

# 300-710 Exam Cost, Latest 300-710 Mock Exam

P.S. Free & New 300-710 dumps are available on Google Drive shared by FreeDumps: [https://drive.google.com/open?id=1\\_T17egf\\_4qgKJUHI43YL7vHfn-tgyvZB](https://drive.google.com/open?id=1_T17egf_4qgKJUHI43YL7vHfn-tgyvZB)

The FreeDumps Cisco 300-710 exam dumps are ready for quick download. Just choose the right FreeDumps Cisco 300-710 exam questions format and download it after paying an affordable FreeDumps Securing Networks with Cisco Firepower (300-710) practice questions charge and start this journey. Best of luck in Cisco 300-710 exam and career!!!

Cisco 300-710 certification exam is an excellent way for IT professionals to demonstrate their expertise in securing network infrastructures using Cisco Firepower technology. It validates their skills and knowledge in implementing, configuring, and managing Cisco Firepower NGFW and FMC, as well as their ability to detect and respond to security threats in real-time. Passing 300-710 Exam can enhance their career prospects and open up new opportunities in the field of network security.

## Free PDF Cisco - 300-710 High Hit-Rate Exam Cost

We are glad to introduce the 300-710 study materials from our company to you. We believe our study materials will be very useful and helpful for all people who are going to prepare for the 300-710 exam. There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the 300-710 Study Materials for all customers.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q379-Q384):

### NEW QUESTION # 379

An organization has noticed that malware was downloaded from a website that does not currently have a known bad reputation. How will this issue be addressed globally in the quickest way possible and with the least amount of impact?

- A. by Isolating the endpoint
- **B. by creating a URL object in the policy to block the website**
- C. Cisco Talos will automatically update the policies.
- D. by denying outbound web access

**Answer: B**

### NEW QUESTION # 380

An engineer is troubleshooting a device that cannot connect to a web server. The connection is initiated from the Cisco FTD inside interface and attempting to reach 10.0.1.100 over the non-standard port of 9443. The host the engineer is attempting the connection from is at the IP address of 10.20.10.20. In order to determine what is happening to the packets on the network, the engineer decides to use the FTD packet capture tool. Which capture configuration should be used to gather the information needed to troubleshoot this issue?

- **A.**
- B.
- C.
- D.

**Answer: A**

### NEW QUESTION # 381

A network administrator is reviewing a packet capture. The packet capture from inside of Cisco Secure Firewall Threat Defense shows the inbound TCP traffic. However, the outbound TCP traffic is not seen in the packet capture from outside Secure Firewall Threat Defense. Which configuration change resolves the issue?

- A. Packet capture must include UDP traffic.
- B. Inside interface must be assigned a lower security level.
- **C. Route to the destination must be added.**
- D. Inside interface must be assigned a higher security level.

**Answer: C**

### NEW QUESTION # 382

An engineer is deploying failover capabilities for a pair of Cisco Secure Firewall devices. The core switch keeps the MAC address of the previously active unit in the ARP table. Which action must the engineer take to minimize downtime and ensure that network users keep access to the internet after a Cisco Secure Firewall failover?

- A. Run a script to send gratuitous ARP after a failover.
- B. Set the same MAC address on both units.
- C. Add the MAC address to the switch ARP table.
- **D. Use a virtual MAC address on both units**

**Answer: D**

### NEW QUESTION # 383

When an engineer captures traffic on a Cisco FTD to troubleshoot a connectivity problem, they receive a large amount of output data in the GUI tool. The engineer found that viewing the Captures this way is time-consuming and difficult to scan and filter. Which

file type must the engineer export the data in so that it can be reviewed using a tool built for this type of analysis?

- A. IPFIX
- B. NetFlow v5
- **C. PCAP**
- D. NetFlow v9

**Answer: C**

Explanation:

Explanation

When capturing traffic on a Cisco FTD device to troubleshoot a connectivity problem, a file type that can be exported for reviewing using a tool built for this type of analysis is PCAP. PCAP stands for Packet Capture and it is a file format used to store network packet data captured from a network interface. PCAP files contain the raw data of network packets, including the headers and payloads of each packet.

PCAP files are widely used in network analysis and troubleshooting tasks. They enable network administrators, analysts, and researchers to inspect and analyze network traffic for various purposes, such as diagnosing network issues, detecting malicious activity, measuring network performance, and understanding network protocols. PCAP files can be read by applications that understand that format, such as Wireshark, tcpdump, CA NetMaster, or Microsoft Network Monitor.

The other options are incorrect because:

NetFlow v9 is not a file type, but a protocol for collecting and exporting information about network flows. A network flow is a sequence of packets that share common attributes such as source and destination IP addresses, ports, and protocols. NetFlow v9 records contain summary information about network flows, such as start and end times, byte counts, packet counts, and so on. NetFlow v9 records do not contain the raw data of network packets.

NetFlow v5 is not a file type, but an earlier version of the NetFlow protocol for collecting and exporting information about network flows. NetFlow v5 records contain similar information as NetFlow v9 records, but with fewer fields and less flexibility. NetFlow v5 records do not contain the raw data of network packets.

IPFIX is not a file type, but a protocol for collecting and exporting information about network flows. IPFIX stands for IP Flow Information Export and it is based on NetFlow v9, but with some extensions and improvements. IPFIX records contain similar information as NetFlow v9 records, but with more fields and more flexibility. IPFIX records do not contain the raw data of network packets.

## NEW QUESTION # 384

.....

The FreeDumps is committed to providing the best possible study material to succeed in the Securing Networks with Cisco Firepower (300-710) exam. With actual PDF questions, customizable practice exams, and 24/7 support, customers can be confident that they are getting the best possible prep material. The FreeDumps 300-710 is an excellent choice for anyone looking to advance their career with the certification. Buy Now.
