SAP C_WME_2506 시험요강:

| 주제 | 소개 |
|------|--|
| 주제 1 | <ul style="list-style-type: none"> Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation. |
| 주제 2 | <ul style="list-style-type: none"> Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications. |
| 주제 3 | <ul style="list-style-type: none"> Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise. |

질문 # 21

Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto-Toggle?

- A. Because Manual Toggle consumes more resources than Auto-Toggle
- B. To ensure that the Manual Toggle is only available for administrators
- C. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly
- D. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings

정답: D

설명:

WalkMe's multi-language feature allows content to be displayed in different languages, with two toggle options: Auto-Toggle, which automatically selects the language based on user settings (e.g., browser or account preferences), and Manual Toggle, which lets users manually choose their language. When both toggles are enabled, a user's manual language selection can override the Auto-Toggle's automatic detection, leading to conflicts and inconsistent user experiences. Disabling the Manual Toggle ensures that the Auto-Toggle functions as intended, delivering content in the user's preferred language without interference.

The other options are incorrect:

- * Option A is wrong because the Manual Toggle is not restricted to administrators; it's available to end users.
- * Option B is misleading, as there's no evidence that Manual Toggle consumes significantly more resources.
- * Option D is incorrect, as neither toggle typically causes unexpected page refreshes.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.8: Multi-Language Support):

"When using Auto-Toggle for multi-language content, it is recommended to disable the Manual Toggle to avoid conflicts. Manual selections by users can override Auto-Toggle settings, leading to inconsistent language display." The course Advancing Your Skills in Building WalkMe Solutions states:

"To ensure a seamless multi-language experience, disable the Manual Toggle when Auto-Toggle is active.

This prevents user overrides that could disrupt the automatic language detection process." Option C correctly explains the recommendation to disable the Manual Toggle to prevent conflicts.

질문 # 22

Which is the syntax that you type into the developer console to check your jQuery selectors using WalkMe?

- A. WMjquery InsertSelectorHere
- B. walkmejQuery("InsertSelectorHere")
- C. wjQuery("InsertSelectorHere")
- D. jQuery("InsertSelectorHere")

정답: C

질문 # 23

What does 'building for value' mean in the context of creating content?

- A. Creating content with an understanding of the business' goals and what they are trying to accomplish.
- B. Creating content that focuses solely on the technical implementation of WalkMe features.
- C. Creating content to prioritize the aesthetic design of the WalkMe interface.
- D. Creating content to ensure that WalkMe content is updated frequently.

정답: A

질문 # 24

What does WalkMe's UI Intelligence feature do?

- A. It forces users to complete forms without assistance
- B. It analyzes form interactions and provides actionable insights
- C. It eliminates the need for data collection
- D. It blocks users from entering incorrect data

정답: B

설명:

WalkMe's UI Intelligence feature analyzes form interactions and provides actionable insights by tracking how users engage with forms (e.g., fields skipped, errors made). This data, available in WalkMe Insights, helps organizations identify friction points, optimize form designs, and improve user completion rates, enhancing overall digital adoption.

The other options are incorrect:

* Forcing form completion(A) is not a WalkMe function; it focuses on guidance.

* Blocking incorrect data(B) is partially true for Validation SmartTips, but not UI Intelligence's role.

* Eliminating data collection(D) is false; UI Intelligence relies on data collection.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.7: UI Intelligence):

"UI Intelligence analyzes user interactions with forms, providing insights into completion rates and errors to optimize form usability and user experience." The course WalkMe Fundamentals explains:

"UI Intelligence delivers actionable insights by tracking form interactions, helping organizations address user challenges and improve process efficiency." Option C accurately describes the UI Intelligence feature.

질문 # 25

What is WalkMe known as the leading provider of?

- A. Digital Application Platform
- **B. Digital Adoption Platform**
- C. Direct Adoption Program
- D. Dynamic Assistance Provider

정답: B

설명:

WalkMe is recognized as the leading provider of a Digital Adoption Platform (DAP), which helps organizations ensure employees and customers effectively use digital tools and platforms. A DAP provides tools like in-app guidance, analytics, and automation to enhance user adoption, streamline processes, and reduce friction in digital experiences.

The other options are incorrect:

- * Digital Application Platform(A) refers to app development platforms, not adoption.
- * Dynamic Assistance Provider(B) is not an industry term.
- * Direct Adoption Program(C) is not a recognized category.

Extract from Official WalkMe Documentation:

According to the SAP WalkMe Digital Adoption Consultant Study Guide (Section 1.1: Introduction to Digital Adoption):

"WalkMe is the leading provider of a Digital Adoption Platform (DAP), delivering solutions that drive effective use of digital platforms through guidance and analytics." The course Getting Started with Building WalkMe Solutions states:

"As a Digital Adoption Platform, WalkMe empowers organizations to maximize software adoption and user efficiency with tools like Smart Walk-Thrus and Insights." Option D, Digital Adoption Platform, is the correct answer.
