Holding a Designing Microsoft Azure Infrastructure Solutions AZ-305 Certification in a certain field definitely shows that one have a good command of the AZ-305 knowledge and professional skills in the related field. However, it is universally accepted that the majority of the candidates for the Designing Microsoft Azure Infrastructure Solutions exam are those who do not have enough spare time and are not able to study in the most efficient way.

Microsoft AZ-305 exam covers a wide range of topics related to Azure infrastructure, including designing and implementing Azure compute solutions, designing and implementing Azure storage solutions, designing and implementing Azure networking solutions, and designing and implementing Azure security solutions. Candidates are also tested on their ability to manage Azure resources, configure and manage virtual networks, and implement Azure load balancing and traffic management solutions. AZ-305 exam is intended for professionals who are already familiar with Azure services and have experience working with them.

Microsoft AZ-305 certification exam is part of the Microsoft Certified: Azure Solutions Architect Expert certification path. Designing Microsoft Azure Infrastructure Solutions certification is designed for professionals who have expertise in designing and implementing solutions that run on Microsoft Azure. By earning the Azure Solutions Architect Expert certification, you demonstrate that you have the skills and knowledge needed to design and implement solutions that meet the needs of your organization, while also ensuring scalability, availability, and security. The AZ-305 Exam is an important step towards achieving this certification, and it is a great way to demonstrate your expertise in designing and implementing Azure infrastructure solutions.

Microsoft AZ-305 certification exam is designed for Azure architects and engineers who are responsible for designing and implementing solutions in Microsoft Azure. AZ-305 exam is aimed at professionals who have experience with Azure technologies and services, and who have a good understanding of cloud computing concepts, including virtualization, storage, networking, and security. The AZ-305 exam tests your ability to design and implement solutions that meet the requirements of your organization, while also ensuring scalability, availability, and security.

Infrastructure Solutions Dumps Free

To make sure that our candidates can learn the AZ-305 preparation materials in the least time with the least efforts, they have compiled all of the content to be contained in the shortest possible number of AZ-305 exam questions. Additionally, the AZ-305 exam questions and answers have been designed on the format of the real exam so that the candidates learn it without any extra effort. We have carefully considered every aspects for our customers. And our AZ-305 Practice Braindumps are perfect in every detail.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q317-Q322):

NEW QUESTION # 317

You design a solution for the web tier of WebApp1 as shown in the exhibit.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

☐ Explanation:

Box 1: Yes

Any new deployments to Azure must be redundant in case an Azure region fails.

Traffic Manager uses DNS to direct client requests to the most appropriate service endpoint based on a traffic-routing method and the health of the endpoints. An endpoint is any Internet-facing service hosted inside or outside of Azure. Traffic Manager provides a range of traffic-routing methods and endpoint monitoring options to suit different application needs and automatic failover models.

Traffic Manager is resilient to failure, including the failure of an entire Azure region.

Box 2: Yes

Recent changes in Azure brought some significant changes in autoscaling options for Azure Web Apps (i.e.

Azure App Service to be precise as scaling happens on App Service plan level and has effect on all Web Apps running in that App Service plan).

Box 3: No

Traffic Manager provides a range of traffic-routing methods and endpoint monitoring options to suit different application needs and automatic failover models. Traffic Manager is resilient to failure, including the failure of an entire Azure region.

NEW QUESTION # 318

You need to design an architecture to capture the creation of users and the assignment of roles. The captured data must be stored in Azure Cosmos DB.

Which Azure services should you include in the design? To answer, drag the appropriate services to the correct targets. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐

NEW QUESTION # 319

You have an Azure AD tenant that contains a management group named MG1. You have the Azure subscriptions shown in the following table.

☐ The subscriptions contain the resource groups shown in the following table.

☐ The subscription contains the Azure AD security groups shown in the following table.

☐ The subscription contains the user accounts shown in the following table.

☐ You perform the following actions:

* Assign User3 the Contributor role for Sub1.

* Assign Group1 the Virtual Machine Contributor role for MG1.

* Assign Group3 the Contributor role for the Tenant Root Group.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 320

You plan to deploy a network-intensive application to several Azure virtual machines.

You need to recommend a solution that meets the following requirements:

Minimizes the use of the virtual machine processors to transfer data

Minimizes network latency

Which virtual machine size and feature should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 321

You have a resource group named RG1 that contains the objects shown in the following table.

You need to configure permissions so that App1 can copy all the secrets from KV1 to KV2. App1 currently has the Get permission for the secrets in KV1.

Which additional permissions should you assign to App1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

Box 1: List

Get: Gets the specified Azure key vault.

List: The List operation gets information about the vaults associated with the subscription.

Box 2: Create

Create Or Update: Create or update a key vault in the specified subscription.
