## NS0-528 Valid Exam Camp - Pass Guaranteed Quiz Network Appliance NS0-528 First-grade Unlimited Exam Practice

Our brand has marched into the international market and many overseas clients purchase our NS0-528 study materials online. As the saying goes, Rome is not build in a day. The achievements we get hinge on the constant improvement on the quality of our NS0-528 study materials and the belief we hold that we should provide the best service for the clients. The great efforts we devote to the NS0-528 Study Materials and the experiences we accumulate for decades are incalculable. All of these lead to our success of NS0-528 study materials and high prestige.

## Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q40-Q45):

**NEW QUESTION # 40**
An administrator needs to maintain 10 snapshots per volume on a NetApp AFF system and replicate to a destination with a snapshot retention of 120.
Which NetApp feature should the administrator use?

- A. SnapMirror active sync
- B. XCP
- C. SnapMirror
- D. MetroCluster

**Answer: C**

Explanation:
SnapMirror supports asymmetric snapshot retention, allowing the source volume (on the AFF system) to retain 10 snapshots while the destination retains up to 120 snapshots. This is useful for long-term retention or compliance at the destination without consuming extra capacity on the source.

**NEW QUESTION # 41**
The company you work for is using SnapMirror to replicate data from their on-premises primary ONTAP cluster to an instance of Cloud Volumes ONTAP in Google Cloud.
You are asked to use the ONTAP REST APIs to automate the process that allows the destination to be writable in the event of losing the primary site.
Which step is required to achieve this task?

- A. Use the PATCH method and stop the ongoing transfers by setting the state to ~abort~.
- B. Use the PATCH method and resume the relationships by setting the states to ~snapmirrored~.
- C. Use the PATCH method and update the relationships by setting the state to ~snapmirrored~.
- D. Use the PATCH method and quiesce the relationships by setting the state to ~paused~.

**Answer: D**

**NEW QUESTION # 42**
You need to migrate volumes, export policies, and data LIFs to a new NetApp ONTAP cluster.
Which NetApp feature should be used?

- A. Foreign LUN Import
- B. SnapMirror active sync
- C. BlueXP copy and sync
- D. SnapMirror SVM replication

**Answer: D**

Explanation:
SnapMirror SVM replication enables the replication of an entire SVM (Storage Virtual Machine), including volumes, export policies, LIFs, and configuration, from one ONTAP cluster to another. It is the correct feature for full SVM migration scenarios.

**NEW QUESTION # 43**
You want to create an application-consistent Snapshot copy by using SnapCenter software.
What is required to accomplish this task?

- A. VMware VM Tools
- B. NetApp NFS Plug-in for VMware VAAI
- C. Plug-in for Microsoft Exchange
- D. SnapDriven for Windows Server

**Answer: D**

**NEW QUESTION # 44**
Which technology uses synchronous replication?

- A. FabricPool

- B. MetroCluster mirrored aggregate
- C. SnapMirror XDP
- D. SVM DR

**Answer: C**

**NEW QUESTION # 45**
