NEW QUESTION # 370
Which type of attack is a blank email with the subject "price deduction" that contains a malicious attachment?

- A. phishing attack
- B. integrity violation
- C. smishing
- D. man-in-the-middle attack

Answer: A

Explanation:
A phishing attack often involves sending emails that appear to be from reputable sources with the goal of inducing individuals to reveal personal information, such as passwords and credit card numbers. In this case, the email with the subject "price deduction" containing a malicious attachment is designed to trick the recipient into opening the attachment, which can then execute harmful software on their device

NEW QUESTION # 373

Which two elements are assets in the role of attribution in an investigation? (Choose two.)

- A. threat actor
- B. laptop
- C. firewall logs
- D. session
- E. context

Answer: A,B

Explanation:
In the context of cybersecurity, an asset is anything that has value to the organization, its business operations and their continuity, including data and physical devices. In the role of attribution in an investigation, which is the process of associating an action or event with a particular individual or entity, certain assets are particularly relevant. A laptop can be an asset because it may contain data or clues that can help trace the origin of a cyber attack. Similarly, identifying the threat actor (E) is crucial for attribution, as it involves understanding who is behind the attack and their motives, which can be essential for preventing future attacks and for legal proceedings.
