NEW QUESTION # 26

A customer's organization has a grade structure with four grades - C1, C2, C3, and C4. You have a car allowance element, which is at Assignment level, for which only the employees with grade C3 and C4 are eligible. You should not be able to create an element entry for employees with grades C1 and C2. How do you define the element eligibility for Car Allowance element?

- A. Define multiple element eligibilities using grade C1, C2, C3, and C4, but create an element entry only for employees with grades C3 and C4.
- B. You cannot meet the requirement as you cannot create element eligibility using grade as the eligibility criteria.
- C. Define the element eligibility as an Open Eligibility and create an element entry only for employees with grades C3 and C4.
- **D. Define multiple element eligibilities using grade C3 and C4.**

Answer: D

Explanation:

In Oracle Payroll Cloud, element eligibility can be defined using criteria such as grade to restrict who can receive an element. For the car allowance element at the Assignment level, where only grades C3 and C4 are eligible, you should define multiple element eligibilities specifically for grades C3 and C4 (Option B). This setup ensures that the system only allows element entries for employees in these grades, preventing entries for C1 and C2 at the assignment level. Option A is incorrect, as grade is a valid eligibility criterion. Option C (defining eligibility for all grades) defeats the purpose of restricting C1 and C2. Option D (Open Eligibility) allows entries for all grades unless manually controlled, which does not meet the requirement. Oracle's element eligibility framework supports this grade-based restriction.

NEW QUESTION # 27

You have a requirement to stop the new entries from being created for an element and to continue the existing entries. How do you achieve this?

- A. End date the element definition.
- **B. Change the effective date to the required date and select the "Closed for entry" check box.**
- C. You cannot achieve this requirement because you need to continue the existing element entries.
- D. Delete the element definition and re-create it with a different effective date.
