BTW, DOWNLOAD part of TorrentExam DA0-001 dumps from Cloud Storage: <https://drive.google.com/open?id=1ZoUpsnNbOWMJIsK9Q5uVzdVCzbHIWz11>

TorrentExam has come up with the latest and real CompTIA DA0-001 Exam Dumps that can solve these drastic problems for you. We guarantee that these questions will be enough for you to clear the CompTIA Data+ Certification Exam (DA0-001) examination on the first attempt. Doubtlessly, cracking the DA0-001 test of the DA0-001 credential is one tough task but this task can be made easier if you prepare with DA0-001 practice questions of TorrentExam. Keeping in view different preparation styles of CompTIA Data+ Certification Exam (DA0-001) test applicant TorrentExam has designed three easy-to-use formats for its product.

CompTIA Data+ certification exam covers a wide range of topics related to data management, including data collection, processing, analysis, visualization, and interpretation. It also covers data governance, security, and privacy issues, as well as data storage technologies and tools. DA0-001 Exam is designed to test candidates' ability to work with different types of data, such as structured, unstructured, and semi-structured data, using a variety of tools and techniques.

**Valid DA0-001 Exam Simulator | Best DA0-001 Study Material**

You final purpose is to get the DA0-001 certificate. So it is important to choose good study materials. In fact, our aim is the same with you. Our DA0-001 study materials have strong strengths to help you pass the exam. Maybe you still have doubts about our DA0-001 exam materials. We have statistics to prove the truth. First of all, our sales volumes are the highest in the market. You can browse our official websites to check our sales volumes. At the same time, many people pass the exam for the first time under the guidance of our DA0-001 Practice Exam.

## CompTIA Data+ Certification Exam Sample Questions (Q313-Q318):

### NEW QUESTION # 313

An analyst has received the requirements for an internal user dashboard. The analyst confirms the data sources and then creates a wireframe. Which of the following is the NEXT step the analyst should take in the dashboard creation process?

- A. Create subscriptions.
- B. Optimize the dashboard.
- C. Deploy to production.
- **D. Get stakeholder approval.**

**Answer: D**

Explanation:

Explanation

Getting stakeholder approval is the next step the analyst should take in the dashboard creation process, after confirming the data sources and creating a wireframe. Stakeholder approval means getting feedback and validation from the intended users or clients of the dashboard, to ensure that it meets their expectations and requirements. This step helps to avoid rework and ensure customer satisfaction. References: CompTIA Data+ Certification Exam Objectives, page 14

### NEW QUESTION # 314

'Which of the following is the BEST reason to use database views instead of tables?

- A. Views allow for the storage of temporary data. whereas tables do not.
- B. Views allow for the joining of multiple data sources, whereas tables do not.
- **C. Views reduce the need for repetitive, complex data joins.**
- D. Views can be used to restrict sensitive information.

**Answer: C**

Explanation:

Views are virtual tables that are created by querying one or more base tables or other views. Views do not store any data, but only show the result of a query. One of the main advantages of using views is that they can reduce the need for repetitive, complex data joins. For example, if a query involves joining multiple tables with many conditions, creating a view can simplify the query and make it easier to reuse. Therefore, the correct answer is A. ### NEW QUESTION # 315

A data analyst needs to perform a full outer join of a customer's orders using the tables below:

Sales\_table

Cust_id	Order_id	Order_qty
Tc - 5858	Od - 9800	50
Tc - 5833	Od - 9801	68
Tc - 5890	Od - 9802	103

Order\_table

Order_id	Order_qty
Od - 9803	102
Od - 9800	50
Od - 9802	103
Od - 9805	80
Od - 9804	70

Which of the following is the mean of the order quantity?

- A. 73.5
- B. 78.8
- C. 81.5
- D. 76.5

**Answer: C**

Explanation:

The correct answer is D. OUTER JOIN, seven rows.

An OUTER JOIN is a type of SQL join that returns all the rows from both tables, regardless of whether there is a match or not. If there is no match, the missing side will have null values. An OUTER JOIN can be either a LEFT JOIN, a RIGHT JOIN, or a FULL JOIN, depending on which table's rows are preserved. Using the example tables, a FULL OUTER JOIN query would look like this:

SELECT Cust\_id, Order\_id, Order\_qty FROM Sales\_table FULL OUTER JOIN Order\_table ON Sales\_table.

Order\_id = Order\_table.Order\_id;

The result of this query would be:

Cust\_id | Order\_id | Order\_qty | 1 | 1 | 100 | 2 | 2 | 50 | 3 | 3 | 25 | 4 | 4 | 75 | NULL | 5 | 10 | NULL | 6 | 20 | NULL | 7 | 15

As you can see, the query returns seven rows, one for each order in either table. The orders that are not in the Sales\_table have null values for the Cust\_id column.

To find the mean of the order quantity, we need to sum up the order quantities and divide by the number of rows. In this case, the mean is  $(100 + 50 + 25 + 75 + 10 + 20 + 15) / 7 = 42.14$ . Rounding to one decimal place, we get 42.1 as the mean of the order quantity.

### NEW QUESTION # 316

The current date is July 14, 2020. A data analyst has been asked to create a report that shows the company's year-over-year Q2 2020 sales. Which of the following reports should the analyst compare?

- A. Q2 2020 and Q4 2019
- B. YTD 2020 and YTD 2019
- C. Q2 2020 and Q2 2019
- D. Q2 2020 and Q2 2021

**Answer: C**

### NEW QUESTION # 317

After the daily ETL jobs are completed, the data in the reports does not appear complete, and a lot of data seems to be missing. Which of the following concepts should be used to assess and investigate further?

- A. Data integrity
- **B. Data profiling**
- C. Cross-validation
- D. Data consistency

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth

When encountering issues where reports are incomplete or data appears to be missing after ETL (Extract, Transform, Load) processes, it's essential to assess the quality and structure of the data. Data profiling is the process of examining the data available in an existing data source and collecting statistics and information about that data. This practice helps in understanding the data's condition, identifying anomalies, and ensuring that the data conforms to the expected patterns.

Option A: Cross-validation

Rationale: Cross-validation is a statistical method used to estimate the skill of machine learning models. It is primarily used in predictive modeling to assess how the results of a statistical analysis will generalize to an independent dataset. While valuable in model evaluation, it doesn't address issues related to missing or incomplete data in ETL processes.

Option B: Data profiling

Rationale: Data profiling involves analyzing the data for accuracy and completeness. By performing data profiling, analysts can identify missing values, inconsistencies, and anomalies within the dataset. This process is crucial for diagnosing issues that arise during ETL operations, such as incomplete data loads or transformation errors.

Reference:

partners.comptia.org

Option C: Data integrity

Rationale: Data integrity refers to the accuracy and consistency of data over its lifecycle. While maintaining data integrity is crucial, identifying issues with missing or incomplete data requires an initial assessment through data profiling to pinpoint where integrity may have been compromised.

Option D: Data consistency

Rationale: Data consistency ensures that data remains uniform across different databases and systems. While consistency is vital, the immediate step in addressing missing data post-ETL is to profile the data to understand the scope and nature of the inconsistencies. In summary, when faced with incomplete or missing data after ETL jobs, initiating an investigation with data profiling is the most effective approach. This process will provide insights into the data's current state, allowing for targeted actions to resolve any identified issues.

### NEW QUESTION # 318

.....

Best practice indicates that people who have passed the DA0-001 exam would not pass the exam without the help of the DA0-001 study materials. So the study materials will be very important for all people. If you also want to pass the exam and get the related certification in a short, the good study materials are the best choice for you. Now we are going to make an introduction about the DA0-001 Study Materials from our company for you. We sincerely hope that our study materials will help you achieve your dream.
