Foundation Exam Infor

If you are preparing for ISO-IEC-27001-Foundation exam and upset without accurate exam torrent and practice materials, iPassleader guarantees you to pass exam at first attempt absolutely. Our ISO-IEC-27001-Foundation exam torrent is edited by latest official examination knowledge. Once official department change questions we will release new version of ISO-IEC-27001-Foundation Exam Torrent accordingly. We provide one year free update and service warranty for all products. You will have sufficient time to take part in exams.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 2	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 3	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 4	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28
Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Communication
- B. Nonconformity and corrective action
- C. Competence
- D. Awareness

Answer: D

Explanation:
Clause 7.3 (Awareness) requires:
"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.
Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).
Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

NEW QUESTION # 29
Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Communicating feedback from interested parties to the organization
- B. Producing a risk assessment report

- C. Implementing the actions from internal audits
- D. Ensuring information security objectives are established

Answer: D

Explanation:
Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:
* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"
* "ensuring the integration of the ISMS requirements into the organization's processes;"
* "ensuring that the resources needed for the ISMS are available;"
Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 30
In an audit, what is the definition of an observation?

- A. An issue excluded from the scope of the standard
- B. A non-fulfilment of a requirement of ISO/IEC 27001
- C. A conformity to the standard where there is an opportunity for improvement
- D. An issue raised by an interested party

Answer: C

Explanation:
ISO/IEC 27001 mandates internal audits (Clause 9.2) and continual improvement (Clause 10.1) but does not define the specific audit term "observation." However, the audit framework in 9.2 requires an audit programme and impartial auditors, and management review inputs include "feedback on the information security performance including trends in... audit results" and "opportunities for continual improvement
." The companion implementation guidance (ISO/IEC 27002) reinforces the concept of opportunities for improvement in the review of policies: "The reviews should include assessing opportunities for improvement and the need for changes to the approach to information security..." In practical ISO audit usage (aligned with ISO 19011 guidance referenced in the Study Guide), an observation is a recorded conformity where improvement is advisable-commonly termed an Opportunity for Improvement (OFI). The Study Guide's internal audit section emphasizes running an audit programme to identify "potential areas of weakness or non-compliance," supporting the notion of recording improvement opportunities alongside nonconformities. Therefore, within ISO/IEC 27001 audit practice, the best-fit definition is B: a conformity where there is an opportunity for improvement.

NEW QUESTION # 31
Which of the following statements about the differences between an internal audit and a certification audit is true?
An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Neither 1 or 2 is true
- B. Only 2 is true
- C. Both 1 and 2 are true
- D. Only 1 is true

Answer: B

Explanation:
ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually." This makes statement 1 inaccurate.
Audit types are defined in ISO/IEC 19011:
First-party audits: conducted internally by or on behalf of the organization (internal audits).
Third-party audits: conducted by independent external certification bodies.
Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

NEW QUESTION # 32

Which information is required to be included in the Statement of Applicability?

- A. The risk assessment approach of the organization
- B. The criteria against which risk will be evaluated
- C. The justification for including each information security control
- D. The scope and boundaries of the ISMS

Answer: C

Explanation:

Clause 6.1.3 (d) requires that the organization"produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions."This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA isjustification for including (or excluding) each information security control.

NEW QUESTION # 33

......

No matter you are exam candidates of high caliber or newbies, our APMG-International ISO-IEC-27001-Foundation exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation Real Dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation learning materials quality.
