For the complete Designing and Implementing Microsoft DevOps Solutions exam preparation and success, the TestPassKing AZ-400 exam practice test questions are the best choice. With the Microsoft AZ-400 Exam Questions, you will get everything that you need to learn, prepare and succeed in the Designing and Implementing Microsoft DevOps Solutions certification exam. You must add Microsoft AZ-400 Exam Questions in your preparation and should not ignore them.

Microsoft AZ-400 certification exam is ideal for professionals who work in software development, operations, testing, and project management. It is also recommended for individuals who want to enhance their knowledge and skills in DevOps practices and Microsoft technologies. Achieving this certification demonstrates the candidate's ability to design and implement DevOps solutions using Azure DevOps and other Microsoft technologies.

The Microsoft AZ-400 exam consists of 40-60 multiple-choice questions and has a time limit of three hours. The questions are designed to assess the candidate's ability to design and implement DevOps solutions using Microsoft technologies, including Azure DevOps, Azure Resource Manager, and Visual Studio. Candidates who pass the exam receive the Microsoft Certified: DevOps Engineer Expert certification, which demonstrates their expertise in DevOps practices and provides them with a competitive edge in the job market.

Microsoft AZ-400 (Designing and Implementing Microsoft DevOps Solutions) Certification Exam is a comprehensive exam that prepares candidates for designing and implementing DevOps solutions on Microsoft Azure. DevOps is an emerging field that combines software development and operations to improve the efficiency and reliability of software delivery. Designing and Implementing Microsoft DevOps Solutions certification exam is designed to test the candidate's knowledge and skills in various areas of DevOps, including continuous integration and delivery, infrastructure as code, security, monitoring, and collaboration.

Microsoft AZ-400 Reliable Test Syllabus | Valid Braindumps AZ-400 Book

At the information age, knowledge is wealth as well as productivity. All excellent people will become outstanding one day as long as one masters skill. In order to train qualified personnel, our company has launched the AZ-400 Study Materials for job seekers. We are professional to help tens of thousands of the candidates get their AZ-400 certification with our high quality of AZ-400 exam questions and live a better life.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q197-Q202):

NEW QUESTION # 197

You plan to use Desired State Configuration (DSC) to maintain the configuration state of virtual machines that run Windows Server. You need to perform the following:

- Install Internet Information Services (IIS) on the virtual machines.

- Update the default home page of the IIS web server.

How should you configure the DSC configuration file? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

```
Configuration WebServerConfig {  
  Import-DscResource -ModuleName PsDesiredStateConfiguration  
  Node 'localhost' {
```

Service
WindowsFeature
WindowsOptionalFeature
WindowsProcess

```
    WebServer {
```

```
        Ensure = "Present"  
        Name = "Web-Server"
```

```
    }
```

Archive
File
Package
Script

```
    DefaultHomePage {
```

```
        Ensure = 'Present'  
        SourcePath = '\\server1
```

```
        \DSCResources\web\index.htm'
```

```
        DestinationPath = 'c:\inetpub\wwwroot'
```

```
    }
```

```
}
```

```
}
```

Answer:

Explanation:

Answer Area

```
Configuration WebServerConfig {  
  Import-DscResource -ModuleName PsDesiredStateConfiguration  
  Node 'localhost' {
```

```
    WebServer {
```

```
      Ensure = "Present"  
      Name = "Web-Server"
```

```
    }
```

```
    DefaultHomePage {
```

```
      Ensure = 'Present'  
      SourcePath = '\\server1  
      \DSCResources\web\index.htm'  
      DestinationPath = 'c:\inetpub\wwwroot'
```

```
    }
```

```
  }
```

```
}
```

Explanation

See the answer in image

Box 1: WindowsFeature

Example:

```
Configuration WebsiteTest {  
  # Import the module that contains the resources we're using.  
  Import-DscResource -ModuleName PsDesiredStateConfiguration  
  # The Node statement specifies which targets this configuration will be applied to.  
  Node 'localhost' {  
    # The first resource block ensures that the Web-Server (IIS) feature is enabled.  
    WindowsFeature WebServer {  
      Ensure = "Present"  
      Name = "Web-Server"  
    }  
  }  
}
```

Box 2: File

Example continued:

```
# The second resource block ensures that the website content copied to the website root folder.  
File WebsiteContent {  
  Ensure = 'Present'  
  SourcePath = 'c:\test\index.html'  
  DestinationPath = 'c:\inetpub\wwwroot'  
}
```

NEW QUESTION # 198

Where should the build and release agents for the investment planning application suite run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation

☐

Box 1: A source control system

A source control system, also called a version control system, allows developers to collaborate on code and track changes. Source control is an essential tool for multi-developer projects.

Box 2: A hosted service

To build and deploy Xcode apps or Xamarin.iOS projects, you'll need at least one macOS agent. If your pipelines are in Azure Pipelines and a Microsoft-hosted agent meets your needs, you can skip setting up a self-hosted macOS agent.

Scenario: The investment planning applications suite will include one multi-tier web application and two iOS mobile applications. One mobile application will be used by employees; the other will be used by customers.

References:

<https://docs.microsoft.com/en-us/azure/devops/pipelines/agents/v2-osx?view=azure-devops>

NEW QUESTION # 199

You have a project Azure DevOps.

You plan to create a build pipeline that will deploy resources by using Azure Resource Manager templates.

The templates will reference secrets stored in Azure Key Vault.

You need to ensure that you can dynamically generate the resource ID of the key vault during template deployment.

What should you include in the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation

☐

NEW QUESTION # 200

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Azure DevOps to manage the build and release processes for applications.

You use a Git repository for applications source control.

You need to implement a pull request strategy that reduces the history volume in the master branch.

Solution: You implement a pull request strategy that uses fast-forward merges.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Explanation

No fast-forward merge - This option merges the commit history of the source branch when the pull request closes and creates a

merge commit in the target branch.

<https://docs.microsoft.com/en-us/azure/devops/repos/git/branch-policies>

NEW QUESTION # 201

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to create a release pipeline that will deploy Azure resources by using Azure Resource Manager templates. The release pipeline will create the following resources:

- * Two resource groups
- * Four Azure virtual machines in one resource group
- * Two Azure SQL databases in other resource group

You need to recommend a solution to deploy the resources.

Solution: Create two standalone templates, each of which will deploy the resources in its respective group.

Does this meet the goal?

- **A. No**
- B. Yes

Answer: A

Explanation:

Explanation

References: <https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-linked-templates>

NEW QUESTION # 202

.....

AZ-400 certification can demonstrate your mastery of certain areas of knowledge, which is internationally recognized and accepted by the general public as a certification. AZ-400 certification is so high that it is not easy to obtain it. It requires you to invest time and energy. If you are not sure whether you can strictly request yourself, our AZ-400 test materials can help you. With high pass rate of our AZ-400 exam questions as more than 98%, you will find that the AZ-400 exam is easy to pass.
