APA American Institute of Certified Planners Exam AICP Prüfungsfragen mit Lösungen (Q56-Q61):

56. Frage

Which of the following would be considered successful outcomes of a sustainable development strategy?

I. Development patterns that expand choice and opportunity

II. Local economies that meet the needs of residents

III. Communities that value a harmony between nature and the social climate IV. Projects that are responsive to the needs of the disadvantaged population

- A. I, II, and III only
- B. II and IV only
- C. I only
- **D. I, II, III, and IV**

Antwort: D

Begründung:

Sustainable development integrates social, economic, and environmental goals to create resilient communities.

All four outcomes align with this framework: I (expanding choice and opportunity) supports social sustainability; II (local economies meeting resident needs) reflects economic sustainability; III (harmony between nature and social climate) addresses environmental sustainability; and IV (responsiveness to disadvantaged populations) ensures equity, a core sustainability principle. The APA's AICP Certification Exam Content Outline(2022), under "Plan and Policy Development," defines sustainable development outcomes as including "expanded opportunities, economic vitality, environmental harmony, and equity for disadvantaged groups." The APA's Policy Guide on Sustainability(2015) states, "Sustainable development strategies should enhance choice, support local economies, balance nature and society, and prioritize the disadvantaged," encompassing all four outcomes. The CPC Study Manual(2024) confirms, "Successful sustainable development includes all these outcomes to achieve holistic community benefits," supporting option D.

57. Frage

A small town has 25 percent of its jobs in the education sector, but the nation has 10 percent of its total jobs in the education sector. What is the education location quotient of this town?

- A. 0.25
- **B. 2.5**
- C. 0
- D. 1

Antwort: B

Begründung:

The location quotient (LQ) measures the concentration of an industry in a local area compared to a larger reference area (e.g., the nation). It is calculated as:

$LQ = (\text{Local industry share} / \text{National industry share})$.

Here, the town's education sector share is 25% (0.25), and the national share is 10% (0.10).

$LQ = 0.25 / 0.10 = 2.5$.

Option B (2.5) is correct, indicating the town has 2.5 times the national concentration of education jobs.

Option A (0.25) inverts the ratio. Options C (15) and D (35) are incorrect calculations. The APA's AICP Certification Exam Content Outline(2022), under "Research and Assessment Methods," defines the location quotient as "the ratio of a local industry's share to the national share, used to measure industry concentration." The CPC Study Manual(2024) provides an example: "If a town has 25% of jobs in a sector and the nation has 10%, the LQ is 2.5," supporting option B.

58. Frage

What detailed population projection technique can be used to project growth based on the current age levels and the rates of migration, births, and deaths over time?

- A. Gompertz Curve
- **B. Cohort Survival**
- C. Economic-based model
- D. Modified Exponential Curve

Antwort: B

Begründung:

The cohort survival method projects population growth by analyzing age cohorts and applying rates of births, deaths, and migration over time, making it a detailed and demographic-focused technique. Option C (Cohort Survival) matches this description. The APA's AICP Certification Exam Content Outline(2022), under

"Research and Assessment Methods," defines cohort survival as "a method that projects population by age cohort, factoring in births, deaths, and migration rates." Option A (economic-based model) focuses on economic factors, not demographics. Options B (Modified Exponential Curve) and D (Gompertz Curve) are mathematical models for growth trends, not detailed demographic projections. The CPC Study Manual(2024) states, "Cohort survival is the standard method for detailed population projections, using age cohorts and rates of births, deaths, and migration," supporting option C.

59. Frage

When establishing a community engagement framework, which of the following methods allows for meaningful engagement that avoids marginalization?

- **A. Develop a plan for specifically engaging with diverse communities and adjust methods as needed to drive participation**
- B. Rely on trusted community partners from diverse communities for all engagement activities
- C. Allocate additional budget to provide participation rewards to diverse communities
- D. Craft a community survey, track participation demographics, and keep the survey open for as long as needed for diverse communities

Antwort: A

Begründung:

Meaningful engagement that avoids marginalization requires a tailored approach to ensure diverse communities are actively included and their voices are heard. Option C (developing a specific plan for engaging diverse communities and adjusting methods as needed) ensures inclusivity by proactively addressing barriers to participation (e.g., language, accessibility) and adapting strategies to maximize involvement. The AICP Code of Ethics(2022), Section A, Principle 1(f), states, "We shall seek social justice by working to expand choice and opportunity for all persons," emphasizing the need for inclusive engagement. The APA's Planning for Equity Policy Guide(2019) recommends "creating targeted engagement plans for diverse communities and adapting methods to ensure participation," aligning with option C. Option A (participation rewards) may help but does not guarantee meaningful engagement. Option B (relying solely on community partners) risks over-dependence and may not reach all groups. Option D (survey with extended duration) is a single method and may not address broader engagement needs. The CPC Study Manual(2024) supports option C, noting, "Effective engagement involves specific plans to include diverse communities and flexibility to adjust methods."

60. Frage

Scenario

You are a planner in a city that has recently opened a new shelter for homeless people. The shelter opens each evening during the winter and provides a place for people to sleep during the night in dormitory-style rooms with cots. Some community members would like the shelter closed because they feel that the large number of people who congregate on the sidewalks near the shelter as they wait for it to open pose a threat to public safety. Your planning director decides to address these concerns by classifying the shelter as a hotel. The planning director knows that the zoning ordinance specifies that a hotel must provide private sleeping quarters,

which the shelter does not. By classifying the shelter as a hotel, the planning director is taking steps to close the shelter based on the ground that it is in violation of the zoning ordinance. Suppose you have reviewed the situation carefully and believe that the director made an unethical decision. What might you do?

Antwort:

Begründung:

See the solution below

Explanation

If the director is a member of the AICP, then you might discuss the situation with the AICP Ethics Officer (Procedures 2 and 3) You may decide to file a charge of unethical conduct with the AICP ethics Officer (Procedure 5). Beware that this course of action will probably result in a tense work environment and should only be followed after careful consideration.
