

Updated 3V0-24.25 Test Cram | 3V0-24.25 Valid Dumps Book

P.S. Free 2026 VMware 3V0-24.25 dumps are available on Google Drive shared by Braindumpsqa:
<https://drive.google.com/open?id=1ul0C8RMkdHsE05WMuPDkgEU7IjH4I53B>

Many people think that passing some difficult VMware certification exams needs to be proficient in much of 3V0-24.25 expertise and only these VMware personnels who grasp the comprehensive knowledge would be able to enroll in the exam. In fact, there are many ways to help you make up for your lack of knowledge, and pass the 3V0-24.25 Certification exams in the same. Perhaps you would spend less time and effort than the people who grasp fairly comprehensive expertise. The saying goes, all roads lead to Rome.

We always strictly claim for our 3V0-24.25 study materials must be the latest version, to keep our study materials up to date, we constantly review and revise them to be at par with the latest VMware syllabus for 3V0-24.25 exam. This feature has been enjoyed by over 80,000 takes whose choose our study materials. The one who choose our study materials that consider our website as the top preparation material seller for 3V0-24.25 Study Materials, and inevitable to carry all candidates the finest knowledge on exam syllabus contents. Not only that, we will provide you a free update service within one year from the date of purchase, in order to keep up the changes in the exam so that every candidates who purchase our 3V0-24.25 study materials can pass the exam one time.

>> Updated 3V0-24.25 Test Cram <<

3V0-24.25 Valid Dumps Book | Reliable 3V0-24.25 Exam Syllabus

The pass rate is 98%, and we also pass guarantee if you buy 3V0-24.25 study materials of us. We have received many good feedbacks of the 3V0-24.25 exam dups. You also enjoy free update for one year after your payment, and if you have any questions about the 3V0-24.25 ExamDumps, just ask our online service stuff, they will give a reply immediately, or you can send email to us, we will answer you as quickly as we can. Therefore, just contact us if you have the confusions about the 3V0-24.25 study materials.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q25-Q30):

NEW QUESTION # 25

An administrator is deploying vSphere Kubernetes Service (VKS) to support containerized workloads across multiple regions. Each

region hosts a dedicated Workload Domain with Supervisor instances deployed on vSphere Distributed Switch (VDS) networking. The organization's security policy requires that pod-to-pod and pod-to-service communications be fully observable and controllable at the Kubernetes layer, without introducing additional licensing or overlay complexity.

When deploying a Supervisor, which CNI should the administrator select as the default supported option?

- A. Calico
- B. Flannel
- **C. Antrea**
- D. Cilium

Answer: C

Explanation:

VCF 9.0 explicitly documents that VKS supports two CNI options: Antrea and Calico, and that the system-defined default CNI is Antrea. This directly eliminates Flannel and Cilium as default supported options for VKS clusters on Supervisor in this context. VCF 9.0 also describes how a vSphere administrator can view or change this setting in the vSphere Client under Supervisor Management → Configure → Kubernetes Service → Default CNI, further reinforcing that Antrea is the baseline/default choice.

From a policy perspective in the question, the requirement is Kubernetes-layer observability and control of pod communications "without additional licensing or overlay complexity." Antrea is presented in VCF 9.0 as the default CNI and is implemented using Open vSwitch, with networking and network policy capabilities provided at the Kubernetes layer for pods and services. Because it is the documented default (and supported) option for new VKS clusters, selecting Antrea best aligns with the "default supported option" requirement.

NEW QUESTION # 26

A VI Administrator is tasked with enabling the Harbor Image Registry on a Supervisor Cluster to provide a local, secure repository for developers. The "Harbor" Supervisor Service definition has already been uploaded to vCenter.

Review the configuration wizard requirements for enabling the service on a specific Supervisor:

1. Select Supervisor: Cluster-1
2. Service: Harbor
3. Configuration:
 - Registry Storage Policy: [Select]
 - Garbage Collection: [Select]
 - Certificate: [Select]

Which prerequisite configuration must exist in the vSphere infrastructure to successfully complete this installation wizard and ensure the registry has persistence?

- **A. A valid vSphere Storage Policy must be available and compatible with the Supervisor's datastores to back the Harbor PVCs (Persistent Volume Claims).**
- B. An NSX Load Balancer VIP must be manually pre-provisioned and entered into the wizard.
- C. A TKG Workload Cluster must already exist in the namespace to host the Harbor pods.
- D. The "VM Service" must be disabled on the Namespace.

Answer: A

NEW QUESTION # 27

A VI Administrator attempts to upgrade the Supervisor Cluster but the option to upgrade is grayed out or unavailable in the vSphere Client, even though a new version is known to be available.

Which of the following are valid reasons for this state? (Select all that apply.)

- A. The "License Service" is down.
- **B. The vCenter Server itself has not been upgraded to a version that supports the new Supervisor release. (The Supervisor version cannot exceed the managing vCenter's compatible version).**
- **C. The ESXi hosts in the cluster are not running a compatible version (e.g., they are on an older build that doesn't support the new Spherelet).**
- **D. The Supervisor Cluster is in a "Warning" or "Error" health state (e.g., invalid certificate, network partition).**
- **E. There are incompatible TKG clusters running on the Supervisor (e.g., a very old Kubernetes version that is deprecated in the target Supervisor release).**

Answer: B,C,D,E

NEW QUESTION # 28

An administrator is operating a sovereign private cloud built on VMware Cloud Foundation (VCF) and is providing isolated Supervisor Namespaces as well as associated Kubernetes clusters. The architecture must ensure consistent provisioning, management, and monitoring of these clusters across tenants while maintaining compliance with internal governance and automation frameworks, considering:

- * Deploying and scaling Kubernetes clusters
- * Managing Supervisor Namespaces and configurations
- * Monitoring cluster health, workloads, and resources across tenants

What three clients are supported for provisioning, managing, and monitoring VMware vSphere Kubernetes Service (VKS) clusters? (Choose three.)

- A. esxtop
- **B. VCF CLI**
- C. esxcli
- **D. vSphere UI**
- **E. kubectl**
- F. Cluster API

Answer: B,D,E

Explanation:

VCF 9.0 states that you can provision Kubernetes clusters using both GUI and CLI approaches, and it explicitly calls out the CLI clients: "the VCF CLI and kubectl provide command-line interfaces for provisioning Kubernetes clusters." That directly maps tokubectl (A)andVCF CLI (E)as supported clients for provisioning and lifecycle operations. Separately, VCF 9.0 explains that vSphere administrators can "manage and monitor vSphere Pods, VMs, and VKS clusters by using the vSphere Client," which corresponds tovSphere UI (C)in the question. In addition, the vSphere Client is used to access Supervisor-facing self- service interfaces (for example, the Local Consumption Interface through the vSphere Client), reinforcing vSphere UI as an operational entry point for managing Supervisor-backed services and workloads.

By contrast,Cluster APIis a controller framework (not an operator "client" for admins in this context), andesxtop/esxcliare ESXi host tools that do not represent the documented, supported interfaces for provisioning and managing VKS clusters at the Kubernetes service layer.

NEW QUESTION # 29

A Cloud Administrator is troubleshooting an issue where the Cluster Autoscaler is thrashing (rapidly scaling up and then immediately scaling down) a TKG cluster.

Review the following sequence of events:

1. 10:00 AM - Traffic spike, HPA scales pods up.
2. 10:01 AM - Cluster Autoscaler adds 2 nodes.
3. 10:05 AM - Traffic drops slightly, HPA scales pods down.
4. 10:06 AM - Cluster Autoscaler deletes 1 node.
5. 10:07 AM - Traffic spikes again, HPA scales pods up.
6. 10:08 AM - Cluster Autoscaler adds 1 node.

This cycle repeats, causing instability.

What is the most effective configuration change to stabilize this cluster? (Select all that apply.)

- **A. Increase the HPA sync period or adjust HPA metrics to be less sensitive to short bursts.**
- B. Enable optimize-allocation mode on the Supervisor.
- C. Disable the Cluster Autoscaler and manually size the cluster for peak load.
- **D. Increase the scale-down-unneeded-time (or scale-down-delay) in the Autoscaler profile to a value longer than the typical traffic fluctuation cycle (e.g., 30 minutes).**
- E. Decrease the max-size of the node pool to prevent it from growing.

Answer: A,D

NEW QUESTION # 30

.....

You can make your dream of passing the VMware 3V0-24.25 exam come true with Braindumpsqa updated VMware 3V0-24.25 practice test questions. Braindumpsqa offer VMware 3V0-24.25 the latest dumps in three formats. VMware 3V0-24.25 desktop practice test software creates a real exam environment so that you can feel like attempting the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service 3V0-24.25 actual exam.

3V0-24.25 Valid Dumps Book: https://www.braindumpsqa.com/3V0-24.25_braindumps.html

There are two versions of Braindumpsqa 3V0-24.25 Valid Dumps Book dumps, VMware Updated 3V0-24.25 Test Cram We suggest that you should at least spend 20-30 minutes before exam, Before you choose our material, you can try our 3V0-24.25 training study free demo to check if it is valuable for you to buy our 3V0-24.25 exam lab questions, VMware Updated 3V0-24.25 Test Cram If we don't try to improve our value, we're likely to be eliminated by society.

This comes from my earlier book Zag, The Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service PDF file is 3V0-24.25 the most common format, which is printable for papers writing and previewing. There are two versions of Braindumpsqa dumps.

We suggest that you should at least spend 20-30 minutes before exam, Before you choose our material, you can try our 3V0-24.25 training study free demo to check if it is valuable for you to buy our 3V0-24.25 exam lab questions.

Quiz High-quality VMware - Updated 3V0-24.25 Test Cram

If we don't try to improve our value, we're likely to be eliminated by society, One remarkable feature of 3V0-24.25 actual dumps questions and answers is their similarity with the real exam scenario.
