BONUS!!! Download part of TorrentValid NSE8\_812 dumps for free: [https://drive.google.com/open?id=1unot\\_OjirD-3uRcB-nzwyiml2zgxEYV-](https://drive.google.com/open?id=1unot_OjirD-3uRcB-nzwyiml2zgxEYV-)

Our customer service is available all day, and your problems can be solved efficiently at any time. Last but not least, we can guarantee the security of the purchase process of NSE8\_812 Test Questions and the absolute confidentiality of customer information. You do not have to worry about these issues, because we know that this is a basic condition for us to establish a good business model. If you have any questions, you can always contact us online or email us. We will reply as soon as possible.

To prepare for the Fortinet NSE8\_812 Exam, candidates are recommended to take the Fortinet NSE 8 training courses, which cover all the topics included in the exam. They can also use study guides, practice exams, and other resources available online. Fortinet also offers a certification program that provides candidates with the opportunity to gain hands-on experience working with Fortinet products and technologies.

## Pass Guaranteed 2026 Fortinet NSE8\_812: Fortinet NSE 8 - Written Exam (NSE8\_812) First-grade Training Courses

TorrentValid Fortinet NSE 8 - Written Exam (NSE8\_812) (NSE8\_812) questions in three formats are the go-to source for successful and quick preparation. Three formats of our study material are Fortinet NSE8\_812 exam PDF questions, desktop practice test software, and web-based NSE8\_812 practice test. The philosophy behind offering these formats is simple: to create a world-class learning material that can help candidates achieve their Fortinet NSE 8 - Written Exam (NSE8\_812) (NSE8\_812) preparation objectives. With the help of NSE8\_812 exam questions in three formats, you can prepare successfully for the test according to your style.

## Fortinet NSE 8 - Written Exam (NSE8\_812) Sample Questions (Q63-Q68):

### NEW QUESTION # 63

Refer to the exhibit showing a firewall policy configuration.

```
config firewall policy
  edit 1
    set name "Dev-To-Cloud-Assets"
    set srcintf "port2"
    set dstintf "port4"
    set srcaddr "Dev-Subnet"
    set dstaddr "Dev-Cloud-Assets"
    set action accept
    set schedule "always"
    set service "ALL"
    set fsso disable
    set groups "Dev-Users"
    set nat enable
  next
  edit 2
    set name "Internet-Access"
    set srcintf "port2"
    set dstintf "port4"
    set srcaddr "All-Internal"
    set dstaddr "all"
    set action accept
    set schedule "always"
    set service "ALL"
    set fsso disable
    set nat enable
  next
```

To prevent unauthorized access of their cloud assets, an administrator wants to enforce authentication on firewall policy ID 1. What change does the administrator need to make?

• A.

```
config user setting
  set auth-on-demand always
end
```

• B.

```
config user setting
  set auth-secure-http enable
  set auth-http-basic disable
end
```

• C.

```
config firewall policy
  edit 1
    set ntlm-guest disable
  next
end
```

• D.

```
config firewall policy
  edit 1
    set fsso enable
  next
end
```

**Answer: C**

Explanation:

The firewall policy in the exhibit allows all traffic from the internal network to the cloud. To enforce authentication on this traffic, the

administrator needs to add the auth-on-demand option to the policy. This option will force all users to authenticate before they are allowed to access the cloud.

The following is the correct configuration:

```
config firewall policy
edit 1
set srcintf "internal"
set dstintf "wan1"
set srcaddr "all"
set dstaddr "all"
set service "all"
set action accept
set auth-on-demand enable
```

### NEW QUESTION # 64

Refer to the exhibit.

```
config vpn ipsec phase1-interface
edit "vpn-hub02-1"
    set interface "wan1"
    set ike-version 2
    set authmethod signature
    set net-device enable
    set proposal aes256-sha256
    set auto-discovery-receiver enable
    set remote-gw 192.168.168.100
    set certificate "BR01FGTLOCAL"
    set peer "vpn-hub02-1_peer"
next
end
```

To facilitate a large-scale deployment of SD-WAN/ADVPN with FortiGate devices, you are tasked with configuring the FortiGate devices to support injecting of IKE routes on the ADVPN shortcut tunnels.

Which three commands must be added or changed to the FortiGate spoke config vpn ipsec phase1-interface options referenced in the exhibit for the VPN interface to enable this capability? (Choose three.)

- A. set mode-cfg-allow-client-selector enable
- B. set mode-cfg enable
- C. set add-route enable
- D. set net-device disable
- E. set ike-version 1

**Answer: A,C,D**

Explanation:

A is correct because net-device disable prevents the VPN interface from being added to the routing table as a connected route. This allows IKE routes to be injected instead. D is correct because add-route enable enables IKE route injection on the VPN interface. E is correct because mode-cfg-allow-client-selector enable allows the VPN interface to accept IKE routes from any peer that matches the phase 1 configuration. Reference: <https://docs.fortinet.com/document/fortigate/7.0.1/administration-guide/490352/advpn>

### NEW QUESTION # 65

On a FortiGate Configured in Transparent mode, which configuration option allows you to control Multicast traffic passing through the?

- FORTINET**
- A. `config system settings`  
`set multicast-skip-policy disable`  
`end`
- B. `config system settings`  
`set multicast-forward enable`  
`end`
- C. `config system settings`  
`set multicast-forward disable`  
`end`
- D. `config system settings`  
`set multicast-skip-policy enable`  
`end`

- A. Option D
- **B. Option A**
- C. Option B
- D. Option C

**Answer: B**

Explanation:

When multicast-skip-policy is enabled, no check is performed based on multicast policy. A multicast packet received on an interface is flooded unconditionally to all interfaces (except the incoming interface) belonging to the same forwarding domain. Multicast packets are forwarded even when there is no multicast policy or the multicast policy is set to deny. To forward multicast traffic based on multicast policy, multicast-skip-policy must be disabled. In transparent mode, there is a per-VDOM configuration to skip policy check and forward all multicast traffic. This command is only available in transparent mode, and is disabled by default.

#### NEW QUESTION # 66

A customer is planning on moving their secondary data center to a cloud-based IaaS. They want to place all the Oracle-based systems Oracle Cloud, while the other systems will be on Microsoft Azure with ExpressRoute service to their main data center. They have about 200 branches with two internet services as their only WAN connections. As a security consultant you are asked to design an architecture using Fortinet products with security, redundancy and performance as a priority. Which two design options are true based on these requirements? (Choose two.)

- A. Use FortiGate VM for IPSEC over ExpressRoute, as traffic is not encrypted by Azure.
- B. Two ExpressRoute services to the main data center are required to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge
- **C. Branch FortiGate devices must be configured as VPN clients for the branches' internal network to be able to access Oracle services without using public IPs.**
- **D. Systems running on Azure will need to go through the main data center to access the services on Oracle Cloud.**

**Answer: C,D**

Explanation:

- a) Systems running on Azure will need to go through the main data center to access the services on Oracle Cloud. This is because the Oracle Cloud is not directly connected to the Azure Cloud. The traffic will need to go through the main data center in order to reach the Oracle Cloud.
- c) Branch FortiGate devices must be configured as VPN clients for the branches' internal network to be able to access Oracle services without using public IPs. This is because the Oracle Cloud does not allow direct connections from the internet. The traffic

will need to go through the FortiGate devices in order to reach the Oracle Cloud.

The other options are not correct.

b) Use FortiGate VM for IPSEC over ExpressRoute, as traffic is not encrypted by Azure. This is not necessary. Azure does encrypt traffic over ExpressRoute.

d) Two ExpressRoute services to the main data center are required to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge. This is not necessary. A single ExpressRoute service can be used to implement SD-WAN between a FortiGate VM in Azure and a FortiGate device at the data center edge.

#### NEW QUESTION # 67

Refer to the exhibit.

```
config vpn ipsec phase1-interface
edit MyVPN1
set remote-gw 1.2.3.4
set interface {{WAN}}
set peertype any
set proposal aes256-sha256
set psksecret Fortinet!!Fortinet
next
end
config vpn ipsec phase2-interface
edit MyVPN1
set phase1name MyVPN1
set proposal aes256-sha256
set auto-negotiate enable
next
end
```

FortiManager is configured with the Jinja Script under CLI Templates shown in the exhibit.

Which two statements correctly describe the expected behavior when running this template? (Choose two.)

- A. The Jinja template will automatically map the interface with "WAN" role on the managed FortiGate.
- B. The template will work if you change the variable format to {{ WAN }}.
- C. The template will work if you change the variable format to \$(WAN).
- D. The template will fail because this configuration can only be applied with a CLI or TCL script.
- E. The administrator must first manually map the interface for each device with a meta field.

Answer: B,E

#### NEW QUESTION # 68

.....

Many people dream about occupying a prominent position in the society and being successful in their career and social circle. Thus owning a valuable certificate is of paramount importance to them and passing the test NSE8\_812 certification can help them realize their goals. If you are one of them buying our NSE8\_812 Exam Prep will help you pass the exam successfully and easily. Our NSE8\_812guide torrent provides free download and tryout before the purchase and our purchase procedures are safe.
