Exam EUNA_2024 Questions Pdf - Visual EUNA_2024 Cert Test

Our EUNA_2024 exam guide has high quality of service. We provide 24-hour online service. If you have any questions in the course of using the EUNA_2024 exam questions, you can contact us by email. We will provide you with excellent after-sales service with the utmost patience and attitude. And we will give you detailed solutions to any problems that arise during the course of using the EUNA_2024 practice torrent. And our EUNA_2024 study materials welcome your supervision and criticism. With the company of our EUNA_2024 study materials, you will find the direction of success.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q60-Q65):

NEW QUESTION # 60

A utility company wants to model the open or closed state of valves in its water network and use this property in tracing operations. Which network property should be used, and how?

- A. Terminals, by setting directional flow
- **B. Network attributes, by adding a Status attribute for valves**
- C. Asset groups, by assigning valve type

Answer: B

Explanation:

Network attributes (e.g., "Status") allow tracing to respect open/closed valve conditions.

NEW QUESTION # 61

ArcGIS Utility Network includes a diagram function to visually represent network connectivity. Which elements compose a utility network diagram?

- A. Rules, layouts, and layer definitions
- B. Subnetworks, tiers, and ranks
- C. Asset groups, terminals, and network categories

Answer: A

Explanation:

Diagrams are built from rules (logic), layouts (arrangement), and layer definitions (symbolization).

NEW QUESTION # 62

During editing, a GIS analyst encounters error code 10: "Invalid Connectivity - The edges are different subtypes and cannot connect." What does this error mean, and how can it be resolved?

- A. Invalid terminal paths exist and must be reassigned
- B. Edges belong to different asset groups/types and need a junction or matching subtype to connect
- C. Containment rules are missing and must be added

Answer: B

Explanation:

This occurs when lines of different subtypes are connected without a junction. Fix: adjust subtype, merge lines, or insert a junction with valid rule.

NEW QUESTION # 63

What is the key difference between a domain network and a structure network in ArcGIS Utility Network?

- A. Domain networks define ranks, while structure networks manage terminal paths
- B. Domain networks carry resources, while structure networks provide support
- C. Structure networks enforce connectivity, while domain networks enforce containment

Answer: B

Explanation:

Domain networks model the flow of resources (e.g., water, electricity), while structure networks provide physical support.

NEW QUESTION # 64

What do terminals in ArcGIS Utility Network model?

- A. Categories used to tag subnetwork controllers
- B. Locations or ports where resources flow in and out of devices or junctions
- C. Ranks that define trace order

Answer: B

Explanation:

Terminals model ports where utilities enter/exit devices, such as valves in water systems or breakers in electric networks.

NEW QUESTION # 65

.....

Our EUNA_2024 study materials provide a promising help for your EUNA_2024 exam preparation whether newbie or
