ISO-IEC-27001-Foundation 시험응시 & ISO-IEC-27001-Foundation 최신버전 덤프 공부

아직도 APMG-International ISO-IEC-27001-Foundation 인증 시험을 어떻게 패스할지 고민하시고 계십니까? ITDumpsKR는 여러분이 APMG-International ISO-IEC-27001-Foundation 덤프 자료로 APMG-International ISO-IEC-27001-Foundation 인증 시험에 응시하여 안전하게 자격증을 취득할 수 있도록 도와드립니다. APMG-International ISO-IEC-27001-Foundation 시험 가이드를 사용해 보지 않으실래요? ITDumpsKR는 여러분께 APMG-International ISO-IEC-27001-Foundation 시험 패스의 편리를 드릴 수 있다고 굳게 믿고 있습니다.

최신 ISO/IEC 27001 ISO-IEC-27001-Foundation 무료 샘플 문제 (Q36-Q41):

질문 # 36

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Ensuring information security objectives are established
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization
- D. Producing a risk assessment report

정답: A

설명:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

질문 # 37

Which of the following is required to be considered when selecting appropriate information security risk treatment options?

- A. Only risk controls in Annex A of ISO/IEC 27001
- B. Criteria for performing risk assessments
- C. Criteria for accepting identified risks
- D. Only risk controls in ISO/IEC 27002

정답: C

설명:

Clause 6.1.3 (c) requires organizations to:

"compare the controls determined in 6.1.3 b) with those in Annex A and verify that no necessary control has been omitted; and prepare a Statement of Applicability." It also requires organizations to select risk treatment options considering "the organization's risk acceptance criteria." This shows that risk acceptance criteria are a fundamental factor when selecting risk treatment options.

Options C and D are incorrect because Annex A and ISO/IEC 27002 are reference sets, not the sole sources of controls - organizations can design their own. Criteria for performing risk assessments (B) are part of 6.1.2 (risk assessment process), not risk treatment.

Thus, the correct requirement is A: Criteria for accepting identified risks.

질문 # 38

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Hold up-to-date records on training, skills, experience and qualifications

- B. Ensure that the controls for compliance with legal and contractual requirements are implemented
- C. Identify products which could be used in the organization to improve ISMS performance and effectiveness
- D. Ensure all personnel are trained to ISO/IEC 27001 Foundation level

정답: A

설명:

Clause 7.2 (Competence) requires the organization to:

- * "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"
- * "ensure that these persons are competent on the basis of appropriate education, training, or experience;"
- * "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation-level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

질문 # 39

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Auditors who audit each area of operation
- **B. Top management of the organization**
- C. Management responsible for each area of operation
- D. ISO/IEC 27001 practitioners within the organization

정답: B

설명:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

질문 # 40

Which statement about the conduct of audits is true?

- A. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- B. Third party audits are conducted by a customer of the organization
- **C. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- D. During Stage 1 of a certification audit, evidence is collected by observing activities

정답: C

설명:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC 17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

질문 # 41
