' locations and devices accessed by the clients at the main site

Answer: A

Explanation:

In a client-to-site VPN based on tunnel-mode IPsec, the remote clients and a gateway at the main site are responsible for the IPsec encapsulation. The remote clients initiate the VPN connection and encapsulate their traffic in IPsec, which is then decapsulated by the gateway at the main site.

- 1. IPsec Encapsulation: The remote clients encapsulate their traffic using IPsec protocols before sending it over the internet to the main site
- 2. Gateway Role: The gateway at the main site receives the encapsulated traffic, decapsulates it, and forwards it to the internal network. Similarly, traffic from the main site to the remote clients is encapsulated by the gateway and decapsulated by the clients.
- 3. Security: This setup ensures that data is securely transmitted between the remote clients and the main site, protecting it from eavesdropping and tampering.

NEW QUESTION #56

A company has HPE Aruba Networking APs and AOS-CX switches, as well as HPE Aruba Networking ClearPass. The company wants CPPM to have HTTP User- Agent strings to use in profiling devices.

What can you do to support these requirements?

- A. Configure mirror sessions on the APs and switches to copy client HTTP traffic to CPPM.
- B. Add the CPPM server's IP address to the IP helper list in all client VLANs on routing switches.
- C. On the APs and switches, configure a redirect to ClearPass Guest in the role for devices being profiled.
- D. Schedule periodic subnet scans of all client subnets on CPPM.

Answer: B

Explanation:

To support the requirement for HPE Aruba Networking ClearPass Policy Manager (CPPM) to have HTTP User-Agent strings for profiling devices, you should add the CPPM server's IP address to the IP helper list in all client VLANs on routing switches. This configuration ensures that DHCP requests and other relevant client traffic are forwarded to CPPM, allowing it to capture HTTP User-Agent strings and use them for device profiling.

- 1.IP Helper Configuration: Adding CPPM to the IP helper list ensures that the switch forwards DHCP and other client traffic to CPPM, enabling it to gather necessary information for profiling.
- 2. User-Agent Strings: By receiving client traffic, CPPM can analyze HTTP headers and capture User-Agent strings, which provide valuable information about the client's device and browser.
- 3. Profiling Support: This approach supports the comprehensive profiling of devices, allowing CPPM to apply appropriate policies based on detailed device information.

Reference: Aruba ClearPass and AOS-CX switch configuration guides detail the process of setting up IP helper addresses and the benefits of forwarding client traffic to CPPM for enhanced profiling and policy enforcement.

NEW QUESTION #57

A company needs you to integrate HPE Aruba Networking ClearPass Policy Manager (CPPM) with HPE Aruba Networking ClearPass Device Insight (CPDI).

What is one task you should do to prepare?

- A. Install the root CA for CPPM's HTTPS certificate as trusted in the CPDI application.
- B. Configure WMI, SSH, and SNMP external accounts for device scanning on CPPM.
- C. Collect a Data Collector token from HPE Aruba Networking Central.
- D. Enable Insight in the CPPM server configuration settings.

Answer: D

Explanation:

To integrate HPE Aruba Networking ClearPass Policy Manager (CPPM) with HPE Aruba Networking ClearPass Device Insight (CPDI), one of the necessary tasks is to enable Insight in the CPPM server configuration settings. This configuration allows CPPM to communicate and share data with CPDI, facilitating the integration and enabling enhanced device profiling and policy enforcement capabilities.

- 1. Insight Enablement: Enabling Insight on the CPPM server allows it to leverage the data and capabilities of CPDI, integrating device profiling information into policy decisions.
- 2. Data Sharing: This integration ensures that CPPM can receive and use detailed device information from CPDI to make more informed policy enforcement decisions.
- 3. Configuration: Properly configuring the server settings to enable Insight ensures seamless communication and data flow between CPPM and CPDI.

NEW QUESTION #58

Your company wants to implement Tunneled EAP (TEAP).

How can you set up HPE Aruba Networking ClearPass Policy Manager (CPPM) to enforce certificated-based authentication for clients using TEAP?

- A. For the service using TEAP, set the authentication source to an internal database.
- B. Create an authentication method named "TEAP" with the type set to EAP-TLS.
- C. Select a service certificate when you specify TEAP as a service's authentication method.
- D. Select an EAP-TLS-type authentication method for the TEAP method's inner method.

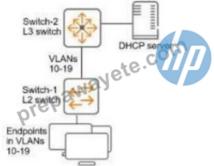

Answer: D

Explanation:

To set up HPE Aruba Networking ClearPass Policy Manager (CPPM) to enforce certificate-based authentication for clients using Tunneled EAP (TEAP), you need to select an EAP-TLS-type authentication method for TEAP's inner method. TEAP allows for a combination of certificate-based (EAP-TLS) and password-based (EAP-MSCHAPv2) authentication. By choosing EAP-TLS as the inner method, you ensure that the clients are authenticated using their certificates, thus enforcing certificate-based authentication within the TEAP framework.

NEW QUESTION #59

Refer to the exhibit.

You have verified that AOS-CX Switch-1 has constructed an IP-to-MAC binding table in VLANs 10-19. Now you need to enable ARP inspection for the endpoint connected to Switch-1. What must you do first to prevent traffic disruption?

- A. Configure Switch-1 uplinks as trusted ARP inspection ports.
- B. Create a static IP-to-MAC binding on Switch-1 for the DHCP server.
- C. Configure ARP inspection on VLANs 10-19 on Switch-2.
- D. Configure DHCP snooping on VLANs 10-19 on Switch-2.

Answer: A

Explanation:

Dynamic ARP Inspection (DAI):

- * ARP inspection verifies ARP packets against a trusted IP-to-MAC binding table to prevent ARP spoofing attacks.
- * DHCP snooping is required to construct the IP-to-MAC binding table dynamically.
- * To avoid traffic disruption, uplink ports that connect to trusted switches, DHCP servers, or routers must be explicitly configured as trusted ports for ARP inspection.

Steps to Prevent Traffic Disruption:

- * Trust the Uplinks: ARP inspection must treat uplink ports as trusted to allow ARP traffic from legitimate DHCP servers and upstream switches.
- * Enable DHCP Snooping: DHCP snooping must be enabled on Switch-2 to ensure consistent IP-to- MAC bindings upstream. Why the Answer is Correct:
- * Option A: Incorrect. ARP inspection on Switch-2 is important but not required first to prevent disruption on Switch-1.
- * Option B: Incorrect. DHCP snooping must be enabled upstream eventually, but this alone will not stop immediate traffic disruption on Switch-1.
- * Option C: Correct. Switch-1 uplinks must be trusted ARP inspection ports first to allow legitimate upstream traffic and prevent ARP disruption.
- * Option D: Incorrect. Static bindings are not required if DHCP snooping is enabled, and they are manual, limiting scalability. Conclusion:

To avoid traffic disruption, configure Switch-1 uplinks as trusted ARP inspection ports to ensure valid ARP traffic can pass upstream and downstream.

NEW QUESTION #60

Disposable vapes

....

Since the childhood, we seem to have been studying and learning seems to take part in different kinds of the purpose of the test, at the same time, we always habitually use a person's score to evaluate his ability. And our HPE7-A02 study materials can help you get better and better reviews. This is a very intuitive standard, but sometimes it is not enough comprehensive, therefore, we need to know the importance of getting the test HPE7-A02 Certification, qualification certificate for our future job and development is an important role.
