With our Fortinet FCP_FMG_AD-7.6 study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our Fortinet FCP_FMG_AD-7.6 learning prep exam is well received by the general public.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	<ul style="list-style-type: none">Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 3	<ul style="list-style-type: none">Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 5	<ul style="list-style-type: none">Troubleshooting
Topic 6	<ul style="list-style-type: none">This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 7	<ul style="list-style-type: none">Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

We have harmonious cooperation with exam candidates. The relation comes from the excellence of our FCP_FMG_AD-7.6 training materials. We never avoid our responsibility of offering help for exam candidates like you, so choosing our FCP_FMG_AD-7.6 practice dumps means you choose success. Moreover, without the needs of waiting, you can download the FCP_FMG_AD-7.6 Study Guide after paying for it immediately. And we have patient and enthusiastic staff offering help on our FCP_FMG_AD-7.6 learning prep.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which is recommended when you are managing a high volume of logs in your network?

- A. Forward logs from FortiAnalyzer to FortiManager daily.
- B. Store logs on FortiManager and use FortiView.
- C. Add and manage FortiAnalyzer from FortiManager.
- D. Enable advanced ADOM mode on FortiManager.

Answer: C

Explanation:

Adding and managing FortiAnalyzer from FortiManager is recommended for handling a high volume of logs, as FortiAnalyzer is designed specifically for centralized log management, analysis, and reporting, which offloads this workload from FortiManager.

NEW QUESTION # 60

What is the purpose of ADOM revisions?

- A. ADOM revisions find unused, duplicate, and unnecessary firewall policies and objects.
- B. ADOM revisions compare previous snapshots of the Policy Package and ADOM-level objects with the device-level database.
- C. ADOM revisions show specific changes in a policy package when it is installed.
- D. ADOM revisions save the current state of all policy packages and objects for an ADOM.

Answer: D

Explanation:

ADOM revisions save the current state of all policy packages and objects within an ADOM, allowing administrators to track changes over time and revert to previous configurations if needed.

NEW QUESTION # 61

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

- A. FortiManager will automatically assign the global policy package to the new policy package.
- B. FortiManager will automatically install policies on the policy package in ADOM1.
- C. The administrator will be able to select the option to assign the global policy package to the new policy package.
- D. The administrator will have to assign the global policy package from the global ADOM.

Answer: C

Explanation:

When a global policy package is assigned to an ADOM, administrators creating new policy packages within that ADOM have the option to select and assign the global policy package to the new policy package if desired.

NEW QUESTION # 62

An administrator is copying a system template profile between ADOMs by running the following command: `execute fmpfile export-profile ADOM 3547 /tmp/Backup_File output dump to file: [/tmp/Backup_File]` Where does this command export the system template profile from?

- A. FortiManager /tmp/Backup_File folder
- **B. FortiManager ADOM policy database**
- C. ADOM device database
- D. FortiManager configuration backup file

Answer: B

Explanation:

The command exports the system template profile from the FortiManager ADOM policy database, which stores the configuration templates for devices within that ADOM.

NEW QUESTION # 63

What are two expected results when both FortiManager and FortiGate are behind network address translation NAT devices?
Choose two answers

- **A. FortiGate is discovered by FortiManager through the FortiGate NATed IP address.**
- B. FortiGate can announce itself to FortiManager only if the FortiManager non-NATed IP address is configured on FortiGate under central management.
- **C. During discovery, the FortiManager NATed IP address is not set by default on FortiGate.**
- D. If the FortiGate-FortiManager communication protocol FGFM tunnel is torn down, FortiManager will try to reestablish the FGFM tunnel.

Answer: A,C

Explanation:

The FortiManager 7.6 Administrator Study Guide is explicit for the scenario where both FortiManager and FortiGate are behind NAT . It states that FortiManager can discover FortiGate through the FortiGate NATed IP address , which makes A correct. It also explains that in this scenario, the FortiManager NATed IP address is not configured on FortiGate by default under central management , which makes B correct.

C is incorrect because FortiGate must use the FortiManager NATed IP address , not the non-NATed IP, if it needs to announce itself or reestablish the FGFM tunnel. D is also incorrect because in this NAT scenario, if the tunnel is torn down, only FortiGate attempts to reestablish the connection ; FortiManager does not automatically do so.

NEW QUESTION # 64

.....

The benefits after you pass the test FCP_FMG_AD-7.6 certification are enormous and you can improve your social position and increase your wage. Our FCP_FMG_AD-7.6 study materials will help you gain the success in your career. You can be respected and enjoy the great fame among the industry.
