Palo Alto Networks XSIAM Analyst practice exam guide & XSIAM-Analyst actual test cram

Our service tenet is to let the clients get the best user experiences and be satisfied. From the research, compiling, production to the sales, after-sale service, we try our best to provide the conveniences to the clients and make full use of our XSIAM-Analyst study materials. We organize the expert team to compile the XSIAM-Analyst Study Materials elaborately and constantly update them. To let the clients have a fundamental understanding of our XSIAM-Analyst study materials, we provide the free trials before their purchasing.

Palo Alto Networks XSIAM Analyst Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which two methods can be used to create and share queries into the Query Library? (Choose two.)

- A. From the Query Center, in the XQL query field, define the parameters of the query. Save as, and choose the "Query to Library" option. Enable the "Share with others" option
- B. From XQL Search, locate the query to save to a personal Query Library. Right-click, and select "Save query to library". Enable the "Share with others" option
- C. From XQL Search, in the XQL query field, define the parameters of the query. Save as, and choose the "Query to Library" option. Enable the "Share with others" option
- D. From the Query Center, locate the query to save to a personal Query Library. Right-click, and select "Save query to library". Enable the "Share with others" option

Answer: B,C

Explanation:

The correct answers are B and C.

* From XQL Search, you can save existing queries directly to your personal Query Library and then choose to share them with others by enabling the sharing option.

* You can also build new queries in the XQL Search field, then use "Save as" and select "Query to Library," followed by enabling the "Share with others" option.

"Queries can be created and saved to the Query Library from XQL Search either by saving existing queries or using the 'Save as' feature after building a new query. The 'Share with others' option allows for team collaboration." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Page: Page 25 (Dashboards, Reports, and Widgets section)

NEW QUESTION # 19

What is the cause when alerts generated by a correlation rule are not creating an incident?

- A. The rule is using the preconfigured Cortex XSIAM alert field mapping.
- B. The rule has alert suppression enabled.
- C. The rule does not have a drill-down query configured.
- D. The rule is configured with alert severity below Medium.

Answer: D

Explanation:

For Correlation rules a case is automatically opened only if the generated issue/alert has a severity of Medium or higher. Issues generated with Low or Information severity are not grouped into cases automatically.

NEW QUESTION # 20

You notice a sudden spike in alerts from multiple endpoints. Cortex XSIAM automatically creates an incident. What are the two most likely factors that triggered this?

Response:

- A. Manual case creation by analyst
- B. Matching a high-priority threat intelligence feed
- C. Aggregated alerts with common indicators
- D. Predefined incident scoring threshold

Answer: B,C

NEW QUESTION # 21

In Cortex XSIAM, what initiates the execution of a playbook?

Response:

- A. Alert correlation
- B. SIEM log entry
- C. Query Library hit
- D. Incident trigger or manual run

Answer: D

NEW QUESTION # 22

In which two locations can mapping be configured for indicators? (Choose two.)

- A. Indicator Configuration in Object Setup
- B. Feed Integration settings
- C. Classification & Mapping tab
- D. STIX parser code

Answer: B,C

Explanation:

The correct answers are A (Feed Integration settings) and B (Classification & Mapping tab).

* Feed Integration settings: Mapping of indicator fields can be configured directly within the feed integration configuration, allowing incoming threat intelligence feeds to be parsed and mapped correctly to XSIAM fields.

* Classification & Mapping tab: This tab is available in various integration and indicator settings, enabling detailed field mapping and classification logic for incoming indicators.

"Mapping for indicators can be set within the Classification & Mapping tab or during Feed Integration setup to ensure proper parsing and normalization." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Page: Page 36 (Threat Intel Management section)

NEW QUESTION # 23

.....

Palo Alto Networks is one of the most powerful and rapidly growing fields nowadays. Everyone is trying to get the Palo Alto Networks XSIAM-Analyst certification to improve their futures with it. Success in the test plays an important role in the up gradation of your CV and getting a good job or working online to achieve your dreams. The students are making up their minds for the Palo Alto Networks XSIAM-Analyst test but they are mostly confused about where to prepare for it successfully on the first try.
