## Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q163-Q168):

NEW QUESTION # 163

What activity occurs during the program Inspect and Adapt workshop?

- A. Biweekly System Demo
- **B. PI Predictability Measure update.**
- C. Iteration Metrics update
- D. Team Iteration Demo
- E. Roadmap update

**Answer: B**

Explanation:

The Inspect and Adapt (I&A) workshop is a regular, program-level event at the end of each Program Increment (PI). One of the key activities in this workshop is updating the PI Predictability Measure, which assesses how well teams and the ART delivered on their PI Objectives. This measure is reviewed and discussed to help the ART improve planning and delivery in future PIs.

While the I&A event also includes a PI System Demo and a Retrospective/Problem-Solving Workshop, the Team Iteration Demo (C) and Iteration Metrics update (E) are typically performed at the team level throughout the PI, not specifically during the I&A. Roadmap updates (B) and Biweekly System Demos (D) are other ongoing events outside the I&A workshop.

#### **NEW QUESTION # 164**

SAFe uses Kanban to manage flow at the Portfolio Level for the following reasons EXCEPT \_\_\_\_\_.

- A. To ensure that there is visibility and transparency.
- B. To ensure that the analysis and discovery work needed for the items are not time bound.
- **C. To ensure that portfolio items are delivered to the Program or Solution Backlogs every 2 weeks.**
- D. To capture all ideas in the funnel.
- E. To limit the number of initiatives under consideration.

**Answer: C**

#### **NEW QUESTION # 165**

What does the SAFe budgeting model suggest?

- A. Epics, Features, and Stories are funded based on their size in normalized Story points, while teams are allocated to high-priority work as needed.
- **B. Each Value Stream receives budget allocation as a whole; individual work is not specifically budgeted.**
- C. Each team gets budget allocation and Features are funded according to their size in normalized Story points.
- D. Each Strategic Theme receives a budget allocation when Strategic Themes span portfolios.

**Answer: B**

Explanation:

The SAFe budgeting model recommends Lean Budgets: each Value Stream (not individual teams or work items) receives a total budget allocation. Individual work items (Epics, Features, etc.) are not specifically budgeted. This model provides flexibility for local decision-making and accelerates value delivery by minimizing the friction of project-based funding.

#### **NEW QUESTION # 166**

You are at a retrospective meeting where a program is trying to address a long-existing problem: unreliable PI commitments. One of the participants suggests that they are working on too many things at a time.

What aspect of the program causes uncontrollable amounts of work in process?

- **A. Backlog items in the Program Backlog are not truly end-to-end Features; they look more like large chunks of work at different layers of the system.**

- B. Teams don't do a good job of task-switching.
- C. All program teams are cross-functional, and therefore every team spawns work in multiple areas at the same time.

**Answer: A**

Explanation:

When Program Backlog items are not properly split into end-to-end Features, but instead are large chunks of work or technical components, it causes teams to work on too many parallel streams, increasing WIP (Work In Process). SAFe recommends that Program Backlog items be INVEST (Independent, Negotiable, Valuable, Estimable, Small, Testable) Features to ensure flow.

"When backlog items are not end-to-end Features, but rather large technical or architectural pieces, it increases the WIP, causes more dependencies, and makes it difficult for teams to complete work within the PI." (Source: SAFe 6.0 SPC Guide, "Coaching ART Execution" module; Features and Program Backlog best practices.)

#### NEW QUESTION # 167

Backlogs in SAFe behave just like queues.

- A. False
- B. True

**Answer: A**
