## SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q22-Q27):

### NEW QUESTION # 22

A retail company is struggling to manage customer relationships effectively, resulting in decreased customer satisfaction and declining sales. They need an SAP solution that helps streamline sales processes, personalize customer interactions, and improve service management. Which SAP solutions should they implement? There are 3 correct answers to this question.

- A. SAP BusinessObjects Analytics
- B. SAP SuccessFactors
- C. SAP Extended Warehouse Management (EWM)
- D. SAP Customer Relationship Management (CRM)
- E. SAP Predictive Analytics

Answer: A,D,E

### NEW QUESTION # 23

A multinational company is struggling with fragmented data across different departments, leading to inefficiencies in finance, procurement, and supply chain operations. They need an SAP solution that integrates these business processes into a unified system with real-time data access. Which SAP solutions should they implement? There are 3 correct answers to this question.

- A. SAP S/4HANA
- B. SAP SuccessFactors
- C. SAP ERP
- D. SAP BusinessObjects
- E. SAP Ariba

**Answer: A,C,D**

### NEW QUESTION # 24

What are some characteristics of trustworthy business AI? Note: There are 3 correct answers to this question.

- A. Relevant
- B. Resourceful
- C. Reusable
- D. Responsible
- E. Reliable

**Answer: A,D,E**

Explanation:

Trustworthy business AI is a cornerstone of SAP's Business AI strategy, ensuring that AI solutions are ethical, effective, and aligned with enterprise needs. SAP emphasizes characteristics that build trust in AI deployments, particularly in the context of SAP Business Data Cloud and SAP S/4HANA, to deliver outcomes that are dependable and business-ready. The question asks for the characteristics of trustworthy business AI, with three correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" and "SAP Business AI" narratives.

\* Option A: Resourceful While being resourceful (i.e., efficiently utilizing resources) may be a desirable trait for AI systems in general, it is not explicitly identified as a characteristic of trustworthy business AI in SAP's documentation. SAP focuses on attributes like relevance, responsibility, and reliability to define trustworthiness, emphasizing ethical and dependable outcomes over resource efficiency. The term "resourceful" does not appear in the context of trustworthy AI in the provided materials. Extract:

"SAP Business AI is built on a foundation of responsible AI, ensuring transparency, fairness, and compliance. Our solutions prioritize ethical AI practices to minimize bias and deliver trusted outcomes for your business." This option is incorrect.

\* Option B: Reusable Reusability, such as reusing AI models or data products across applications, is a practical feature in some AI systems but is not a defining characteristic of trustworthy business AI according to SAP's framework. Trustworthy AI is more about ensuring the AI is ethical, accurate, and contextually appropriate, rather than its ability to be reused. The documentation does not highlight reusability as a key attribute of trustworthy AI, focusing instead on attributes that ensure trust and dependability. Extract:

"Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." This option is incorrect.

\* Option C: Relevant Relevance is a critical characteristic of trustworthy business AI, ensuring that AI outputs are contextually appropriate and aligned with specific business needs. SAP's Business AI, including tools like Joule and SAP Business Data Cloud, leverages semantically rich data to deliver AI insights that are relevant to business processes in areas like Finance, Supply Chain, and HR. The documentation explicitly identifies relevance as a key attribute, emphasizing that trustworthy AI must provide meaningful, business-specific results. Extract: "Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." Extract: "SAP Business AI delivers relevant outcomes by embedding AI into business processes, ensuring that insights and recommendations are tailored to your specific business context." This option is correct.

\* Option D: Responsible Responsibility is a fundamental characteristic of trustworthy business AI, encompassing ethical practices, transparency, and fairness to minimize bias and ensure compliance with regulations. SAP's AI strategy prioritizes responsible AI to build trust, ensuring that AI systems operate ethically and align with corporate governance standards. This is a core focus in SAP's documentation and marketing materials, making it a key characteristic of trustworthy AI. Extract: "SAP Business AI is built on a foundation of responsible AI, ensuring transparency, fairness, and compliance. Our solutions prioritize ethical AI practices to minimize bias and deliver trusted outcomes for your business." Extract:

"Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." This option is correct.

\* Option E: Reliable Reliability is a crucial characteristic of trustworthy business AI, ensuring that AI systems deliver consistent, accurate, and dependable results. SAP emphasizes reliability to ensure that AI outputs can be trusted for critical business decisions, supported by high-quality data and robust governance. The documentation consistently highlights reliability as a key attribute of trustworthy AI, particularly in the context of SAP Business Data Cloud and SAP Business AI. Extract: "Foster reliable AI: Ensure data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." Extract: "SAP Business AI ensures reliable outcomes by leveraging trusted data and advanced governance, enabling businesses to depend on AI for critical decision-making." This option is correct.

Summary of Correct Answers:

\* C: Relevant AI ensures contextually appropriate, business-specific outcomes, aligning with enterprise needs.

\* D: Responsible AI prioritizes ethical practices, transparency, and fairness to minimize bias and ensure compliance.

\* E: Reliable AI delivers consistent, accurate, and dependable results, building trust in business applications.
