You can try the SAP C_ACDET_2506 exam dumps demo before purchasing. If you like our SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam questions features, you can get the full version after payment. TrainingDumps SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) dumps give surety to confidently pass the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam on the first attempt.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Our desktop-based SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) practice exam software needs no internet connection. The web-based SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) practice exam is similar to the desktop-based software. You can take the web-based SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based SAP C_ACDET_2506 Practice Exam. Both SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your Building SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) practice exams according to your needs.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q44-Q49):

NEW QUESTION # 44

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Hyperlink
- **B. Flex Master Data-based field**
- C. Computed Field
- D. Single-Select Enum

Answer: B

Explanation:

TheFlex Master Data (FMD)-based fieldtype supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 45

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields.

What is the recommended way to handle this scenario?

- A. Configure as many custom fields as possible for data capture purposes.
- B. Suggest the customer put a word document on the template and capture all information in that document.
- **C. Create a dynamic form (dform) where common data can be synced with the project header through customization.**
- D. Create a Microsoft Form from the Actions menu for managing all the requirements.

Answer: C

NEW QUESTION # 46

Which syntax is used for writing custom Validity Conditions?

- A. Python
- B. Scheme
- C. XML
- D. Regular expression

Answer: B

NEW QUESTION # 47

Which of the following considerations are important when creating custom fields? (Select 2 correct answers)

- A. The data type of a field can be dynamically changed, depending on data type availability
- B. There's a limit to the number of fields, by data type, that can be added to a class
- C. When a field has been created and published, that field type has been consumed from the number of available fields on the class
- D. Published field changes can be reverted via Un-publish to free up memory

Answer: B,C

Explanation:

SAP Ariba allocates a finite number of field "slots" per data type for each class. When a custom field is created and published, it consumes one of these slots. Therefore, there are limits to how many fields of each type you can create per class. The data type cannot be changed after creation, and un-publishing does not reclaim the allocated slot; you must delete the field to free resources. Planning field usage carefully avoids hitting these system limits.

NEW QUESTION # 48

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP for Me
- B. SAP Cloud Application Lifecycle Management
- C. SAP Cloud Project Studio
- D. SAP Ariba Enablement Workbook

Answer: D

Explanation:

The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

NEW QUESTION # 49

.....

We are specializing in the C_ACDET_2506 exam material especially focus on the service after sales as a leader in this field. In order to provide the top service on our C_ACDET_2506 study engine, our customer agents will work in 24/7. So after purchase, if you have any doubts about the C_ACDET_2506 learning guide you can contact us. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you on the C_ACDET_2506 training questions.
