

# Free DP-600 Practice | Test DP-600 Pattern

DOWNLOAD the newest PDFBraindumps DP-600 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1\\_iR7MGAG6M6HjvXs4DPi3LjpuMKluZ2d](https://drive.google.com/open?id=1_iR7MGAG6M6HjvXs4DPi3LjpuMKluZ2d)

Before clients purchase our DP-600 test torrent they can download and try out our product freely to see if it is worthy to buy our DP-600 exam questions. You can visit the pages of our DP-600 training guide on the website which provides the demo of our DP-600 study torrent and you can see parts of the titles and the form of our software. IF you have any question about our DP-600 Exam Questions, there are the methods to contact us, the evaluations of the client on our DP-600 practice guide, the related exams and other information about our DP-600 test torrent.

## Microsoft DP-600 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Maintain a data analytics solution:</b> This section of the exam measures the skills of administrators and covers tasks related to enforcing security and managing the Power BI environment. It involves setting up access controls at both workspace and item levels, ensuring appropriate permissions for users and groups. Row-level, column-level, object-level, and file-level access controls are also included, alongside the application of sensitivity labels to classify data securely. This section also tests the ability to endorse Power BI items for organizational use and oversee the complete development lifecycle of analytics assets by configuring version control, managing Power BI Desktop projects, setting up deployment pipelines, assessing downstream impacts from various data assets, and handling semantic model deployments using XMLA endpoint. Reusable asset management is also a part of this domain.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Implement and manage semantic models:</b> This section of the exam measures the skills of architects and focuses on designing and optimizing semantic models to support enterprise-scale analytics. It evaluates understanding of storage modes and implementing star schemas and complex relationships, such as bridge tables and many-to-many joins. Architects must write DAX-based calculations using variables, iterators, and filtering techniques. The use of calculation groups, dynamic format strings, and field parameters is included. The section also includes configuring large semantic models and designing composite models. For optimization, candidates are expected to improve report visual and DAX performance, configure Direct Lake behaviors, and implement incremental refresh strategies effectively.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Prepare data:</b> This section of the exam measures the skills of engineers and covers essential data preparation tasks. It includes establishing data connections and discovering sources through tools like the OneLake data hub and the real-time hub. Candidates must demonstrate knowledge of selecting the appropriate storage type—lakehouse, warehouse, or eventhouse—depending on the use case. It also includes implementing OneLake integrations with Eventhouse and semantic models. The transformation part involves creating views, stored procedures, and functions, as well as enriching, merging, denormalizing, and aggregating data. Engineers are also expected to handle data quality issues like duplicates, missing values, and nulls, along with converting data types and filtering. Furthermore, querying and analyzing data using tools like SQL, KQL, and the Visual Query Editor is tested in this domain.</li></ul>

## Quiz 2026 DP-600: Valid Free Implementing Analytics Solutions Using Microsoft Fabric Practice

Our DP-600 test prep attaches great importance to a skilled, trained and motivated workforce as well as the company's overall performance. Adhere to new and highly qualified DP-600 quiz guide to meet the needs of customer, we are also committed to providing the first -class after-sale service. There will be our customer service agents available 24/7 for your supports; any request for further assistance or information about DP-600 Exam Torrent will receive our immediate attention.

### Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q96-Q101):

#### NEW QUESTION # 96

You have a Fabric tenant that contains a lakehouse named Lakehouse1.

You need to prevent new tables added to Lakehouse1 from being added automatically to the default semantic model of the lakehouse.

What should you configure?

- A. the workspace settings
- B. the Lakehouse1 settings
- C. the semantic model settings
- D. the SQL analytics endpoint settings

**Answer: D**

Explanation:

You need to prevent new tables added to Lakehouse1 from being added automatically to the default semantic model of the lakehouse.

<https://learn.microsoft.com/en-us/fabric/data-warehouse/semantic-models> but "Sync the default Power BI semantic model".

#### NEW QUESTION # 97

You need to design a semantic model for the customer satisfaction report.

Which data source authentication method and mode should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

Authentication method: Service principal authentication

Mode: DirectQuery

**Answer:**

Explanation:

Answer Area

Microsoft

Authentication method:

- Basic authentication
- Service principal authentication**
- Single sign-on (SSO) authentication

Mode:

- Direct Lake
- DirectQuery**
- Import

Explanation:

Answer Area

Authentication method:

Mode:

For the semantic model design required for the customer satisfaction report, the choices for data source authentication method and mode should be made based on security and performance considerations as per the case study provided.

Authentication method: The data should be accessed securely, and given that row-level security (RLS) is required for users executing T-SQL queries, you should use an authentication method that supports RLS.

Service principal authentication is suitable for automated and secure access to the data, especially when the access needs to be controlled programmatically and is not tied to a specific user's credentials.

Mode: The report needs to show data as soon as it is updated in the data store, and it should only contain data from the current and previous year. DirectQuery mode allows for real-time reporting without importing data into the model, thus meeting the need for up-to-date data. It also allows for RLS to be implemented and enforced at the data source level, providing the necessary security measures.

Based on these considerations, the selections should be:

- \* Authentication method: Service principal authentication
- \* Mode: DirectQuery

### NEW QUESTION # 98

You have a Fabric tenant named Tenant1 that contains a workspace named WS1. WS1 uses a capacity named C1 and contains a dataset named DS1. You need to ensure read-write access to DS1 is available by using the XMLA endpoint. What should be modified first?

- A. the Tenant1 settings
- **B. the C1 settings**
- C. the WS1 settings
- D. the DS1 settings

**Answer: B**

### NEW QUESTION # 99

You have a Microsoft Power BI project that contains a semantic model. You plan to use Azure DevOps for version control.

You need to modify the .gitignore file to prevent the data values from the data sources from being pushed to the repository. Which file should you reference?

- **A. localSettings.json**
- B. cache.abf
- C. unappliedChanges.json
- D. model.bim

**Answer: A**

#### NEW QUESTION # 100

You have a Fabric tenant that contains a semantic model named Model1. Model1 uses Import mode. Model1 contains a table named Orders. Orders has 100 million rows and the following fields.

Name	Data type	Description
OrderId	Integer	Column imported from the source
OrderDateTime	Date/time	Column imported from the source
Quantity	Integer	Column imported from the source
Price	Decimal	Column imported from the source
TotalSalesAmount	Decimal	Calculated column that multiplies Quantity and Price
TotalQuantity	Integer	Measure

You need to reduce the memory used by Model1 and the time it takes to refresh the model. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- **A. Replace TotalSalesAmount with a measure.**
- B. Split OrderDateTime into separate date and time columns.
- **C. Replace TotalQuantity with a calculated column.**
- D. Convert Quantity into the Text data type.

**Answer: A,C**

Explanation:

To reduce memory usage and refresh time, splitting the OrderDateTime into separate date and time columns (A) can help optimize the model because date/time data types can be more memory-intensive than separate date and time columns. Moreover, replacing TotalSalesAmount with a measure (D) instead of a calculated column ensures that the calculation is performed at query time, which can reduce the size of the model as the value is not stored but calculated on the fly. Reference = The best practices for optimizing Power BI models are detailed in the Power BI documentation, which recommends using measures for calculations that don't need to be stored and adjusting data types to improve performance.

#### NEW QUESTION # 101

.....

Many candidates said that they failed once, now try the second time but they still have no confidence, they want to know if our DP-600 braindumps PDF materials can help them clear exam 100%. We say "Yes, 100% passing rate for most exams". They would like to purchase DP-600 Braindumps Pdf materials since they understand the test cost is quite expensive and passing exam is not really easy. Why not choose DP-600 braindumps PDF materials at the beginning?
