# Oracle Autonomous Database Cloud 2025 Professional actual test pdf, 1Z0-931-25 actual test latest version

Exams-boost ensure that the first time you take the exam will be able to pass the exam to obtain the exam certification. Because Exams-boost can provide to you the highest quality analog Oracle 1Z0-931-25 Exam will take you into the exam step by step. Exams-boost guarantee that Oracle 1Z0-931-25 exam questions and answers can help you to pass the exam successfully.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.
Topic 2	• Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.
Topic 3	• Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.
Topic 4	• Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.

Free 1Z0-931-25 Learning Cram & Latest 1Z0-931-25 Dumps Book

Improve your professional ability with our 1Z0-931-25 certification. Getting qualified by the certification will position you for better job opportunities and higher salary. Now, let's start your preparation with 1Z0-931-25 exam training guide. Our 1Z0-931-25 practice pdf offered by Exams-boost is the latest and valid which suitable for all of you. The free demo is especially for you to free download for try before you buy. You can get a lot from the 1Z0-931-25 simulate exam dumps and get your 1Z0-931-25 certification easily.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q113-Q118):

NEW QUESTION # 113
During the provisioning of an Autonomous Database on dedicated hardware, what should the database administrator select to determine where the Autonomous Database is created on the dedicated infrastructure?

- A. The compartment of the dedicated infrastructure because each compartment only runs one dedicated environment.
- B. The Listener endpoint where the Autonomous Database should register on.
- C. The Client Credentials wallet, which is used to connect to the Autonomous Database.
- D. The container database in which the Autonomous instance should run.

Answer: D

Explanation:
Full Detailed In-Depth Explanation:
When provisioning an Autonomous Database (ADB) on dedicated infrastructure, the placement within the infrastructure is critical:
A . Listener endpoint: Incorrect. This is for connectivity, not placement.
B . Client Credentials wallet: Incorrect. This is for secure connections, not determining location.
C . The container database in which the Autonomous instance should run: Correct. On dedicated infrastructure, an Autonomous Container Database (ACD) hosts multiple ADB instances. Selecting the ACD during provisioning determines where the ADB resides, affecting resource allocation and isolation.
D . The compartment: Incorrect. Compartments organize resources in OCI, but multiple ACDs can exist within a compartment, so this doesn't pinpoint the exact location.
Choosing the ACD is a key provisioning step for dedicated deployments.

NEW QUESTION # 114
What are three characteristics of Data Lake data captured in Object Storage? (Choose three.)

- A. Multiple subject areas
- B. Mixed data types
- C. High concurrency
- D. High transaction performance
- E. Schema on read

Answer: A,B,E

Explanation:
Data Lakes in OCI Object Storage store raw data for analysis. The three correct characteristics are:
Schema on read (C): Data Lakes store data in its raw, native format (e.g., JSON, CSV, Parquet) without a predefined schema. The schema is applied when data is read or processed, not when written, offering flexibility. For example, a Parquet file with sales data might be queried with SQL only when analyzed, not structured upfront like in a database.
Multiple subject areas (D): Data Lakes aggregate data from diverse sources-sales, HR, IoT-spanning multiple subject areas. This enables cross-domain analysis, like combining customer data with weather data for insights, all stored in a single OCI bucket.
Mixed data types (E): Data Lakes support varied formats: structured (e.g., CSV tables), semi-structured (e.g., JSON documents), and unstructured (e.g., videos). For instance, a bucket might hold CSV logs, JSON events, and image files, all accessible for processing.
The incorrect options are:

High concurrency (A): Data Lakes in Object Storage are not designed for high-concurrency transactional access (e.g., thousands of simultaneous updates). They're optimized for batch processing or analytics, unlike ATP's concurrency focus.
High transaction performance (B): Transactional performance (e.g., fast commits) is a database strength, not a Data Lake's. Object Storage prioritizes scalability and durability over transactional speed, making it unsuitable for OLTP workloads.
These traits make Data Lakes ideal for big data analytics, not real-time transactions.

NEW QUESTION # 115
Which two statements are true when running DBMS_CLOUD.COPY_DATA? (Choose two.)

- A. The source file can be in either Oracle Standard Storage or Oracle Archive Storage bucket in the Object Store.
- B. The target table will be created in Autonomous Database if it does not already exist.
- C. A valid credential must be created prior to running the DBMS_CLOUD.COPY_DATA procedure.
- D. The source files can reside in Oracle Object Storage, Amazon S3 Object Storage, or Azure Blob Storage.
- E. The source file will be automatically removed after the DBMS_CLOUD.COPY_DATA procedure finishes successfully.

Answer: C,D

Explanation:
DBMS_CLOUD.COPY_DATA loads data into Autonomous Database:
Correct Answer (B): "The source files can reside in Oracle Object Storage, Amazon S3 Object Storage, or Azure Blob Storage" is true. The procedure supports these cloud storage services with proper credentials.
Correct Answer (E): "A valid credential must be created prior to running the DBMS_CLOUD.COPY_DATA procedure" is true.
Credentials (e.g., via DBMS_CLOUD.CREATE_CREDENTIAL) authenticate access to the source storage.
Incorrect Options:
A: Source files are not automatically removed; deletion requires separate action.
C: The target table must exist; COPY_DATA doesn't create it.
D: Archive Storage isn't supported; only Standard Storage is compatible.
This enables flexible data loading from cloud storage.

NEW QUESTION # 116
Which three Oracle Cloud Infrastructure (OCI) resources do you need to configure before provisioning your Autonomous Database with a private endpoint? (Choose three.)

- A. Subnet
- B. Network Security Group
- C. Route Table
- D. VCN
- E. Security List

Answer: A,B,D

Explanation:
Provisioning an Autonomous Database with a private endpoint requires:
Correct Answer (A): Network Security Group (NSG) defines traffic rules for the private endpoint, restricting access to specific sources.
Correct Answer (B): VCN (Virtual Cloud Network) provides the network foundation, hosting the subnet and endpoint.
Correct Answer (E): Subnet (private) contains the database's private endpoint, isolating it from public access.
Incorrect Options:
C: Security Lists apply to subnets but are optional with NSGs, which are preferred for finer control.
D: Route Table is needed for connectivity (e.g., to a NAT Gateway), but not strictly required for the private endpoint itself.
These ensure secure, private access.

NEW QUESTION # 117
Which statement is FALSE about setting up compartment quotas?

- A. Compartment quotas use policies that allow allocation of resources with a high level of flexibility.
- B. Compartment quotas cannot be set on the root compartment.

- C. You cannot manage quotas in a compartment unless you belong to a group that has the correct permissions.
- D. Quotas set on a parent compartment override quotas set on child compartments.

Answer: B

Explanation:
Compartment quotas in Oracle Cloud Infrastructure (OCI) manage resource allocation:
Correct Answer (D): "Compartment quotas cannot be set on the root compartment" is false. Quotas can be applied to any compartment, including the root compartment, to limit resource usage tenancy-wide. While direct quotas on the root are less common (child compartment quotas are typically used), it's technically possible via OCI policies.
True Statements:
A: Quotas offer flexible resource limits (e.g., OCPUs, storage) via policy statements.
B: Parent compartment quotas take precedence over child quotas, enforcing hierarchical control.
C: Managing quotas requires appropriate IAM permissions (e.g., manage quotas), ensuring security.
This flexibility supports granular resource management across the tenancy.

NEW QUESTION # 118

......

In order to facilitate the user's offline reading, the 1Z0-931-25 study braindumps can better use the time of debris to learn, especially to develop PDF mode for users. In this mode, users can know the 1Z0-931-25 prep guide inside the learning materials to download and print, easy to take notes on the paper, and weak link of their memory, and every user can be downloaded unlimited number of learning, greatly improve the efficiency of the users with our 1Z0-931-25 Exam Questions. Our 1Z0-931-25 prep guide can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned.
