## Salesforce Health Cloud Accredited Professional Health-Cloud-Accredited-Professional Prüfungsfragen mit Lösungen (Q81-Q86):

### 81. Frage

The Salesforce administrator for ABC Policies Inc, a Health Care Payer Organization, would like to enable the members to enroll in and out of Care Program multiple times. Where, within Health Cloud Settings, should a Health Cloud administrator make changes to accomplish this requirement?

- A. Health Cloud Settings
- B. Care Program Settings
- C. Program Enrollee Settings
- D. Care Request Settings

**Antwort: C**

**Begründung:**

Reference and details below.

### 82. Frage

Bloomington Caregivers is launching a patient portal with contact tracing functionality as part of its Health Cloud implementation. Users require the ability to leverage advanced sharing and customizable dashboards. Which license should a consultant recommend for the external patient users?

- A. Customer Community for Health Cloud
- B. Experience Cloud for Health Cloud
- C. Customer Community Plus for Health Cloud
- D. External Apps for Health Cloud

**Antwort: C**

**Begründung:**

When launching a patient portal with contact tracing functionality as part of a Health Cloud implementation, it's crucial to select a license that supports advanced sharing capabilities and customizable dashboards for external patient users. The Customer Community Plus for Health Cloud license is the most appropriate choice to meet these requirements.

Key Features of Customer Community Plus for Health Cloud:

- \* **Advanced Sharing:** This license offers advanced sharing capabilities, allowing for more granular control over data access. This ensures that patients can securely access their health information while maintaining compliance with privacy regulations.
- \* **Customizable Dashboards:** With this license, users have access to customizable dashboards, enabling the presentation of personalized health data, appointment schedules, and other relevant information in an intuitive and user-friendly interface.
- \* **Enhanced Permissions:** Customer Community Plus provides enhanced permissions compared to the standard Customer

Community license, including the ability for users to manage their own records and collaborate more effectively with healthcare providers.

Considerations:

\* **User Access Requirements:** Assess the specific needs of your patient users, including the types of data they need to access and the level of interaction required within the portal. Customer Community Plus supports more complex use cases involving data sharing and collaboration.

\* **Compliance and Security:** Ensure that the chosen license aligns with healthcare compliance standards, such as HIPAA, to protect patient information. The advanced sharing and security features of Customer Community Plus support adherence to these regulations.

**Experience Cloud for Health Cloud FAQ:** This Salesforce Help article provides detailed information about the capabilities and features of Experience Cloud licenses tailored for Health Cloud, including advanced sharing and dashboard customization. Salesforce

**Editions & Pricing - Health Cloud:** This Salesforce pricing page outlines the different Health Cloud editions and their features, helping to determine the most suitable license for your needs. Salesforce

By selecting the Customer Community Plus for Health Cloud license, Bloomington Caregivers can provide their external patient users with a robust and secure portal experience, featuring advanced data sharing and customizable dashboards that enhance patient engagement and satisfaction.

### 83. Frage

Which three steps should be followed when setting up Intelligent Sales in Health Cloud? (Choose three.)

- A. Set up permission set for Intelligent Sales
- B. Customize the vendor product fulfillment flow
- C. Set Visit Inventory Management to enabled
- D. Enable Intelligent Sales
- E. Customize Visit Execution event object

**Antwort: A,C,D**

### 84. Frage

Bloomington Caregivers is looking to view potential drug-to-drug interactions for its patients' medications and make recommendations based on that data within Health Cloud.

Which Health Cloud add-on should a consultant recommend to fulfill this requirement?

- A. Allergy Intolerance
- B. RxNorm DDI Connectivity
- C. Medication Management
- D. Medication Interactions

**Antwort: C**

**Begründung:**

Bloomington Caregivers aims to identify potential drug-to-drug interactions for patients' medications and provide recommendations based on that data within Salesforce Health Cloud. To fulfill this requirement, the Medication Management add-on is the appropriate solution.

**Overview of Medication Management:**

Medication Management is an add-on feature in Salesforce Health Cloud designed to help healthcare providers and care coordinators manage patients' medication regimens effectively. It enhances patient safety by identifying potential medication-related issues, including drug-to-drug interactions, and supports the reconciliation of medication lists during care transitions.

**Key Features:**

\* **Medication Reconciliation:**

\* Facilitates the accurate compilation of a patient's medication list, ensuring that all prescribed and over-the-counter medications are accounted for.

\* **Drug Interaction Checks:**

\* Automatically checks for potential drug-to-drug interactions using integrated databases, alerting healthcare providers to possible adverse effects.

\* **Recommendations and Documentation:**

\* Enables providers to document recommendations and notes related to a patient's medication regimen, supporting informed clinical decisions.

Implementation Considerations:

\* Licensing:

\* Medication Management is an add-on product that requires additional licensing. Ensure that your organization has the necessary licenses to access this feature.

\* Configuration:

\* Set up the Patient Medication Manager Lightning component within Health Cloud to utilize Medication Management features. This component provides an integrated interface for managing patient medications.

\* Integration with RxNorm:

\* Medication Management supports integration with RxNorm, a standardized nomenclature for clinical drugs, to enhance the accuracy of medication information and interaction checks.

References:

Medication Reconciliation: This Salesforce Help article provides detailed information on setting up and using the Medication Management feature within Health Cloud.

Salesforce

Add Medications by Using the Add Patient Medication Flow: Guidance on adding medications for patients using the Patient Medication Manager component.

Salesforce

By implementing the Medication Management add-on, Bloomington Caregivers can effectively monitor and manage patients' medication regimens, identify potential drug-to-drug interactions, and provide informed recommendations, thereby enhancing patient safety and care quality.

## 85. Frage

A customer that already has Service Cloud is onboarding a new business unit, which needs to use Health Cloud.

Which three organization-wide default settings should an administrator change to ensure the original business unit that leverages Service Cloud does not have visibility into protected health information (PHI)?

Choose 3 answers

- A. Set related clinical objects to Controlled by Parent or Private.
- B. Set Contact to Controlled by Parent.
- C. Set Health Details to Controlled by Parent or Private.
- D. Set Person Accounts to Private.
- E. Set Account and Contract to Private.

Antwort: A,C,D

Begründung:

When onboarding a new business unit to Health Cloud while protecting sensitive data for the existing Service Cloud users, adjusting Organization-Wide Defaults (OWD) is critical.

Recommended Settings:

Health Details to Controlled by Parent or Private:

Ensures that only users with appropriate access to parent records (e.g., Person Accounts or Cases) can view sensitive health-related information.

Person Accounts to Private:

Restricts visibility of patient data at the account level, limiting access to users within the appropriate Health Cloud business unit.

Related Clinical Objects to Controlled by Parent or Private:

Applies restricted access to clinical objects like care plans, conditions, and encounters to ensure that PHI is not accessible to Service Cloud users.

Why Other Options Are Less Suitable:

B . Account and Contract to Private: Relevant for managing non-healthcare data but not directly tied to PHI protection.

D . Contact to Controlled by Parent: While this helps manage access to contact data, it does not address broader clinical objects or PHI.
