Take Your Exam Preparation to the Next Level with I27001F Web-Based Practice Test

The pass rate is 98.65% for the I27001F exam torrent, and we also pass guarantee and money back guarantee if you fail to pass the exam. We have received many good feedbacks from our customers, and they think highly of our I27001F exam torrent. Besides, we provide you with free demo for you to try before purchasing. We also have free update for I27001F Exam Dumps for one year after buying. And the update version for I27001F exam torrent will send to your email automatically. If you have any other questions just contact with us through online service or by email, and we will give a reply to you as quickly as possible.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which statement describes the difference between ISO/IEC 27001:2022 and ISO/IEC 27002:2022?

- A. ISO/IEC 27002:2022 contains mandatory requirements, while ISO/IEC 27001:2022 provides guidance on information security controls
- **B. ISO/IEC 27001:2022 contains mandatory requirements, while ISO/IEC 27002:2022 provides guidance on information security controls**
- C. ISO/IEC 27002:2022 provides guidance on measurement, and ISO/IEC 27001:2022 provides guidance on information security controls
- D. ISO/IEC 27002:2022 provides mandatory requirements for a risk management approach, and ISO/IEC 27001:2022 contains mandatory requirements for an ISMS

Answer: B

Explanation:

ISO/IEC 27001:2022 is the certifiable standard that contains requirements for establishing, implementing, maintaining, and continually improving an Information Security Management System. ISO/IEC 27002:2022 is not a certifiable requirements standard. It provides guidance for selecting, implementing, and managing information security controls, including the controls referenced in Annex A of ISO/IEC 27001:2022.

Therefore, option C is correct.

NEW QUESTION # 28

Annex A of ISO/IEC 27001:2022 consists of:

- A. Elements necessary for a good design and implementation of the ISMS
- **B. A comprehensive list of controls grouped by themes**
- C. None of the above
- D. Guidelines for risk management

Answer: B

Explanation:

Annex A of ISO/IEC 27001:2022 contains the reference set of information security controls used to support risk treatment decisions. In the 2022 edition, these controls are organized into four themes: organizational, people, physical, and technological controls. Annex A is not a set of ISMS implementation steps and it is not a risk management guideline. Its role is to provide a structured set of control objectives and controls that may be selected as part of risk treatment. Therefore, option B is the correct answer.

NEW QUESTION # 29

According to ISO/IEC 27001:2022, is it necessary to ensure that successive information security risk assessments produce consistent, valid, and comparable results?

- A. It is a recommendation, but not a requirement
- B. It is only an observation to keep in mind when auditing the management system

- C. It is a requirement to be fulfilled
- D. None of the above

Answer: C

Explanation:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk assessment process that produces consistent, valid, and comparable results. This is not optional guidance and not merely an auditing suggestion. It is a formal requirement within the planning and risk assessment requirements of the standard. Therefore, option B is correct.

NEW QUESTION # 30

In the context of clause 6.1 actions to address risks and opportunities, what is defined as residual risk?

- A. Informed decision to take a particular risk
- B. Effect of uncertainty on objectives
- C. None of the above
- D. Risk remaining after risk treatment

Answer: D

Explanation:

Residual risk is the risk that remains after risk treatment has been applied. In an ISMS, organizations assess risks, select treatment options, and implement controls or other measures to reduce risk to an acceptable level.

Even after treatment, some level of risk may still remain, and that remaining portion is called residual risk.

Therefore, option C is correct.

NEW QUESTION # 31

What does ISO/IEC 27001:2022 require for information security risk treatment?

- A. Acquiring a set of information security tools to automate risk treatment
- B. Performing an information security risk treatment process to select appropriate risk treatment options, taking into account the results of the risk assessment
- C. A consultancy to accurately perform information security risk treatment
- D. A person designated by top management with expertise to perform information security risk treatment

Answer: B

NEW QUESTION # 32

.....

The Certified ISO/IEC 27001:2022 Foundation (I27001F) practice test questions are customizable which means that the customers can customize the time and I27001F exam questions types according to their needs. These CertiProf I27001F Practice Tests are based on real based examination scenarios which help the students practice under real I27001F exam questions pressure and learn to control it.
