EAEP2201 Valid Exam Vce, EAEP2201 Exam Guide Materials

You can use this EAEP2201 simulation software without an internet connection after installation. Tracking and reporting features of our Esri EAEP2201 practice exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.

Esri Enterprise Administration Professional 2201 Sample Questions (Q36-Q41):

NEW QUESTION # 36
A client wants to perform incremental webgisdr backups daily and full backups weekly. They store all data in the relational ArcGIS Data Store, with no tile or map caches.
Which action is required to enable incremental backups?

- A. Increase the heap size of ArcGIS Data Store
- B. Enable point-in-time recovery on ArcGIS Data Store
- C. Decrease the max connections during backups

Answer: B

Explanation:
To perform incremental backups using the webgisdr tool, point-in-time recovery must be enabled on the relational data store. This creates transaction logs needed for differential backups and aligns with best practices for enterprise-level backup strategies.
From Esri documentation:
"Incremental backups can only be used with a relational data store when point-in-time recovery is enabled.
This enables transaction log capture needed for delta backups."
* OptionA is unrelated to backup functionality.
* OptionC is not required unless performance tuning is needed.
Reference:ArcGIS Enterprise -Enabling Point-in-Time Recovery in ArcGIS Data Store for Incremental Backups

NEW QUESTION # 37
An administrator needs to share content with a specific group of users. The administrator is concerned that several important applications will stop working for the users if they leave the group.
Which action should the administrator perform to prevent users from leaving the group?

- A. Create an administrative group
- B. Create a group visible only to group members
- C. Change the role of the users

Answer: B

NEW QUESTION # 38
An organization must limit the users who can publish services that reference data in a user-managed database.
At the same time, all users must be able to access and edit the data in that user-managed data store.
How should the database be registered?

- A. As a data store item in the ArcGIS Enterprise portal
- B. As a relational data store in ArcGIS Data Store
- C. As an ArcGIS-managed data store in Server Manager

Answer: C

Explanation:
Registering the database as a data store item in the ArcGIS Enterprise portal allows administrators to control who can publish services referencing the data. By sharing the data store item with specific groups or individuals, administrators can restrict publishing capabilities to authorized users. At the same time, all users can be granted appropriate permissions to access and edit the data directly in the user-managed database, independent of the publishing privileges.
Registering the database as an ArcGIS-managed data store in Server Manager does not provide the same level of control over publishing permissions. Registering it as a relational data store in ArcGIS Data Store is intended for managed data storage and does not apply to user-managed databases.
Reference Source: ArcGIS Enterprise documentation on registering user-managed data stores and controlling access.

NEW QUESTION # 39
A GIS administrator must determine which type of service to use when publishing a new basemap for the organization. The basemap must meet several requirements:
* Support offline workflows
* Use as little storage space as possible
* High-resolution display
* Easily incorporate data updates periodically made to a feature service Which service type should be used?

- A. Dynamic map service
- B. Vector tile service

- C. Cached map service

Answer: B

Explanation:
Vector tile services are optimized for high-resolution display and efficient storage, making them ideal for offline workflows. They allow for smaller file sizes compared to raster tiles and support dynamic styling.
Additionally, vector tile services can be updated by regenerating tiles from updated feature services, facilitating easy incorporation of data updates.

NEW QUESTION # 40

An organization configures an ArcGIS Enterprise portal to allow single sign-on using Integrated Windows Authentication (IWA).
Configuration includes:
* All accounts in the Active Directory group gisusers are added to the portal
* Existing users can sign in without entering credentialsHowever, new employees assigned to the same gisusers group cannot log in, create content, or join groups.What is causing this issue for the new employees?

- A. Their Active Directory accounts have been assigned an incompatible default user type
- B. The Web Adaptor cache must be cleared
- C. Their Active Directory accounts have not been added to the portal
- D. Their Active Directory accounts have not had sufficient time to sync to the portal

Answer: A

NEW QUESTION # 41

......

At the information age, knowledge is wealth as well as productivity. All excellent people will become outstanding one day as long as one masters skill. In order to train qualified personnel, our company has launched the EAEP2201 Study Materials for job seekers. We are professional to help tens of thousands of the candidates get their EAEP2201 certification with our high quality of EAEP2201 exam questions and live a better life.
